(*a*) declared by a judicial decision pronounced before the twenty-third day of October, 1884, to be invalid on the ground that it was not registered in accordance with the provisions of the said Act; or

(*b*) of which the validity is being questioned on that ground in a suit commenced before the twenty-third day of October, 1884.

STATEMENT OF OBJECTS AND REASONS.

IT has recently been held by the Privy Council that a will that was deposited under the provisions of Part IX of Act VIII of 1871 was not "registered" within the meaning of section 13 and the definition in section 2 of the Oudh Estates Act 1869, which declares that "'registered' means registered according to the provisions of the rules relating to the registration of assurances for the time being in force in Oudh."

2. The consequences of this ruling, which affects also section 20 of the Act, where a similar provision occurs, are most important, since the procedure that is now pronounced to be inadequate to satisfy the requirements of the law has been constantly acted on. It is stated that the taluqdárs never suspected that the validity of wills formally deposited in the registration offices under sealed covers could be called in question. Moreover, it scarcely could have been intended that taluqdárs should be required to register their wills open, and it seems obvious that they cannot in the future be required to do so, which they will have to do under the decision of the Privy Council if the law remains unaltered.

3. Under these circumstances, it is considered advisable to amend Act I of 1869 so as to legalize the existing practice. This is done by the present Bill, and as the omission to fulfil the requirements of the law which has taken place in the past would seem to have been unintentional and due to a prevalent and hitherto undisputed misapprehension of its meaning, retrospective effect has been given to the amendment which covers all wills hitherto or at present only deposited and not registered, except wills already declared invalid by judicial decision or being questioned in a suit commenced before the date of the introduction of the Bill.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 23rd October, 1884 :—

No. 16 OF 1884.

A Bill to amend Act XXII of 1881.

WHEREAS it is expedient to amend the Excise Act, 1881; It is hereby enacted as follows :—

In the said Act, after section 34, the following section shall be inserted :—

Power to invest police-officers with powers of excise-officers.

"34A. The Local Government may, from time to time, invest any police-officers of or above the grade of head constable, either by name or in virtue of their offices, with the powers conferred on excise-officers by sections 27, 28 and 29 of this Act; and every officer so invested shall, for all purposes connected with the exercise of these powers, be deemed to be an excise-officer within the meaning of this Act."

STATEMENT OF OBJECTS AND REASONS.

SECTION 46 of Act X, 1871, corresponding to section 59 of Act XXI of 1856, enabled Local Governments to confer on certain police-officers powers of searching for and seizing spirituous liquors and intoxicating drugs and arresting persons found in possession of them. These powers have been conferred and exercised up to the present time in the North-Western Provinces and Oudh, and are essential to the efficiency of the excise-administration, as no separate establishments for the prevention of smuggling are maintained in those provinces, and the land-revenue officials have little leisure for excise-duties.

2. The excise law came under revision in 1881 and was re-enacted in a somewhat simpler form by Act XXII of that year.

Section 24 of that Act gives Collectors power to appoint persons by name or by virtue of their office to be officers for the collection of the excise revenue, but as police-officers are not specially mentioned among the persons to be so appointed, and as section 20 of Act V, 1861, precludes the exercise by them of any such authority, it has been held that they cannot be appointed to discharge excise functions, and that the power of so employing them conferred upon Local Governments by Act X, 1871, has been taken away by the Act of 1881.

3. This seems to have escaped notice when Act XXII of 1881 was passed. In the Statement of Objects and Reasons, in the Report of the Select Committee and in the speeches of the Hon'ble Member in charge of the Bill, nothing whatever is said of depriving the Local Governments of the power hitherto enjoyed by them of employing police-officers on excise-duties. Mr. Whitley Stokes, accounting for the omissions in the later Act, stated that they were provided for by other enactments or were fit subjects for executive orders. The omission now brought to light does not fall under either of these categories, and it is impossible to suppose that a power held to be necessary for the excise-administration was taken away from Local Governments by a side wind.

4. The Government of the North-Western Provinces and Oudh urge that the omission should now be rectified, and with this object the present Bill is introduced.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Circular No. $\frac{125 \text{ Ex.}}{42-2}$.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Museums and Exhibitions), dated Simla, the 5th November 1884.

Read the following—

No. 122, dated India Office, London, 25th September 1884.

From—Her Majesty's Secretary of State for India,

To—The Government of India.

I forward herewith, for your information, a copy of a letter and its enclosure, from Sir Frederick Bramwell, relating to the International Inventions Exhibition to be held next year at South Kensington.

No. 1575, dated South Kensington, S. W., 8th August 1884.

From—Sir FREDERICK BRAMWELL, Chairman,

To—Her Majesty's Secretary of State for India.

I have been requested by His Royal Highness the Prince of Wales to bring to Your Lordship's immediate notice the forthcoming International Inventions Exhibition, which is to be held, under the patronage of Her Majesty the Queen, in the buildings at South Kensington, at present occupied by the International Health Exhibition. The Exhibition will be opened in May 1885; and, as the time for preparation is short, it is hoped that Your Lordship will have the goodness to cause early notification to be made of His Royal Highness's request, that the Government of India will favour him with their co-operation by taking an active part in an exhibition which will doubtless prove of benefit to the inhabitants of all countries by bringing prominently to their notice the many inventions which have been made since the Great International Exhibition of 1862, and by gathering together examples of the music of all nations.

The prospectus, copies of which are forwarded herewith, will fully explain the nature and purpose of the forthcoming Exhibition. I beg leave to call attention to the following rules which specially concern exhibitors in Foreign countries and the Colonies.

"45. The Foreign and Colonial Commissioners appointed by their Governments are invited to communicate with the Secretary. They will be charged with the consideration of all questions relative to the distribution of the space allotted to their respective countries; and the Executive Council will place at their disposal all information and plans which may be useful to them. Foreign and Colonial Commissioners will be required to guarantee that all exhibits in their respective sections are in accordance with the classification and the Regulations.

"46. The applicants for space, from countries in which no Commissioner has been nominated must appoint agents in England to act on their behalf.

"47. Applications from Foreign countries and Colonies will be received up to the 1st November."

The Executive Council would suggest that the Government of India should be asked to give full publicity to the announcement of this International Exhibition in its two divisions of inventions and music and be asked to appoint a commission to arrange for the due display of goods under the various groups and to settle, in communication with the Council, matters connected with India.

The Executive Council trust that the Government of India will generally co-operate with them in promoting in this manner, an exhibition of great practical importance to the commerce and industry of the world and in making it, in a large sense, International.

I beg leave to add that it might be useful to supply for the use of the Government of India copies of the prospectus of which any number can be forwarded on application to this office.

PROSPECTUS.

It is intended to hold, in the year 1885, an International Exhibition of Inventions and of Musical Instruments, in the Exhibition Buildings, Royal Horticultural Gardens, South Kensington.

DIVISION I.—Inventions.

This Division will be devoted to Apparatus, Appliances, Processes and Products, invented or brought into use since 1862.

The collection of inventions will, it is hoped, serve to bring vividly before the public the progress which has been made, during the last quarter of a century, in applying the discoveries of science to the purposes of daily life.

For the practical realisation of this idea, it will be desirable not only to exhibit the apparatus by which a process is carried out (or a model or diagram of it), side by side with the resulting product, but also to show the working of, at all events, a limited number of industrial processes in their consecutive stages.

Having in view the wide range of this International Exhibition, and the limited nature of the total available area, it will be necessary to restrict as much as possible the amount of space which can be allotted even to the most important classes; and only under exceptional circumstances can applications be entertained for space for objects which have been shown in the Smoke Abatement Exhibition, 1881; the Fisheries Exhibition, 1883; or the Exhibition of Health and Education of the present year. [*The classes including such objects are marked in the annexed classification with an asterisk.**] As regards agriculture, also, it is considered that the annual Shows of the Royal Agricultural and kindred Societies will render it unnecessary to admit more than a few typical examples of each class of the improvements effected during recent years; and these should be, as far as possible, represented by models or diagrams.

It will, indeed, be preferable that inventions generally should (as far as practicable) be illustrated by models, which in the case of an entire machine may be accompanied by actual examples of the parts improved.

Where the invention relates to parts only of a machine, the whole machine will not be admitted unless the improvement (in respect of which the machine is offered for exhibition) cannot be sufficiently well shown without the exhibition of the entire apparatus, or unless in the opinion of the Executive Council the exhibit is of such special interest as to render its admission desirable.

Exhibitors will be required by reference to a specification and Letters Patent or otherwise to show that their proposed exhibits come within the terms set forth in the conditions of Division I.

As the Exhibition will be limited to the illustration of industrial processes, examples of either the raw material employed, or the finished product, will only be admitted when they are required for the full demonstration of a particular process. It is not proposed to allot space for exhibition of manufactured goods alone, unaccompanied by any illustrations of the process of manufacture.

Intending Exhibitors should fill in the accompanying Application Form which must be sent to the Secretary not later than the 15th September. Applications from Foreign Countries and the Colonies will be received up to the 1st of November.

DIVISION II.—Music.

This Division will consist of examples of Musical Instruments of a date not earlier than the commencement of the present century; and, in addition, any machinery, apparatus, or appliances connected with their manufacture or use, or in any way bearing upon the science and art of music, will be admitted. There will, furthermore, be Historic Collections of Musical Instruments, and of Paintings and Engravings representing musical subjects, without any restriction as to date.

Intending Exhibitors in this Division should fill in the Special Application Form supplied for the purpose, which must be sent to the Secretary by the 15th September. Applications from Foreign Countries and the Colonies will be received up to the 1st of November.

List of Groups under which the classification is arranged.

DIVISION I.—Apparatus, Appliances, Processes, and Products, invented or brought into use since 1862.

1.—Agriculture, Horticulture and Arboriculture.

2.—Mining and Metallurgy.

3.—Engineering Construction and Architecture.

4.—Prime Movers, and means of Distributing their Power.

5.—Railway Plant.

6.—Common Road Carriages, &c.

7.—Naval Architecture.

8.—Aeronautics.

9.—Manufacture of Textile Fabrics.

10.—Machine Tools and Machinery.

11.—Hydraulic Machines, Presses, Machines for Raising Heavy Weights, Weighing, &c.

12.—Elements of Machines.

13.—Electricity.

14.—Apparatus, Processes, and Appliances connected with Applied Chemistry and Physics.

15.—Gas and other Illuminants.

16.—Fuel, Furnaces, &c.

17.—Food, Cookery and Stimulants.

18.—Clothing.

19.—Jewellery.

20.—Leather, &c.

21.—India-rubber and Gutta-Percha, &c.

22.—Furniture and Accessories—Fancy Goods.

23.—Pottery and Glass.

24.—Cutlery, Ironmongery, &c.

25.—Fire-arms: Military Weapons and Equipment; Explosives.

26.—Paper, Printing, Bookbinding, Stationery, &c.

27.—Clocks, Watches, and other Time-keepers.

28.—Philosophical Instruments and Apparatus.

29.—Photography.

30.—Educational Apparatus.

31.—Toys, Sports, &c.

DIVISION II.—Music.

32.—Instruments and Appliances constructed or in use since 1800.

33.—Music Engraving and Printing.

34.—Historic Collections.

REGULATIONS.

1. *Date.* An International Inventions Exhibition, under the patronage of Her Majesty the Queen and the presidency of His Royal Highness the Prince of Wales, will be held in London in 1885.

2. *Open.* The Exhibition will be opened in May 1885, and will continue open for a period of about six months.

3. *Objects.* Division I. (Inventions) will be devoted to illustrations of Apparatus, Appliances, Processes and Products, invented or brought into use since 1862.

Division II. (Music) will consist of examples of Musical Instruments of a date not earlier than the commencement of the present century; and of Historic Collections of Musical Instruments and Appliances, and Paintings, Engravings and Drawings representing Musical subjects, without any restriction as to date.

4. *Awards.* Medals in Gold, Silver and Bronze, and diplomas of Honour will be awarded on the recommendation of Juries.

5. No charge will be made for space; but Exhibitors will have to pay every expense of conveying, delivering, fixing and removing their Exhibits, and also the cost of the erection of counters when required: and they must, either personally or by their Agents, superintend the despatch, transmission, reception, unpacking, installation and (at the close of the Exhibition) the removal of their goods; in default thereof the Executive Council reserve to themselves the right of doing whatever may be considered necessary, at the expense of the Exhibitor.

Expenses to be borne by Exhibitors.

6. Should any goods be deposited in the Exhibition premises during the absence of the Exhibitor or his Agent, the Executive Council will not be responsible for any loss or damage, from whatsoever cause arising.

Delivery of goods.

7. Cases must be unpacked as fast as possible, and the empty cases taken away by the Exhibitors or their Agents. The Executive Council decline to accept any responsibility with reference to empty cases, which must be at once removed from the building at the expense of Exhibitors.

Empty cases.

8. Applications to exhibit must be made on printed forms, which will be supplied on application to the Secretary, International Inventions Exhibition, South Kensington, S.W.; these must be filled up and returned on or before the 15th September 1884. The decision of the Council with regard to applications will be notified about the 1st of December.

Applications to exhibit.

9. The Council reserve to themselves the absolute right of refusing to admit any exhibits without necessarily specifying any reason for so doing.

Right to refuse exhibits.

10. Manufactured articles or products will only be admitted in so far as they may be necessary to illustrate an improved method of manufacture, or an improvement in the machine or process by which they are produced.

Manufactured articles.

11. Untried and unpatented inventions will not be accepted unless recommended by a competent authority.

Untried inventions.

12. Where the invention relates to parts only of a machine, the whole machine will not be admitted unless the improvement (*in respect of which the machine is offered for exhibition*) cannot be sufficiently well shown without the Exhibition of the entire apparatus, or unless in the opinion of the Executive Council the exhibit is of such special interest as to render its admission desirable.

Improved Machines.

13. Inasmuch as the scope of this Exhibition is very extensive, while the total area available is limited, it will be necessary to restrict as much as possible the space available for each exhibitor. It will, threfore, generally be preferable that inventions should (as far as practicable) be illustrated by models, which in the case of an entire machine may be accompanied by actual examples of the parts improved.

Models.

14. The classification is not to be considered as exhaustive. Where there appears to be no head under which an invention may come, the exhibitor should apply for space in the group most nearly cognate.

Classification not exhaustive.

15. In cases where an invention may come within the scope of several distinct groups, the Exhibitor is at liberty to enumerate the groups into which he considers it should come, in order that reference may be made to it in the different sections of the Catalogue; but duplicate exhibits will not be admitted.

Inventions under various groups.

16. Except under special circumstances, no applications will be entertained for space for objects which have been shown in the Smoke Abatement Exhibition, 1881; the Fisheries Exhibition, 1883; or the Exhibition of Health and Education, 1884. The space allotted to Agricultural Exhibits will be very limited.

Restrictions.

17. The Executive Council will endeavour to obtain, from the various English Railway Companies, special terms for the conveyance of exhibits to and from the Exhibition; and, should they succeed in doing so, such arrangements will be communicated to intending Exhibitors.

Railway rates.

18. All packages containing goods intended for exhibition must have painted on them the distinctive mark I. I. E., together with the *name and address* of the Exhibitor. *Labels* addressed to the Secretary, to be attached to packages, will be forwarded to each Exhibitor.

Marks on packages.

19. All cases, counters, platforms, &c., must not, without special permission, exceed the following dimensions:—

Dimensions of cases, &c.

Show cases and partitions . .	10 feet above the floor.
Counters . . .	3 " " "
Platforms . . .	1 foot " "

20. Exhibitors may place railings around their stands, subject to approval; but in every instance the railings must be within the area of the "stand," *i.e.*, of the space allotted.

Railings.

21. The flooring must not be altered, removed, or strengthened for the convenience of arrangement, except by sanction of the Executive Council, and at the expense of the Exhibitor.

Flooring.

22. No Exhibitor will be permitted to display exhibits in such a manner as to obstruct the light or impede the view along the open spaces, or to occasion inconvenience or injury to other Exhibitors, or otherwise to disadvantageously affect their displays.

Obstructions.

23. In order to ensure uniformity of decoration and general good effect, no Exhibitor will be allowed to put up any flags, banners, or other kind of decoration without special permission.

Decorations.

24. Signs or name-boards must be placed parallel with the main passages, that is, parallel with the frontage of the respective stands; and must in no case interfere with the lighting. They must be black with gold letters, and their position must be subject to the approval of the Council.

Signs.

25. All handbills, printed matter, &c., connected with exhibits, and intended for gratuitous distribution, must first receive the approval and permission of the Executive Council, which permission may be withdrawn at any time.

Handbills.

26. Exhibitors will be required to provide all necessary attendance and to keep their stands and exhibits properly cleaned and in good order during the whole period of the Exhibition.

Attendance.

27. No Exhibitor will be allowed to transfer any allotment, or portion thereof, or to allow any other than his own duly admitted exhibits to be placed thereon, except by permission of the Executive Council.

Non-transfer.

28. All goods exhibited must be in the name of the person who signed the application form.

Name.

29. Exhibitors are requested to mark the selling prices of the articles exhibited, so as to facilitate the judgment of the juries, as well as for the information of visitors.

Selling price.

30. Objects cannot be taken away before the close of the Exhibition, without the special permission in writing of the Executive Council.

Removal.

31. Exhibitors, or their attendants, may explain their exhibits to visitors, but they will in all cases be forbidden to invite visitors to purchase the goods, the Exhibition being intended for the purposes of display only, and not for those of sale. Special regulations will, however, be framed with regard to perishable articles.

Selling.

32. Motive power will be supplied free of cost under certain conditions; but Exhibitors will be required to pay for any gas or water that they may require. Exhibitors requiring motive power are requested to make special application to the Secretary.

Motive power.

33. No explosive substances, nor any substances which in the judgment of the Executive Council are dangerous will be admitted; they may be represented by models or dummies.

Dangerous substances.

34. Spirits, oils, essences, corrosive substances, and generally all substances which might spoil other articles or inconvenience the public, can only be received in substantial and suitable vessels of small size.

Spirits, &c.

35. The Executive Council reserve to themselves the sole right of compiling a catalogue of the exhibits under regulations which will be duly notified. Each nation will, however, have the right to produce at its own expense a catalogue of all the objects in its own Section.

Catalogue.

36. The Council reserve to themselves the right of causing any of the exhibits to be examined, tested or analysed for such objects as they may think fit.

Testing and Analysing.

37. No article exhibited may be photographed, drawn, copied or reproduced, in any manner whatsoever, without the special sanction of the Exhibitor and of the Executive Council.

Photographing, &c.

38. The Executive Council will not hold themselves responsible for loss or damage occurring to any exhibit from any cause whatsoever; but while declining any responsibility, the Council intend to take such precautions as they deem necessary.

Non-liability.

39. No goods can be sent in previous to the 1st March without special permission; after the 15th April no goods will be received.

Date of reception.

40. Passes to the Exhibition will be granted to Exhibitors and to a reasonable number of attendants. If these passes are used by any but those to whom they are issued, they will be immediately cancelled.

Passes.

41. The right to add to, alter, amend or expunge any of these Rules is reserved by the Executive Council.

Right to alter rules.

42. Both Englishmen and Foreigners in becoming Exhibitors signify by so doing their compliance with the whole of these Regulations, together with such other Regulations as the Executive Council may issue from time to time.

Rules binding.

43. The Executive Council reserve the right to remove the objects belonging to any Exhibitor who may not conform to the Regulations.

Right of removal.

44. If any damage or injury shall be caused or occasioned during the Exhibition by any exhibited machine, implement, or article to any visitor or other person, or to any officer, servant, or others then and there employed by the Executive Council of the International Inventions Exhibition, 1885, then the Exhibitor to whom such machinery, implement, or article may belong shall indemnify and hold harmless the said Council from and against all actions, suits, expenses, and claims on account or in respect of any such damage or injury which may be so caused or occasioned.

Non-liability.

SPECIAL RULES (IN ADDITION TO THE ABOVE) AFFECTING FOREIGN AND COLONIAL EXHIBITORS.

45. The Foreign and Colonial Commissioners appointed by their Governments are invited to communicate with the Secretary. They will be charged with the consideration of all questions relative to the distribution of the space allotted to their respective countries; and the Executive Council will place at their disposal all information and plans that may be useful to them. Foreign and Colonial Commissioners will be required to guarantee that all exhibits in their respective sections are in accordance with the Classification and with the Regulations.

Foreign Commissioners.

46. The applicants for space from countries in which no Commissioner has been nominated must appoint Agents in England to act on their behalf.

Foreign Countries.

47. Applications from Foreign Countries and Colonies will be received up to the 1st of November.

48. Packages from Foreign Countries must have painted on them the letters I. I. E. They must all be marked in such a way as to show distinctly from whence they come, the name of the country, and the name and address of the Exhibitor.

Foreign packages.

CLASSIFICATION.

(UNDER REVISION).

NOTE.

The heads given below are not intended to be exhaustive, but are rather to be regarded as indicative of the proposed scope of each class.

Only under exceptional circumstances can applications be entertained for space for objects which have been shown in the Smoke Abatement Exhibition, 1881; the Fisheries Exhibition, 1883; or the Exhibition of Health and Education, 1884, or for Agricultural Implements. The space allotted to those classes marked with an asterisk will therefore be very limited.

DIVISION I.—APPARATUS, APPLIANCES, PROCESSES, AND PRODUCTS, INVENTED OR BROUGHT INTO USE SINCE 1862.

Group i.—AGRICULTURE, HORTICULTURE AND ARBORICULTURE.

(For land drainage, reclamation, &c., *see* Group iii.; for agricultural engines, *see* Group iv.; for manure, *see* Group xiv.; for milling machinery, *see* Group xvii.)

* *Class* 1.—Field Implements.—Ploughs, drain-ploughs, cultivators, steam-diggers, harrows, drills, haymakers, horse-hoes, rakes, reapers, mowers, binders, anchors and rope porters, wagons, wagon-harness.

* *Class* 2.—Barn and Farm-yard Implements.—Thrashing machines, screens, winnowers, corn-cleaning machines, hay and straw elevators, hay and straw and fresh fodder compressors, turnip-cutters, chaff-cutters, grist mills, horse-gear, crop dryers.

* *Class* 3.—Dairy and Poultry Farm Appliances.—Milking appliances, cream separators, churns, cheese-making apparatus, apparatus for manufacturing butterine, incubators.

* *Class* 4.—Agricultural Construction.—Models, plans and designs for farm buildings, oast houses, siloes, rickstands, &c.

* *Class* 5.—Cattle Food.—Materials, processes, apparatus; seed mills, cake crushers; boilers, steamers and cooking apparatus; feeding appliances.

Class 6.—Horticultural Apparatus.—Hot-houses, frames, greenhouses, orchard houses, graperies, boiler and heating apparatus, lawn mowers, watering apparatus, tools and implements, pots and plant boxes, garden wire work, chairs, &c., plant labels.

Class 7.—Arboriculture.—Apparatus, &c., used in forestry; methods and materials for the preservation from decay of trees and timber.

Group ii.—MINING AND METALLURGY.

(For stone-working machinery and testing machines, *see* Group x.; metal-working machinery, *see* Group x.; for slate sawing and dressing machines, *see also* Group x.; for electrolytic methods of extracting, &c., metals, *see* Group xiii.; for furnaces in general, *see* Group xvi.; for manufacture of fuel, *see also* Group xvi; for explosives, *see also* Group xxv.; for mine surveying apparatus, *see also* Group xxviii.)

Class 8.—Machinery and Appliances used in Mines and Quarries.—Prospecting, searching, boring, shaft sinking, exploring working, hauling, pumping, winding, hoisting; man engines, safety catches, safety hooks, hydraulic mining; tools, drills, cutters, getters, breakers, air compressors; blasting, substitutes for explosives. Ventilating, lighting. Aids to respiration in mines. Life-saving appliances. Washing and dressing coal and other minerals, crushers, pulverisers, disintegrators, stamps, screens, riddles, separators, classifyers, jiggers, buddles, precipitators, sawing machines. Utilisation of waste.

Class 9.—Production and manufacture of Iron and Steel.—Coke oven, blast and other furnaces; Bessemer plant, Siemens plant, other processes for making iron and steel; blast engines; hotblast stoves; steam and other hammers; rolling machines, hydraulic and other forging machines, squeezers and other shingling apparatus; production and use of malleable cast iron; wire making apparatus; manufacture of tin plate, utilisation of gases and of slag; alloys and artificial compounds of iron with non-metallic elements.

Class 10.—Forging and foundry work.—Cupolas, air furnaces, pot furnaces; moulding machines, plate-moulding; forges forging machines; blowers, bellows, fans.

Class 11.—Metallurgy of metals other than Iron, with the exception of the precious metals. Alloys.—Furnaces and appliances used in the dry and wet methods of extracting and purifying copper; extraction of lead; metallurgy of zinc, tin, nickel, cobalt, bismuth, antimony, arsenic, mercury, aluminium; manufacture of sheet lead, pipe, Muntz's metal, sheet zinc, copper and brass tubes; bronzes, German silver and other nickel alloys; wires of copper and its alloys.

Class 12.—Metallurgy of the precious metals, Gold, Silver and Platinum.—Furnaces and appliances used in the dry and wet methods of extracting the precious metals; desilverisation of lead; amalgamation in all its forms, refining gold and silver; purification, melting and working of platinum and its alloys.

Group iii.—Engineering Construction and Architecture.

(For railway plant, *see* Group v.; for launching ship, *see* Group vii.; for surveying instruments *see* Group xxvi.)

Class 13.—Roads.—Methods and materials for constructing and paving roads; cleansing roads and pavements; road-sweeping machines; rollers; apparatus for the removal of mud, snow, &c.; water-carts and other means of watering.

Class 14.—Railways and Tramways.—Constructions; excavators and appliances used for earth-work and tunnelling. Permanent-way; rails, chairs, sleepers.

Class 15.—Bridges and Viaducts.—Models, plans, and designs for arched, girder, suspension, trestle, and other bridges; apparatus used in construction.

Class 16.—Docks and Harbours.—Models, plans, and designs for docks, harbours, piers, breakwaters, &c.; submarine constructions; diving apparatus; dredging machines; pile-drivers, screw piles; coffer-dams; graving docks, "patent" slips, caissons, pontoons, floating docks, hydraulic apparatus for working dock gates, &c., gridirons. Buoys.

* *Class 17.—Lighthouses.*—Methods of construction; appliances used in lighthouses, and in lightships, fixed and flashing light apparatus, lamps, sound signalling apparatus.

Class 18.—Rivers and Canals.—Conservation and improvement of rivers; construction of canals; locks, lifts and inclines, weirs.

* *Class 19.—Water-supply and Sewerage.*—Methods of collecting, pumping, storing, filtering, and distributing water; appliances for detecting and preventing waste of water, water-meters; water fittings, filters; sewers, sewage disposal and utilisation.

Class 20.—Reclamation, Irrigation and Drainage of Land.—Drainage (natural and artificial) of low-lying districts; embanking and warping land; irrigation works.

Class 21.—Testing apparatus.—Apparatus and instruments used in testing iron, stone, brick, concrete, cement, &c.

Class 22.—Military Engineering and Fortification.—Military topography.

* *Class 23.—Materials used in building.*—Bricks and tiles, machines for making them; concrete, artificial stone, cement, materials and appliances used in their production; asphalt; roofing felt, and other roofing materials; columns, girders, and other applications of metal in building; applications of terra cotta to buildings; preservative and fire-proofing materials, paints, &c., for application to stone, wood, iron, &c., methods of applying the same.

* *Class 24.—Building construction.*—Models and plans showing methods of construction; non-combustible construction; labour-saving and other mechanical appliances used in building, scaffolding, elevators; fittings and appliances used in buildings, chimneys, blinds, lifts, bells, speaking tubes, &c.

* *Class 25.—Heating, Lighting, Ventilation, House-drainage, &c.*—Sanitary appliances; ventilators; [illegible]; apparatus for heating by steam, water, air, &c.; means of cooling air.

Group iv.—Prime Movers, and Means of Distributing their Power.

(For distribution of power by water, *see also* Group xi.; by electricity, *see* Group xiii.)

Class 26.—Steam-engines and Boilers.—Stationary, portable, marine, locomotive; fireless locomotives; methods and means of preventing corrosion and incrustation; methods and appliances for preventing explosion, and for testing boilers; fire-grates, fire-feeders, smoke-consuming appliances; valves and valve gear, steam joints, governors, injectors, pumps; bearings, lubricators, anti-friction metals; indicators, gauges, manometers, tachometers, dynamometers.

Class 27.—Gas and air engines, &c.—Gas-engines, hot-air engines, petroleum-engines; air-compressors, compressed air-engines; ammonia-engines, vapour-engines; accessories for the above.

Class 28.—Means of Utilising Natural Forces.—Turbines, water-wheels, tide-mills; means of utilising wave-power; hydraulic rams, water-pressure engines; windmills; solar engines.

Class 29.—Means of Transmitting Power.—Driving bands, shafts, pulleys gearing, clutches, distribution of power by water or by air.

Group v.—Railway Plant.

(For construction of railways and tramways, *see* Group iii; for locomotives, *see* Group iv.; for common road locomotives, *see* Group vi.; for signals, *see also* Group xiii.

Class 30.—Rolling stock (excepting locomotives).—Carriages trucks, wagons, vans; wheels, tyres, axles, springs, bearings, buffers, couplings.

Class 31.—Fixed and other Appliances.—Switches, signals, crossings, turntables, switch-locks, communication with trains and in trains, water cranes, and other modes of tender supply.

Class 32.—Brakes, Hand and Automatic.—Screw, chain, compressed air, vacuum, steam electrical.

Class 33.—Tramways.—Rolling and fixed plant.

Class 34.—Atmospheric Railways, Portable Railways, &c.—Rope railways, pneumatic dispatch.

Group vi.—COMMON ROAD CARRIAGES, &c.

(For farm wagons, &c., *see* Group i.)

Class 35.—Carriages for common roads.—Steam, &c., carriages; pleasure and travelling carriages; cabs, omnibuses, hearses, trucks, carts, bath chairs, perambulators, ambulance carriages; machinery used in carriage, &c., construction; indicators, carriage lamps, carriage furniture and fittings; methods and means of propulsion.

Class 36.—Bicycles and Tricycles.—"Cycles" of every description, and fittings for the same.

Class 37.—Saddlery and Harness.—Horse clothing, whips, spurs; means and methods of breaking in horses; disengaging runaway horses.

Class 38.—Farriery.—Veterinary apparatus and material; medicines for horses, cattle, &c.; horse-shoes, machinery or making horse-shoes and horse-nails; methods of roughing horses; horse-clippers; grooming apparatus.

Group vii.—NAVAL ARCHITECTURE.

(For floating docks and dredging apparatus, *see* Group iii; for engines and marine engines, *see* Group iv.; for nautical instruments, *see* Group xxvii.)

* *Class 39.—Ship and Boat Building.*—Construction and materials; sheathing, armour plating, launching; cleaning ships' bottoms, preventing fouling; raising sunken vessels, leak-stoppers, life-boats, life-rafts and fittings, life-saving apparatus; light-ships; submarine boats, torpedo boats; loading and discharging cargo.

* *Class 40.—Ships' Fittings.*—Masts, sails, rigging, &c.; materials for sails; wire-rigging; self-reefing sails; use of steam power for working sails; anchors, and chain cables; means for weighing anchor; steam winches, capstans; lowering ships, boats; pumping and ventilating arrangements.

Class 41.—Marine propulsion (including Steering).—Screw propellers, paddles, hydraulic propellers, river and canal propulsion, chain towing; hand, steam, and hydraulic steering gear.

Group viii.—AERONAUTICS.

For observing instruments, *see* Group xxviii.; for apparatus for balloon photography, *see* Group xxix.)

Class 42.—Balloons.—Materials for balloons; methods of constructing and inflating; manufacture and transport of gas for the purpose; fittings; military and captive balloons; balloon equipment for field and seige purposes; fire-balloons; parachutes.

Class 43.—Aeronautic apparatus.—Flying machines; propelling and steering apparatus for such machines.

Group ix.—MANUFACTURE OF TEXTILE FABRICS.

(For dyes, mordants, &c., *see* Group xiv.)

Class 44.—Treating Raw Material.—Cotton—picking, ginning, seed-cleaning, baleing, pressing, opening. Flax, jute, rheea, &c.—retting and its substitutes, breaking, scutching, heckling. Wool—clipping, sorting, washing, drying, heckling. Silk—rearing and feeding of silkworms, reeling, winding, loading, conditioning.

Class 45.—Preparing for Spinning.—Combing and carding fibrous materials; manufacture of combs and cards.

Class. 46—Spinning.—Drawing, slubbing, roving, spinning, twisting, doubling, throwing, spooling, reeling, balling, &c. Making, sewing and darning thread; reels, cops, and cop tubes.

Class 47.—Preparing for Weaving.—Sizing, warping, beaming, &c., yarns.

Class 48.—Weaving.—Weaving plain, figured, damask, and double fabrics, weaving carpets, velvets, and other pile and terry fabrics; weaving ribbons, tapes, &c.; hose for water, sacks, sailcloth, hair; jacquards and apparatus for making jacquard cards, electrical and other substitutes, temples, pickers, including pneumatic and modes of "handing" shuttles; harness, healds and reeds, weft and other stoppers.

Class 49.—Rug and Mat Making.—Cocoanut and other fibre.

Class 50.—Lace-making, &c.—Manufacture of lace, knitted fabrics, hosiery, &c., net and meshed fabrics, nets, fringes, chenille, braid, and plaited fabrics, elastic fabrics.

Class 51.—Dressing and Finishing.—Drying, stretching, ageing, dressing, finishing, singeing, shearing, folding, fulling, calendering, measuring, packing, and otherwise preparing for market.

Class 52.—Felt-making.—Manufacture of felted fabrics.

Class 53.—Bleaching and Tissue Printing.—Machines and appliances used in bleaching, dyeing, and printing fibres, yarns, and fabrics mixtures used in bleaching and washing, dyeing patterns; resist and discharge printing rollers and blocks. Dyeing materials and colours; thickeners.

Class 54.—Rope-making.—Manufacture of twine, cord, rope, safety fuses; materials used in the manufacture.

Class 55.—Utilization of Second-Hand Materials and waste Products.—Mungo, sooddy, tow, oakum, waste silk, waste cotton.

Group x.—MACHINE TOOLS AND MACHINERY.

(For steam-hammers and forging machinery used in iron and steel making, *see* Group ii.; for machines for making horse-shoes and horse-nails, *see also* Group vi.)

Class 56.—Metal-working Machines.—Lathes; planers; machines for punching, shearing, sawing, drilling, boring, slotting, shaping, milling, wheel-cutting, screw-cutting, rolling and bending, corrugating, stamping, coining, pressing riveting, forging; emery wheels, grinding machines; rivet, nail, bolt, and screw-making machinery.

Class 57—Wood-working Machinery.—Lathes (including lathes for ornamental turning); machines for sawing, planing, moulding, mortising, carving, veneering, cask-making, wheel-making, cork-cutting, &c.

Class 58.—Stone-working Machinery.—Machines for sawing, planing, turning, dressing, polishing, grinding, breaking and crushing stone and slate.

Group xi.—HYDRAULIC MACHINES, PRESSES, MACHINES FOR RAISING HEAVY WEIGHTS, WEIGHING, &c.

(For hay and straw elevators, *see* Group i.; for elevators used in building, *see* Group iii.; for hydraulic rams, *see* Group iv.; for grain elevators, *see* Group xvii.; for chemical, &c., balances, *see* Group xxviii.)

Class 59.—Pumps, hand, steam, rotary, centrifugal.—Ships' pumps, pumps for corrosive fluids; hydropults; syphons; methods of raising water; methods of obtaining, distributing and equalising hydraulic power; accumulators.

**Class 60.—Fire-engines.*—Fire-extinguishing apparatus; automatic apparatus for indicating and extinguishing fires; fire-escapes, ladders, fire-hose, accessory fittings and appliances; hydrants.

Class 61.—Cranes and other lifting apparatus.—Hand, steam, and hydraulic cranes travellers; elevators, jacks, capstans, windlasses, crabs, hoists, blocks, pulleys, derricks.

Class 62.—Hydraulic and other Presses.

Class 63.—Weighing Machines (for commercial purposes).—Steel-yards; platform weighing machines; commercial balances, scales, weights, &c.; registering weighing machines; spring balances.

Group xii.—ELEMENTS OF MACHINES.

Class 64.—Mechanical movements.

Class 65.—Separate parts of machines.

Group xiii.—ELECTRICITY.

(For railway signals, *see* Group v.; for photometers, *see* Groups xv. and xxviii; for scientific apparatus used in electrical research, *see* Group xxviii.)

Class 66.—Generators.—Dynamos, primary and secondary batteries, thermo-electric batteries.

Class 67.—Conductors.—Submarine cables and apparatus for laying them; aerial wires, and underground cables; insulators and poles; insulating and coating materials; joints and connections; underground conduits; pipes, tubes, troughs, &c., electric light leads.

Class 68.—Testing and Measuring Apparatus.—Galvanometers, magnetometers, dynamometers, volt-meters, current-meters, methods of testing.

Class 69.—Telegraphic and Telephonic Apparatus.—Needle instruments, A. B. C. instruments, Morse instruments, type-printers, relays, duplex and quadruplex apparatus, keys, recording instruments, automatic transmitters, electric bells, indicators, telephones, microphones, lightning protectors.

Class 70.—Electric Lightning Apparatus.—Lamps, resistance coils, cut-outs, safety catches, switches. Fittings for glow and other lamps.

Class 71.—Electro-Metallurgy and Electro-Chemistry.—Methods of depositing and coating various metals. Electrotyping, galvano-plasty. Vats, cleaning and polishing apparatus, materials, tools, and appliances.

Class 72.—Distribution and Utilisation of power.—Electric railways, electric moters, electrically driven boats, tricycles, and other conveyances; systems of distribution.

Class 73.—Electric signalling.—Fire and burglar alarms, railway, ship, and time signals, water-level and wind indicators, tell-tales, electric clocks, chronoscopes, &c.

Class 74.—Lightning Conductors.

Class 75.—Electro Medical Apparatus.

Class 76.—Electrolytic methods for extracting and purifying metals.—Copper, zinc, lead, iron, refining the precious metals.

Class 77.—Electro-Thermic Apparatus.—Electrical apparatus for war, mining, blasting, and other purposes.

Group xiv.—APPARATUS, PROCESSES, AND APPLIANCES CONNECTED WITH APPLIED CHEMISTRY AND PHYSICS.

(For chemical apparatus used in scientific research, *see* Group xxviii.)

Class 78.—Inorganic products, and means used in obtaining them.—Sulphuric and other acids, ammonia and other alkalies, bleaching agents, dyes and dye-stuffs, salts, whitelead, paints and pigments, phosphorous, lucifer matches, disinfectants.

Class 79.—Organic and Synthetical Products, and means used in obtaining them.—Coal, tar products, oils, soaps, and detergents, lubricating agents, candles, perfumery, paraffin, varnishes, manures.

Class 80.—Apparatus and Appliances for compressing and liquefying gases, and applications thereof.

Group xv.—GAS AND OTHER ILLUMINANTS.

(For electric lighting, *see* Group xiii.; for gas-stoves, *see* Group xvi.; for photometrical apparatus, *see also* Group xxviii.)

Class 81.—Coal Gas.—Manufacture, purification, storage and distribution of gas; treatment of residues.

Class 82.—Water gas, Oil gas, Carburetting air, &c.

Class 83.—Tests and Photometrical Apparatus.—Chemical tests; standards of light; measurement of light.

Class 84.—Burners, and means of utilising and applying gas.—Gas fittings; burners for illuminating gas; devices for imparting luminosity to flame; gas meters; methods of lighting gas; methods of increasing illuminating power of gas.

Class 85.—Mineral and other oils.—Methods of obtaining; distilling and refining, testing.

Class 86.—Candles, &c.—Candles of wax, tallow, sperm, paraffin, &c.; night-lights; appliances used in the manufacture.

Class 87.—Lamps for Oil and Spirits, Holders for Candles, &c.

Group xvi.—FUEL, FURNACES, &c.

(For coke ovens and metallurgical furnaces, *see* Group ii.; for glass, &c., furnaces, *see* Group xxiii.)

Class 88.—Manufacture of Fuel.—Materials and processes for the manufacture of artificial fuel; preparation and use of liquid fuel; preparation of peat; charcoal burning.

Class 89.—Furnaces for Manufacturing purposes—Furnaces for burning solid, pulverised, liquid and gaseous fuel.

**Class 90.—Stoves for Coal, for Gas, for Oil, &c.*—Cooking stoves and kitchen ranges, domestic fireplaces; gas cookers; gas burners for heating and cooking petroleum and other stoves for heating and cooking.

Group xvii.—FOOD, COOKERY AND STIMULANTS.

(For the cooking of the cattle food, *see* Group i.)

Class 91.—Machinery for treating grain and flour.—Machines for preparing and grinding corn and dressing flour, and other mill machinery; mill-stone dressers, roll turners, and similar machines; machines for milling and polishing rice; grain elevators; apparatus for drying grain; granary fittings.

**Class 92.—Manufacturing Articles of food.*—Apparatus for manufacturing and refining sugar; confectioners' machinery; machines and appliances for preparing mustard, spice, pepper, &c.; manufacture of salt.

**Class 93.—Preserving Food.*—Methods, materials and processes for preserving animal and vegetable food; machines for producing cold.

* *Class 94.—Bread and Biscuit making.*—Kneading machines, biscuit and bread-making machines, ovens; processes for making bread.

* *Class 95.—Cooking Apparatus.*—Culinary utensils, chopping and mincing machines; apparatus for paring and slicing fruit and vegetables, cleaning fruit, washing and cleaning vegetables.

Class 96.—Brewing, Distilling, and Wine-making.—Machines and appliances connected with the manufacture and use of *alcoholic drinks.*

* *Class 97.—Manufacture of Aerated Waters.*—Machinery, materials, &c., use for the purpose; stoopers and other appliances.

* *Class 98.—Infusions.*—Apparatus, &c., used in the preparation and use of tea, coffee, chocolate, &c.

* *Class 99.—Tobacco.*—Machinery, appliances, and processes for treating and using tobacco.

Group xviii.—CLOTHING.

(For textile machinary, *see* Group ix.; for jewellery, &c., *see* Group xix; for waterproof clothing, *see* Group xxi.)

* *Class 100.—Fabrics.*—Specimens of new materials, or meterials recently applied to the manufacture of clothing.

* *Class 101.—Articles of Clothing.*—Specimens of clothing of novel construction.

* *Class 102.—Machinery and Apparatus.*—Machinery, &c., used in the production of articles of dress, sewing machines, knitting machines; machinery for the manufacture of boots, hats, gloves, &c.; needles, and machinery employed in making them.

* *Class 103.—Cleaning Clothing.*—Washing and wringing machines, mangling, &c., machines; boot-cleaning machines and processes for cleaning other articles of clothing.

* *Class 104.—Dress Fastenings, &c.*—Buttons, pins, hooks and eyes, machinery employed in their manufacture.

Group xix.—JEWELLERY.

* *Class 105.—Jewellery and Personal Ornaments.*—Materials, apparatus for manufacture, &c.

Group xx.—LEATHER, &c.

(For saddlery, *see* Group vi.; for boots and shoes, *see* Group xviii.)

Class 106.—Manufacture of Leather.—Materials, processes and appliances for cleaning, curing, preserving, unhairing, drying, tanning, dyeing, splitting, dressing, and otherwise preparing skins and hides; specimens of leather prepared by new processes; manufacture of parchment.

Class 107.—Treatment and Application of Leather (exclusive of saddlery and of boots and shoes).—Methods of ornamenting, painting, polishing, staining, water proofing, &c., leather.

Class 108.—Artificial Leather, &c.—Imitation leather, waterproof canvas, and terpaulin.

Group xxi.—INDIA-RUBBER AND GUTTA-PERCHA, &c.

(For use of gutta-percha, &c., in electrical insulation, *see* Group xiii.; for artificial leather, *see* Group xx.; for kamptulicon, *see* Group xxi.

Class 109.—Machinery for treating India-Rubber and Gutta-Percha.—Washing machines, rasps, masticators, mixing machines, vulcanisers, spreading machines, thread-making machines, wire-covering machines; machines for manufacturing rubber goods, pressers, moulds, &c., appliances for stereotyping in rubber.

Class 110.—Application of India-Rubber and Gutta-Percha.—Waterproof goods, elastick webbing; articles of unvulcanised and vulcanised rubber and gutta-percha, and fabrics prepared therewith; ebonite, vulcanite, and articles made therefrom; complex or insertion goods; kamptulicon, &c.; cements; grinding wheels; bottle-stoppers; printing rollers.

Class 111.—Substitutes for India-Rubber and Gutta-Percha, materials used in their treatment, &c.—Natural substances available as substitutes; artificial substitutes; combinations of rubber or gutta-percha with other materials; rubber, &c., from new sources of supply; pigments, solvents, &c., used in the manufacture; celluloid and other preparations of nitrated cellulose.

Group xxii.—FURNITURE AND ACCESSORIES—FANCY GOODS.

(For bronzes and alloys, *see* Group ii. ; for household fixtures, *see also* Group iii. ; for manufacture of carpets, *see* Group ix. ; for rug and mat making, *see also* Group ix. ; for glass and china, *see* Group xxiii. ; for paper hangings, *see* Group xxvi.)

* *Class 112.—Furniture and Upholstery.*—Articles of furniture ; machinery and processes used in their production ; frames for pictures and mirrors ; safes.

* *Class 113.—Floor coverings and Wall-coverings (other than Paper-hangings).*—Oil-cloth ; linoleum, kamptulicon; mats and matting ; material, appliances and processes used in their manufacture.

Class 114.—Artistic and Ornamental Metal-work.—Goldsmiths' and Silversmiths' work electroplate ; ornamental bronzes ; appliances used in the manufacture.

Class 115.—Trunks, Portmanteaux, &c.—Dressing bags and cases ; ivory, horn and bone goods ; travelling equipments.

Class 116.—Basket-work.—Appliances for use in the manufactures.

Class 117.—Brushes.—Materials, machines and appliances used in the manufacture ; methods of brush-making.

Class 118.—Umbrellas, Parasols, and Walking Sticks.—Machinery, &c., used in their manufacture.

Group xxiii.—POTTERY AND GLASS.

(For optical glass, *see* Group xxviii. ; for glass apparatus, *see* Group xviii.)

Class 119.—Kilns and Furnaces.

Class 120.—Bricks, Tiles, Earthenware, &c.—Terracotta ; architectural pottery ; fire-clay goods ; crucibles ; drain-pipes, chemical and similar stoneware ; materials, machinery, and apparatus.

Class 121.—Porcelain, Majolica, and Artistic Pottery.—Biscuit ware, faience ; Parian ; materials, machinery, and apparatus.

Class 122.—Crown, Sheet, and Plate Glass.—Window glass, mirrors, stained glass ; glass mosaic ; materials, machinery, and apparatus.

Class 123.—Bottles, Table Glass, Toughened Glass, &c.—Materials, machinery, and apparatus.

Group xxiv.—CUTLERY, IRONMONGERY, &c.

(For nail and screw-making machinery, *see* Section x.)

Class 124.—Cutlery and Tools.—Engineers', carpenters', joiners', &c., tools.

Class 125.—Surgical Instruments and Appliances.

Class 126.—Files and Rasps.—File-cutting machines.

Class 127.—Hardware.—Hollowware ; ornamental casting ; locks and bolts.

Class 128.—Screws, Nails, &c.—pikes, hinges ; furniture fittings.

Group xxv.—FIRE-ARMS, MILITARY WEAPONS AND EQUIPMENT ; EXPLOSIVES.*

(For fortification, *see* Group iii. ; for torpedo boats, *see* Group vii. ; for special articles mentioned under "military equipments" *see also* respective classes).

Class 129.—Ordnance.—Heavy guns and means of working them ; carriages and accessories ; naval, seige, field, and mountain guns ; machine guns ; mitrailleuses ; shells, and apparatus for their manufacture ; apparatus used in testing, in measuring velocity, pressures, recoil, &c.

Class 130.—Fuses, Detonators.—Appliances for firing guns, and for exploding shells, signal lights, war and signal rockets, life-saving rockets.

Class 131.—Guns, Rifles, Pistols.—Military and sporting guns and rifles ; revolvers ; magazine guns ; harpoon guns ; air guns ; machinery used in the manufacture of small arms ; proving apparatus ; targets.

Class 132.—Swords, Bayonets, Sapper's Tools, &c.—Entrenching tools ; shields ; lances ; dirks.

Class 133.—Gunpowder and Ammunition.—Explosives generally, and apparatus used in their manufacture and testing ; cartridges ; cartridge cases.

Class 134.—Torpedoes.—Submarine and subterranean, torpedoes and mines, methods of laying, firing, and removing the same; naval torpedoes, means of carrying, projecting and firing the same.

Class 135.—Telemeters.—Range-finders for artillery and submarine mine service.

**Class 136.—Military Equipment.*—Photographic, telegraphic, pontoon, mining, signalling, hospital equipment; transport service.

* Explosive substances will under no circumstances be admitted. They must be represented by dummies or models.

Group xxvi.—PAPER, PRINTING, BOOKBINDING, STATIONERY, &c.

(For applications of photograpy to printing, *see also* Group xxix).

Class 137.—Machines and Processes for the Manufacture of Paper, Paste board and Papier-Mâché.—Materials; manufacture of "half stuff;" washing, beating, and bleaching engines; agitators, strainers, moulds; methods, &c., of glazing and planishing; methods of treating waste paper; appliances, &c., for treating and moulding papier-mâché; manufacture of artificial parchment; recovery of waste products, and preventing the pollution of streams.

Class 138.—Machines, &c., for cutting, folding, and Ornamenting Paper.—Stamping; embossing; envelope and bag making; manufarture of playing cards; chromo-lithography; paper box machines; marbling; perforating; ruling; waterproofing; enamelling.

Class 139.—Paper hangings.—Printing machines; apparatus for engraving, printing rollers materials; tests for injurious materials.

Class 140.—Letter Press and other Printing.—Printing machines and presses; glazing and hot-pressing apparatus; apparatus, &c., for type-founding; lithographic machinery, materials, &c., stereotyping apparatus, &c., methods of anastatic printing; process blocks from autographic drawings; wood blocks; engraving machines; machines for cutting wood letter; type-setting machines, numbering machines, printers' furniture and locking-up appliances; production of printing surfaces; methods of printing cheques, bank-notes, &c.

Class 141.—Bookbinding, Manufacture of Portfolios, &c., Applications of Papier-Mâché—Materials; bookbinding machines, wire-stitching machines, cutting presses, rounding machines, backing machines, arming presses; account books, desks, cases, &c., for stationery, &c.; purses.

Class 142.—Artists' Implements and Materials.—Pencils, brushes, colours and varnishes, easels, crayons, palettes, palette knives, drawing boards, drawing instruments, pencil sharpeners.

Class 143.—Writing Materials and Appliances.—Type-writers; manifold writers; copying presses and processes; processes for multiplying copies of M.S.; pens; ink; penholders; inkstands; sealing-wax; stationery.

Group xxvii.—CLOCKS, WATCHES, AND OTHER TIME-KEEPERS.

(For electrical clocks, *see also* Group xiii.)

Class 144.—Clocks.—Timepieces and other domestic clocks; regulators and astronomical clocks; watchman's, calendar, turret, electrical and pneumatic clocks; hour-glasses, sun-dials, water-clocks.

Class 145.—Time Signals, &c.—Methods of controlling and synchronising clocks; apparatus for the distribution and signalling of time; also for the determination of time by astronomical observations.

Class 146.—Watches and chronometers.—Examples illustrative of stages of manufacture and of the different types of watches and of chronometers; keyless, chronograph, repeating, calendar, and other forms of watches.

Class 147.—Tools, &c.—Lathes and mandrils; wheel-cutting engines; machine tools for producing the several parts of watches on the "interchangeable" system; various hand-tools used in the manufacture and repair of clocks and watches; gauges and templates; appliances used in case-making.

Group xxviii.—PHILOSOPHICAL INSTRUMENTS AND APPARATUS.

(For testing machinery, *see* Group iii; for commercial weighing apparatus, *see* Group xi.; for practical applications of electrical apparatus, *see* Group xiii.; for industrial applications of chemistry, *see* Group xiv).

Class 148.—Optical.—Lenses, prisms, telescopes, microscopes and accessories, spectroscopes, polariscopes, polarimeters, stereoscopes, photographic lenses, spectacles, eye-glasses, optical glass.

Class 149.—Astronomical—Telescopes (astronomical) transit instruments, equatorials, mural circles, driving clocks, siderostats, heliostats, altazimuths, methods of fitting observatories and mounting instruments.

Class 150.—Physical.—Acoustic apparatus, tuning forks, sirens, phonautographs, phonographs; apparatus connected with molecular physics, air-pumps, manometers, radiometers; apparatus for measuring, &c., heat, thermometers, pyrometers, calorimeters; photometers; kinematic, static and dynamical apparatus, mechanics.

Class 151.—Electrical.—Friction and induction machines, batteries and other sources of electricity, Leyden jars, condensers, electroscopes, electrometers, galvanometers, voltameters, dynamometers, magnetometers, rheostats, resistances, electrical units, induction coils, thermopiles, vacuum tubes.

Class 152.—Chemical.—Thermometers, hydrometers, pyrometers, furnaces, blowpipe apparatus, assaying apparatus, apparatus for organic analysis, for gas and inorganic analysis, and for volumetric analysis, laboratory fittings and apparatus generally, balances, reagents.

Class 153.—Mathematical.—Calculating machines, indicating and registering apparatus, pedometers, counting machines, slide rules, planimeters, drawing instruments, ellipsographs, straight-edges, gauges, surface planes, dividing engines, pantographs, eidographs.

**Class 154.—Meteorological.*—Barometers, thermometers, rain gauges, monometers, hygrometers, aneroids anemometers, ozonometers, storm signalling apparatus.

Class 155.—Geographical.—Surveying apparatus, theodolites, chains, levels; underground surveying apparatus; apparatus for hydrographic surveying, and for marine investigations and observations; hypsometrical instruments, tide gauges; seismographical apparatus; projections, maps, charts, models, and globes.

**Class 156.—Nautical.*—Sextants, quadrants, sounding apparatus, logs, compasses.

Class 157.—Weighing and Measuring.—Weights, scales, balances; measures of length, graduated scales, verniers, steel tapes; measures of capacity; instruments for angular measurement, clinometers, goniometers.

Class 158.—Biological.—Apparatus for anatomical research; physiological apparatus; apparatus for collecting and preserving natural history specimens.

Group xxix.—PHOTOGRAPHY.

(For applications of photography to printing, *see also* Group xxvi.; for photographic lenses, *see* Group xxviii.)

Class 159.—Processes and their results.—Methods of gelatino-bromide plate-making, apparatus for making emulsion, apparatus for separating the sensitive constituent, coating, drying and packing machines; emulsion and other processes; printing processes, silver, carbon, Woodbury-type, platinotype, gelatino-bromide, collodio-chloride of silver, &c.; apparatus for washing, &c.; prints and negatives; methods for making photographic lantern slides.

Cass 160.—Apparatus (excluding lenses).—Cameras, shutters, changing-boxes, slides, tents, lamps; apparatus for making enlargements and for micro-photography.

Class 161.—Application of Photography to various purposes, Typography, Ceramics, Relief-moulds, &c.—Method of producing printing surfaces; photographic enamels, photographic printing on pottery; photographic reliefs. Use of photography in self-recording apparatus, in scientific observations, &c.

Group xxx.—EDUCATIONAL APPARATUS.

Class 162.—Models and Apparatus.—Appliances used in primary, scientific, technical, and artistic instruction.

Group xxxi.—TOYS, SPORTS, &C.

(For sporting guns, *see* Group xxv.)

Class 163.—Toys, Games, and Exercises.—Outdoor games; gymnastic apparatus; skates, artificial skating surfaces; indoor games; billiard tables.

* *Class 164.—Field Sports.*—Apparatus used in hunting, fishing, shooting, &c.; traps for animals, birds, vermin, &c.

Class 165.—Scenic and Dramatic Effects.—Theatrical fittings and apparatus; optical (magic) lanterns and apparatus for illuminating them.

DIVISION II—MUSIC.

Group xxxii.—INSTRUMENTS AND APPLIANCES CONSTRUCTED OR IN USE SINCE 1800.

Class 166.—Organs.—Details of construction; machines for blowing, hydraulic or otherwise; details of mechanism and the construction of pipes; pneumatic apparatus for keyboards and couplers, electric appliances, designs for organs, designs for organ-cases.

Class 167.—Harmoniums.—American organs, vocalions, concertinas, accordions, varieties of reeds and air-channels, details of construction.

Class 168.—Wind Orchestral Instruments.—(*a*) Wood; (*b*) Brass.

Class 169.—Pianofortes.—(Grand, square, and upright).—Models of framings, castings, models of action, pedal appliances, mechanical devices for tuning and transposing, wire and other material used in construction designs for cases.

Class 170.—Violins, and instruments of the Violin family; Bows, strings, and inventions connected with these instruments.

Class 171.—Harps.

Class 172.—Automatic and Barrel Instruments.

Class 173.—Drums, Cymbals, and other instruments of percussion.

Class 174.—Bells and Carillons.

Class 175.—National Instruments of all countries not ordinarily used in orchestras.

Class 176.—Sirens, Tuning Forks, Pitch Pipes, Tonometers, and appliances for the determination of pitch.

Class 177.—Miscellaneous Musical Appliances.—Metronomes, desks, seats, appliances for forming the hand; instruments for recording improvisation.

Group xxxiii.—Music Engraving and Printing.

Class 178.—Printed and Engraved Music: and Machines and Appliances for its Production.

Group xxxiv.—Historic Collections.

Class 179.—Musical Instruments and Appliances.

Class 180.—Pictures, Engravings, and Drawings of Musical Subjects.

A Separate Form to be used for Division 2 (Music).

INTERNATIONAL INVENTIONS EXHIBITION, LONDON, 1885.

Application to exhibit in Division I.—Inventions.

To the Secretary of the International Inventions Exhibition,

South Kensington, London, S.W.

Please allot me the following amount of space for the exhibition of articles illustrating my invention described on the next page.

Floor space.................................*square feet.*

Counter.................................*feet run.*

Wall space.................................*square feet.*

In case of my application being granted (in whole or in part) I declare that I will adhere to the published Regulations of the Exhibition.

Signature.................................

Address.................................

....

Date.................................

INSTRUCTIONS.

A.—Applications for space for articles belonging to different groups must be made upon *separate* forms. Additional copies of the form can be obtained of the Secretary.

B.—This form should be sent in to the Secretary not later than the 15th September 1884.

NOTES.

[*Extracted from the Regulations which see for fuller instructions.*]

Division I, of the Exhibition will be devoted to apparatus, appliances, processes, and products invented, or brought into use, since 1862.

Division II, will consist of examples of musical instruments of a date not earlier than the commencement of the present century; and of Historic collections of musical instruments and appliances, and paintings, engravings and drawings representing musical subjects, without any restriction as to date.

A separate form of application will be supplied for Division II (Music).

Manufactured articles or products will only be admitted in so far as they may be necessary to illustrate an improved method of manufacture, or an improvement in the machine or process by which they are produced.

Exhibitors should state fully in their application form the features of novelty in respect of which they offer any article for exhibition.

Untried and unpatented inventions will not be accepted unless recommended by a competent authority.

When the invention relates to parts only of a machine, the whole machine will not be admitted unless the improvement (in respect of which the machine is offered for exhibition) cannot be sufficiently well shown without the exhibition of the entire apparatus, or unless in the opinion of the Executive Council the exhibit is of such special interest as to render its admission desirable.

Inasmuch as the scope of this Exhibition is very extensive, while the total area available is limited, it will be necessary to restrict as much as possible the space available for each exhibitor. It will, therefore, be preferable that inventions should (as far as practicable) be generally illustrated by models, which in the case of an entire machine may be accompanied by actual examples of the parts improved.

The classification is not to be considered as exhaustive. Where there appears to be no head under which an invention may come, the exhibitor should apply for space in the group most nearly cognate.

In cases where an invention may come within the scope of several distinct groups, the Exhibitor is at liberty to enumerate the groups into which he considers it should come, in order that reference may be made to it in the different sections of the Catalogue; but duplicate exhibits will not be admitted.

Except under exceptional circumstances, no applications will be entertained for space for objects which have been shown in the Smoke Abatement Exhibition, 1881; the Fisheries Exhibition, 1883; or the Exhibition of Health and Education, 1884. The space allotted to Agricultural Exhibits will be strictly limited.

There will be no charge for space.

RESOLUTION.

The co-operation of the Government of India having been invited by the authorities of the International Inventions Exhibition to be opened at London in May 1885, under the Presidency of His Royal Highness the Prince of Wales, intimation is hereby given that any inquiries which intending exhibitors may wish to make, should be addressed to Baboo Troylokhya Nath Mukharji, the Officer in charge of the Exhibition Branch of this Department, Calcutta.

List of raw products collected for the Calcutta International Exhibition of 1883 84, compiled by Babu T. N. Mukharji, officer in charge of the Exhibition Branch, Revenue and Agricultural Department.

RESOLUTION.

At the request of the Government of Bengal, the Government of India in the Revenue and Agricultural Department undertook to form a collection of the economic products of India for the Calcutta International Exhibition of 1883-84, and the list read in the preamble shows the character and scope of the collection, and the extent to which it may be held to represent the raw resources of the country. The Government of India desires to record its appreciation of the help afforded to it by the officers and private gentlemen named in the appended list, without whose cordial co-operation it would have been impossible in the very limited time allowed to have accomplished the work with any measure of success. More particularly the Government of India would desire to acknowledge the services of the following gentlemen :—

(1) Forest Officers of Madras, Bengal, Burma, Assam, and the Central Provinces.

(2) F. Duthie, Esq., Superintendent, Botanical Gardens, Saharanpur.

(3) J. B. Fuller, Esq., Director of the Agricultural Department, Central Provinces.

(4) Babu Lachman Prosad Barman, Superintendent, Government Farm, Cawnpore.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 5th NOVEMBER 1884.

GENERAL REMARKS.—Prospects continue to improve in the Madras Presidency, where there was again good rain in several districts. In Bellary, where the condition of the crops has been the most unsatisfactory, more rain is still needed. Rain has fallen generally throughout the Mysore Province; the crops are in good condition and pasturage is sufficient. In Mercara the rain of the week was unfavourable for the cardamom crop, which is being picked. A good rice crop is expected. No report has been received from the Bombay Presidency for the week under notice.

In the Central India and Rajputana States, and in the Berars and Hyderabad, there was no rain during the week, but the prospects of the crops continue to be very good. Slight rain fell in a few districts of the North-Western Provinces and Oudh, and the weather is generally seasonable. Agricultural prospects are good. In the Punjab slight rain fell in a few places. The *kharif* has been nearly harvested, and the yield has been a good one. The recent rain has improved the prospects of *amun* paddy in Bengal and has been beneficial to the *rabi* sowings. In Assam the prospects of the crops are generally favourable. In British Burma the crops promise well, but more rain would be beneficial in some parts.

The last report of the Meteorological Department, dated the 6th instant, states that rain has fallen throughout the south of the peninsula, the fall at Madras and Negapatam being heavy.

Harvesting of the *kharif* and ploughing and sowing for the *rabi* continue in progress generally throughout the country. In Bengal the *rabi* crops already sown are doing well; *amun* paddy and sugarcane are being harvested in Dacca. In Beerbhoom the outturn of paddy is expected to be on an average an 8-anna crop, and in Moorshedabad not more than 6 annas.

The public health is generally good.

Prices are generally stationary, except in Bengal where they are unsteady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Nov. 5th)		
Bellary ...	·10 (average)	Standing crops need more rain.
Kurnool ...	·09 (average)	Standing crops good; harvest early cereals, outturn below half. Small-pox in one taluk.
Ganjam ...	·52 (average)	Small-pox and cattle-disease prevalent.
Kistna ...	·30 (average)	Standing crops generally good; harvest dry crops, outturn about half. River 5·10 feet over anicut. Small-pox, fever, and cattle-disease in places; 26 deaths from cholera.
Chingleput (Madras) ...	2·49 (average)	Standing crops good; harvest paddy, outturn above half. Small-pox generally prevalent; 17 deaths from cholera.
Coimbatore ...	1·46 (average)	Standing crops good; agricultural operations progressing; harvest wet and dry crops, outturn about average.
Tanjore ...	3·14 (average)	Standing crops generally good, in parts damaged by breaches and excessive rain; harvest wet and dry crops, outturn below average. 44 deaths from cholera.
Madura ...	1·39 (average)	Prospects considerably improved. 73 deaths from cholera.
Malabar ...	1·67 (average)	Second crop cultivation progressing. Small-pox, cattle-disease, and slight fever in two taluks; 5 deaths from cholera.
Travancore ...	2·60	Standing second crop paddy good. 4 deaths from cholera.
		General Remarks.—General prospects. North-east monsoon continues favourable. Prospects much improved.
Bengal—(Nov. 5th)		
Chittagong ...	3·84	Violent storm, with rain, slightly damaged standing crops. Prices stationary. Sporadic cases of cholera reported.
Dacca ...	·85	Prospects of crops good owing to recent rain; harvesting of sugarcane continues, that of *amun* paddy commenced; mustard and other winter crops being sown.
24-Pergunnahs (Calcutta)	*Nil*	Prospects of *amun* paddy continue satisfactory; sugarcane doing well; sowing of *rabi* crops going on. Price of common rice almost stationary. Public health generally good. State of river normal.
Moorshedabad ...	·23	Weather cool and somewhat cloudy; recent rain improved prospects of *amun* crops throughout the district. The area planted out being limited; not more than 6-anna crop expected; *rabi* crops being sown under favourable circumstances. Public health fairly good, though a few cases of cholera reported from Jungipore.
Rajshahye ...	*Nil*	Weather bright and warm; recent rain greatly benefited both *amun* paddy and *rabi* sowing. Fever rather general, and slight cholera chiefly in Nowgong.
Burdwan ...	*Nil*	Prospects of paddy good in Culna and Raniganj, not good in parts of Sadr station and Cutwa; *rabi* sowings going on. Price of rice slightly fallen.
Rungpore ...	*Nil*	Weather seasonable. Prospects of *amun* paddy bad. Price of rice stationary. Malarious fever prevalent.
Bhagalpur ...	....	Prospects of crops fair. Rice selling at 13 seers and 14 chittacks per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Purneah ...	*Nil*	Prospects of crops in the north good, some anxiety about a few small tracts in the south and east; cultivation for *rabi* progressing; tobacco being transplanted. Common rice 13 seers per rupee. Fever very prevalent; some cattle-disease. Rivers falling.
Patna ...	*Nil*	Prospects of paddy generally improved; spring crops germinated well; *ragi* and cotton growing splendidly. A few cases of cholera in Behar and Barh sub-divisions.
Durbhunga ...	*Nil*	Prospects of paddy improved; sowing of *rabi* progressing. Prices stationary. Public health good.
Hazaribagh ...	*Nil*	Weather seasonable. Prospects of paddy on low lands generally good; sowing of *rabi* crops continues, and prospects seem good. Common rice 13 seers per rupee. General health good.
Cuttack ...	*Nil*	Weather seasonable. Early *sarad* ripening, late *sarad* and *rabi* growing well. Price of rice stationary. Public health good. In Sarun recent rain was general and beneficial to poppy sowings, seed germinated well, 8,325 bighas sown in Chupra sub-agency.
		General Remarks.—The recent rain has improved the prospects of *amun* paddy everywhere, and has done good to *rabi* sowings; *rabi* crops already sown are doing well; harvesting of *amun* paddy and sugarcane has commenced in Dacca; in Beerbhoom the outturn of paddy expected to be on an average an 8-anna crop, and in Moorshedabad not more than 6 annas. Fever is prevalent in many districts, and cholera still reported from five districts. Price of rice unsteady.
N.-W. Provinces and Oudh—		
Benares (Nov. 4th)	No rain during the week.	The seed destroyed by the late rain, has been replaced by fresh sowings; opium sowing has commenced; all crops doing well. Fever slight in city; no cattle-disease. Bazars well supplied. Prices fluctuating slightly.
Gorakhpur („ 3rd)	*Nil*	*Rabi* sowings nearly finished. Prices stationary. Public health good.
Fyzabad („ 4th)	No rain during the week	Clear weather; west wind. Sowing of *rabi* crops nearly completed. Health of people and condition of cattle good.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta,

Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

On and from the 1st January, 1884, the terms of subscription and sale will be reduced as follow:—

HOME DEPARTMENT.

NOTIFICATIONS.—PUBLIC.

Simla, the 10th November 1884.

No. 1861.—Under the provisions of Section 9 of the Statute 24 & 25 Vic., cap. 67, the Governor General in Council is pleased to direct that His Excellency's Council shall assemble at Calcutta in the jurisdiction of the Lieutenant-Governor of Bengal.

The 13th November 1884.

No. 1877.—With reference to Home Department Resolutions Nos. 26-963, dated the 19th July 1883 (paragraph 5), and No. $\frac{2}{131-71}$, dated the 23rd August 1884, it is hereby notified that the examination prescribed for the filling up of vacancies in the clerical establishments of the Secretariat Offices of the Government of India and the Departments directly attached thereto will be held at Calcutta, in the Senate House of the Calcutta University, and at Allahabad and Lahore, at the places to be appointed by the Governments of the North-Western Provinces and Oudh and the Punjab, respectively, on Tuesday, the 13th January 1885, and following days. The hours of examination will be from 10 A.M. to 1 P.M. and from 1-30 P.M. to 4-30 P.M. daily.

The probable number of vacancies to be competed for is 30 in the Lower Division. There will be no examination for the Upper Division.

Candidates should pay the prescribed fee (Rs. 10) into the nearest Treasury, and forward the Treasury receipt to the Secretary to the Board of Examiners. Candidates paying their fees in Calcutta should pay them into the Bank of Bengal.

Application for permission to appear at the examination should, as directed in the Home Department Resolution of 19th July last, be made to the Secretary to the Board of Examiners, Calcutta, between the 1st and 15th days of December next (inclusive).

The attention of intending candidates is called to paragraphs 7 and 8 of the Resolution of 19th July last, prescribing the particulars* and documents which should accompany the application for permission to appear at the examination.

* (1) Evidence [illegible] candidate is not less than 18 and not [illegible] 24 years of age.

(2) A [illegible] candidate is of good moral character [illegible]d of the Institution in which he [illegible]ed, or (when a year or more has [illegible]cation terminated) from some [illegible]r, to whom he is well known [illegible] who is himself personally known to [illegible] some Government Office, this last fact being certified by the countersignature of the officer in question.

ESTABLISHMENTS.

The 11th November 1884.

No. 247.—Consequent on the return of Mr. D. M. Smeaton, C.S., Secretary to the Chief Commissioner of British Burma in the Land Revenue and Agricultural Department, to the North-Western Provinces, His Excellency the Governor General in Council has been pleased to sanction the following arrangements:—

Mr. H. Thirkell White, Acting Junior Secretary to the Chief Commissioner, to officiate temporarily, in addition to his own duties, as Secretary to the Chief Commissioner in the Land Revenue and Agricultural Department, from the date of Mr. Smeaton's giving over charge.

Simla, the 6th November 1884.

No. 4361.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

Read—

Letter from the Mint Master, Bombay, No. 1029, dated the 6th September 1884, forwarding the Reports on the working of the Mints at Calcutta and Bombay for the year 1883-84.

RESOLUTION.—The value of gold received in the Calcutta Mint from private persons during 1883-84 amounted to Rs. 1,09,698; it was Rs. 1,88,216 in the previous year; so that there was a decrease of Rs. 78,518. Gold was not coined in 1883-84, the balance of mohurs at the Bank of Bengal being sufficient to meet the certificates issued on it. Nor was any gold coined in the Bombay Mint. No gold was received from Government Treasuries during the year. The net imports of gold into India in the year amounted to Rs. 5,46,33,156 against Rs. 4,93,08,715 in the previous year.

2. Silver amounting to Rs. 91,29,512 was received in the Calcutta Mint from private persons during the year; in 1882-83 the amount was Rs. 81,00,533. The sum transferred for coinage from the Paper Currency Department was Rs. 69,94,198 against Rs. 88,58,710 in the previous year.

3. In the Bombay Mint the amount of silver received from private persons was 345½ and 317 lakhs during the years 1882-83 and 1883-84. The sum transferred by the Paper Currency Department for coinage in 1883-84 was Rs. 2,53,94,455* against Rs. 4,25,82,408 in 1882-83. The receipt of uncurrent coin during 1883-84 was Rs. 12,02,510. The amount so received in the Mint at Calcutta was Rs. 40,44,329. The loss on the receipt of these sums was Rs. 30,394 or 2½ per cent. in the Bombay Mint, and Rs. 54,767 or 1·3 per cent. in the Mint at Calcutta. The heavier loss in Bombay is due to the coins tendered for recoinage having lost more than 2 per cent. in weight. Old Portuguese coin amounting to Rs. 46,976 was received in the Bombay Mint during 1883-84 against Rs 8,61,564 in the previous year, and British Indian silver coin to the value of Rs. 1,558 was also received in the same Mint from Goa. The total coinage of gold, silver, and copper at each Mint is shown separately for the last five years in the following table:—

* Including a remittance of uncurrent coin amounting to Rs. 3,53,415.

4. The coinage of silver at both Mints during 1883-84 was much smaller than in the previous year, amounting to Rs. 3,66,34,011 against Rs. 6,50,84,570 in 1882-83.

5. The coinage of copper amounted to Rs. 11,54,245 in the Calcutta Mint and to Rs. 2,19,389 at Bombay. The coinage in both Mints largely exceeded that of the previous year, the total value amounting to Rs. 13,73,634 against Rs. 10,76,794 in 1882-83. Copper coin for the Straits Settlements amounting to Rs. 2,03,445 was struck in the Calcutta Mint in 1883-84 against Rs. 22,905 in 1882-83.

No silver or copper coins were struck during the year under review for the Portuguese Indian Government. Up to the close of 1883-84 Portuguese silver coin to the value of Rs. 19,07,931 (British Indian Currency) had been received in the Bombay Mint, and replaced by new coin to the value of 21½ lakhs. The withdrawal from circulation of old Portuguese copper coin continued during the year, the value of such coin received in the Bombay Mint for destruction having amounted to Rs. 1,47,083. The whole value of Portuguese copper coin received up to the end of 1883-84 was Rs. 2,25,366 (British Indian Currency), and the new coin issued to replace the old currency amounted in value to half a lakh of rupees.

6. The net imports of silver and the coinage in each year in both the Mints from 1872-73 are:—

	Net Imports. Lakhs.	Coinage. Lakhs.
1872-73	72	398
1873-74	249	237
1874-75	464	490
1875-76	155	255
1876-77	720	627
1877-78	1,468	1,618
1878-79	397	721
1879-80	787	1,025
1880-81	389	425
1881-82	538	219
1882-83	748	651

The Mint Master at Bombay states that only 317 lakhs of silver out of the 528 lakhs imported there (net) were tendered for coinage, the excess, consisting of fine silver in bars, having been absorbed by the Native States in Central India.

7. In addition to imported silver, bullion in the form of native coin and ornaments was received for coinage in the Bombay Mint as follows—

	Native silver ornaments. Lakhs.	Native coin. Lakhs.
1877-78	124	...
1878-79	116	67
1879-80	92	45
1880-81	10	25½
1881-82	4	1
1882-83	½	15½
1883-84	½	1¼

Bullion in this form is not sent to the Calcutta Mint. As indicating continued prosperity in the country, it is satisfactory to see that the melting of silver ornaments has almost ceased for the last two years.

8. The operative losses during the years 1882-83 and 1883-84 were respectively—in Calcutta Rs. 1,05,258 and Rs. 89,698, and in Bombay Rs. 94,289 and Rs. 66,387. These sums include losses on account of the withdrawal of old coins to the extent of Rs. 68,455 and Rs. 54,767 in the Calcutta Mint, and Rs. 29,691 and Rs. 30,394 in the Bombay Mint.

9. The proportion of loss in the melting and coining of silver has been as follows in Calcutta and Bombay per hundred tolahs :—

	Melting.		Coining.	
	Calcutta	Bombay.	Calcutta.	Bombay.
	Pies.	Pies.	Pies.	Pies.
1879-80	9·8	5	17	12
1880-81	9 2	5	15·5	14
1881-82	6·7	7	9	7
1882-83	7·87	7·5	9·1	6
1883-84	7·2	9·5	8 62	6

10. In respect of loss both in melting and coining, the work of the year in Calcutta was an improvement on that of the previous year. In the Bombay Mint the loss on coining was kept low, owing in some measure to the introduction of the system obtaining in Calcutta of annealing bits; but the increase of the loss in melting is not satisfactory. The Mint Master's conclusion that the increased loss is the result of carelessness on the part of the staff and of petty pilfering is probably correct, and the facts elicited in connection with the robbery of silver from the Mint last May tend to show that more careful supervision of the Melting Department is required.

11. The total revenue and expenditure of each of the Mints from 1879-80 to 1883-84 are shown below :—

	Revenue.		Expenditure.	
	Calcutta.	Bombay.	Calcutta.	Bombay.
	Rs.	Rs.	Rs.	Rs.
1879-80	5,17,277	18,51,834	10,60,646	11,06,806
1880-81	2,32,366	6,41,704	8,61,901	7,74,325
1881-82	2,11,295	3,83,528	8,90,413	6,45,716
1882-83	2,70,213	11,57,658	10,51,988	9,42,708
1883-84	2,23,937	5,57,634	9,75,327	7,46,422
Total ...	14,55,088	45,92,358	48,40,275	42,15,977

The total revenue of both Mints during the last five years has been Rs. 60,47,446, and the total charges Rs. 90,56,252, showing a total loss for this period of Rs. 30,08 806, or an average annual loss of Rs. 6,01,761.

12. The expenditure on account of salaries and establishments in the two Mints was as follows :—

	Calcutta.		Bombay.	
	1882-83.	1883-84.	1882-83	1883-84
	Rs.	Rs.	Rs.	Rs.
Fixed establishment	2,19,700	2,07,581	2,21,041	2,19,186
Extra	67,632	64,960	48,607	22,252
Total ..	2,87,332	2,72,541	2,69,648	2,41,438

The saving (Rs. 14,791) in the Calcutta Mint was the result of the retirement of Major-General Tennant and of the reduction of establishments, both fixed and extra, in the Operative Department on account of the reduced coinage of silver. The expenditure for extra establishment includes Rs. 4,145 in 1883-84, being the cost of establishment employed in the manufacture of cartridge metal which has now ceased.

The decrease in the fixed (*i.e.*, permanent) establishment in the Bombay Mint is due to the furlough for eight months granted to Colonel White from the first week of May. As in the Calcutta Mint, the saving in the extra establishment is the result of the smaller coinage of the year.

13. The expenditure on stores was Rs. 63,594 and Rs. 65,019 in the Calcutta Mint during 1882-83 and 1883-84, and Rs. 87,630 and 63,208 in Bombay.

The decrease in the Mint at Bombay was due to the smaller consumption of stores resulting from the smaller coinage.

14. An addition of Rs. 32,743 was made to the Capital Account of the Calcutta Mint on account of buildings and plant during the year. There was no outlay of this class in the Mint at Bombay.

The total at debit of Capital Account to end of 1883-84 was Rs. 74,41,731 in Calcutta and Rs. 34,24,238 in Bombay. The details are shown below :—

	Calcutta.	Bombay.
	Rs.	Rs.
Land	20,09,200	12,62,200
Plant	22,44,288	5,97,225
Buildings	31,88,243	15,64,813
Total ...	74,41,731	34,24,238

15. The Governor General in Council notes with satisfaction the adoption in the Bombay Mint of an improved method of examining coins resulting in greater expedition, and agrees with Colonel White that credit is due to Mr. English, from whose drawings the apparatus was constructed. The automaton weighing machines are said to have worked well. The electro-dynamic machine, however, got out of order and cannot be repaired in this country. No coins were therefore electro-adjusted during the year.

16. The gain on copper coinage in both Mints for the last three years is shown below:—

	Rs.
1881-82	1,39,707
1882-83	3,50,091
1883-84	5,60,227

ORDERED, that this Resolution be published in the *Gazette of India* and communicated to the Mint Masters, Calcutta and Bombay.

Ordered also, that the Resolution be communicated to the Comptroller and Auditor General, with a request that he will report the net gain on copper coinage annually in time for inclusion in the annual Resolution on the reports of the Mints.

The 11th November 1884.

No. 4449.—Whereas under the terms of the Notification in the Department of Finance and Commerce, No. 3640, dated 13th November 1880, the Municipality of Karachi has paid Rs. 557-8-0 as composition for the stamp duty chargeable on a sum of Rs. 1,11,500 which the said Municipality was authorised to borrow by the issue of debentures bearing dates the 1st July 1884 and 1st July 1885.

Therefore in exercise of the powers conferred by Section 8 of the Indian Stamp Act, 1879, the Governor General in Council has exempted the said debentures from the payment of any stamp duty, with which they might otherwise be chargeable, whether on issue, renewal, or subdivision.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 23rd October, 1884:—

No. 15 OF 1884.

A Bill to amend the Oudh Estates Act, 1869.

WHEREAS it is expedient to amend the Oudh Estates Act, 1869; It is hereby enacted as follows:—

Amendment of definition of "registered" in section 2 of Act I of 1869.

1. Subject to the saving in section 2 of this Act, for the definition of "registered" in section 2 of the said Act, there shall be deemed to have been substituted from the date of the passing of the said Act the following definition, namely:—

"Registered."

"'Registered' means—

"(a) in the case of a will, registered according to the law for the time being in force relating to the registration of assurances, or deposited with a Registrar according to the law for the time being in force relating to the deposit of wills; and

"(b) in the case of any other instrument, registered according to the law for the time being in force relating to the registration of assurances."

Saving of certain wills.

2. Nothing in section 1 shall affect any will—

(a) declared by a judicial decision pronounced before the twenty-third day of October, 1884, to be invalid on the ground that it was not registered in accordance with the provisions of the said Act; or

(b) of which the validity is being questioned on that ground in a suit commenced before the twenty-third day of October, 1884.

STATEMENT OF OBJECTS AND REASONS.

It has recently been held by the Privy Council that a will that was deposited under the provisions of Part IX of Act VIII of 1871 was not "registered" within the meaning of section 13 and the definition in section 2 of the Oudh Estates Act 1869, which declares that "'registered' means registered according to the provisions of the rules relating to the registration of assurances for the time being in force in Oudh."

2. The consequences of this ruling, which affects also section 20 of the Act, where a similar provision occurs, are most important, since the procedure that is now pronounced to be inadequate to satisfy the requirements of the law has been constantly acted on. It is stated that the taluqdárs never suspected that the validity of wills formally deposited in the registration offices under sealed covers could be called in question. Moreover, it scarcely could have been intended that taluqdárs should be required to register their wills open, and it seems obvious that they cannot in the future be required to do so, which they will have to do under the decision of the Privy Council if the law remains unaltered.

3. Under these circumstances, it is considered advisable to amend Act I of 1869 so as to legalize the existing practice. This is done by the present Bill, and as the omission to fulfil the requirements of the law which has taken place in the past would seem to have been unintentional and due to a prevalent and hitherto undisputed misapprehension of its meaning, retrospective effect has been given to the amendment which covers all wills hitherto or at present only deposited and not registered, except wills already declared invalid by judicial decision or being questioned in a suit commenced before the date of the introduction of the Bill.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 23rd October, 1884:—

No. 16 OF 1884.

A Bill to amend Act XXII of 1881.

XXII of 1881.

WHEREAS it is expedient to amend the Excise Act, 1881; It is hereby enacted as follows:—

In the said Act, after section 34, the following section shall be inserted:—

Power to invest police-officers with powers of excise-officers.

"34A. The Local Government may, from time to time, invest any police-officers of or above the grade of head constable, either by name or in virtue of their offices, with the powers conferred on excise-officers by sections 27, 28 and 29 of this Act; and every officer so invested shall, for all purposes connected with the exercise of these powers, be deemed to be an excise-officer within the meaning of this Act."

STATEMENT OF OBJECTS AND REASONS.

SECTION 46 of Act X, 1871, corresponding to section 59 of Act XXI of 1856, enabled Local Governments to confer on certain police-officers powers of searching for and seizing spirituous liquors and intoxicating drugs and arresting persons found in possession of them. These powers have been conferred and exercised up to the present time in the North-Western Provinces and Oudh, and are essential to the efficiency of the excise-administration, as no separate establishments for the prevention of smuggling are maintained in those provinces, and the land-revenue officials have little leisure for excise-duties.

2. The excise law came under revision in 1881 and was re-enacted in a somewhat simpler form by Act XXII of that year.

Section 24 of that Act gives Collectors power to appoint persons by name or by virtue of their office to be officers for the collection of the excise revenue, but as police-officers are not specially mentioned among the persons to be so appointed, and as section 20 of Act V, 1861, precludes the exercise by them of any such authority, it has been held that they cannot be appointed to discharge excise functions, and that the power of so employing them conferred upon Local Governments by Act X, 1871, has been taken away by the Act of 1881.

3. This seems to have escaped notice when Act XXII of 1881 was passed. In the Statement of Objects and Reasons, in the Report of the Select Committee and in the speeches of the Hon'ble Member in charge of the Bill, nothing whatever is said of depriving the Local Governments of the power hitherto enjoyed by them of employing police-officers on excise-duties. Mr. Whitley Stokes, accounting for the omissions in the later Act, stated that they were provided for by other enactments or were fit subjects for executive orders. The omission now brought to light does not fall under either of these categories, and it is impossible to suppose that a power held to be necessary for the excise-administration was taken away from Local Governments by a side wind.

4. The Government of the North-Western Provinces and Oudh urge that the omission should now be rectified, and with this object the present Bill is introduced.

RESOLUTION.

The statement appended to this Resolution shows for each province the number of persons and cattle killed by wild animals and snakes, and the number of such animals and snakes destroyed, with the amount of rewards paid for their destruction during the year 1883 as compared with the previous year.

2. These figures show that the total number of persons killed has risen from 22,125 to 22,905. By far the largest mortality occurred, as in former years, in Bengal and the North-Western Provinces and Oudh, where the number of persons returned as killed was 10,455 and 6,298 respectively. Of the total number of deaths in all provinces, 20,067 were from snake bite. Of the remaining deaths, 985 were caused by tigers, 287 by wolves, 217 by leopards, and 1,139 by "other animals." Under the last head the largest mortality occurred in Bengal, where 420 deaths were caused by "jackals." The correctness of this figure seems to be open to question, and should be verified. In the number of deaths caused by "other animals" in Bengal, some caused by domesticated animals are included. This, as the Local Government has pointed out, ought to have been omitted.

3. The reported loss of cattle by wild animals and snakes amounted to 47,478, or 771 more than in the previous year. The largest loss occurred in Bengal and in the North-Western Provinces and Oudh, where 11,710 and 9,240 head were killed. Madras comes next with 9,099, the Central Provinces with 4,006, and Assam with 3,838, the loss reported from other provinces being comparatively small. Tigers, leopards, and wolves are reported to have killed respectively 16,563, 19,064, and 6,704, while only 1,641 are reported to have been killed by snake bite.

4. A satisfactory increase from 18,591 to 19,890 has taken place in the number of wild animals destroyed, the rewards paid for their destruction having proportionally increased from Rs. 1,26,782 to Rs. 1,52,003.

5. As in previous years, the only provinces which show a large destruction of snakes are Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab. The increase in the number destroyed in the last-named province was from 6,065 to 48,873, and in Bombay from 263,348 to 293,230; but in neither province does there appear to have been any material difference in the number of deaths from snake bite.

The Government of India can add nothing to the general remarks recorded in their Resolution reviewing the corresponding returns of last year. It can only reiterate the earnest hope that Local Governments and Administrations will energetically prosecute whatever practical measures may, under local conditions, seem best fitted to reduce the lamentable loss of life which is yearly caused by wild animals and snakes.

ORDER.—Ordered, that this Resolution be forwarded to Local Governments and Administrations and to the Foreign Department for information, and that it be published in the Supplement to the *Gazette of India*.

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Executive Engineer, Northern Division, Ganges Canal, reports—Late rice was supplied with water during the month. Rainfall at end of month caused demands to cease. Gram sown during the last few days destroyed by rainfall and some kharif crops injured. Rice still very high.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports—There has been no irrigation during the month; the 5,721 acres increased are difference between actual measurement and assumed area by Shudkar.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports—Average rainfall 14·1 inches.

Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports—Chief decrease in sugar and food grains. The decrease on former is due to low supplies of water in April, and on latter to heavy rainfall.

Executive Engineer, Etáwah Division, Lower Ganges Canal, reports—Very heavy rain up to end of month and canal closed throughout. The falling off in irrigation was principally in the inferior crops and was due to the continuous rain.

Executive Engineer, Eastern Jumna Canal, reports—Decrease owing to plentiful and continuous rain in August and September. The falling off has been in cotton, fodder, rice and other food grains, chiefly the latter. There is an increase in sugarcane and indigo. Canal closed from 25th. Very heavy rain on 30th.

Executive Engineer, Rohilkhand Canal, reports—General rain on 1st, 2nd, and 14th; no demand except for Batwa rice in places. Heavy rain set in on 25th and continued until the 3rd and 4th October. All the rivers in very heavy flood and most of the country south of the Tarai submerged. Canal banks much cut about by drainage breaches. Rice has not suffered much except early rice in parts; makka and cotton damaged; gram and linseed which had been sown is spoilt. No serious damage to canals reported except at Kicha weir, where river set on to left bank above weir and broke into canal. The heavy and late rains will cause delay in rabi sowings, and there will be scarcely any demand for canal water. Much sickness prevails since the late rain.

Executive Engineer, Dun Canals, reports—Demand slack during month. Late rain at end of month caused some damage to crops. Rice harvest in progress.

Meerut, Bijnor, Jhánsi, and Hamírpur returns reported blank.

No remarks from the other Divisions.

Note.—The canals being closed, the Traffic Returns of both the Agra and Ganges Canals are blank.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Camp Delhi, the 18th November 1884.

It is hereby notified that His Excellency the Viceroy will arrive at the Sealdah Railway Station at 4-20 P.M. on the 2nd December 1884, instead of at 3-5 P.M., as notified in the *Gazette of India* of the 8th November 1884.

By Command,

WILLIAM BERESFORD, *Captain,*

Military Secretary to the Viceroy.

HOME DEPARTMENT.

NOTIFICATION.—PUBLIC.

Calcutta, the 18th November 1884.

No. 1902.—The Right Honourable Sir Frederick-Temple Hamilton-Temple, Earl of Dufferin, K.P., G.C.B., G.C.M.G., P.C., F.R.S., D.C.L., Viscount and Baron Clandeboye of Clandeboye in the County of Down, in the Peerage of the United Kingdom, Baron Dufferin and Clandeboye of Ballyleidy and Killyleagh, County Down, in the Peerage of Ireland, and a Baronet, is expected to arrive at

Aden on or about December 2nd, and at Bombay on the 9th idem, to assume the office of Viceroy and Governor General of India.

The Resident at Aden will receive Lord Dufferin with all the honours and distinctions which are due to the Viceroy of India.

His Excellency the Governor of Bombay will make arrangements, in communication with the Naval authorities, for the landing and reception of Lord Dufferin at Bombay with all the honours and distinctions which are due to the Viceroy of India.

An Aide-de-Camp of the Viceroy will proceed to Bombay to attend upon Lord Dufferin throughout his journey from Bombay to Calcutta.

One of the principal civil officers of each Government or Administration, will be deputed to meet Lord Dufferin as he enters the limits of such Government or Administration, and will remain in attendance upon His Lordship until he passes beyond those limits.

At the Railway stations at which halts are made for rest and refreshment, Civil and Military officers will be in attendance. There will also be a Guard-of-Honour upon the platform.

Should Lord Dufferin make any stay at Allahabad, His Honour the Lieutenant-Governor of the North-Western Provinces will make all arrangements, in communication with the Military authorities, for His Lordship's reception in a suitable manner.

At stations between Bombay and Howrah, other than those mentioned in the two preceding paragraphs, the attendance of officers is dispensed with.

Proper police precautions will be taken at all the stations along the line at which the train stops.

Upon Lord Dufferin's arrival at the Howrah terminus of the East Indian Railway, His Lordship will be received by the Secretaries to the Government of India and by the Military Secretary and Aides-de-Camp to the Viceroy.

The following officers will also be in attendance upon the Howrah Railway platform:—

The Commissioner of Burdwan.

One of the Secretaries to the Government of Bengal.

The Brigadier-General Commanding the Presidency District, with the District Staff.

The Commissioner of Police and Chairman of the Justices of the Peace for the Town of Calcutta.

The Sheriff of Calcutta.

The Magistrate of Howrah.

A Guard of Honour of Native Infantry will be drawn up at the Howrah terminus.

Lord Dufferin, attended by his personal staff, by the Secretaries to the Government of India, by the Military Secretary and Aides-de-Camp of the Viceroy, will proceed to Government House in the Viceroy's carriages escorted by the Body Guard.

The line of route will be lined throughout by troops under the orders of the Brigadier-General Commanding the Presidency District.

A Royal Salute will be fired from the ramparts of Fort William as the cortége appears upon the Hooghly Bridge.

A Guard of Honour of British Infantry and a Guard of Honour of the Calcutta Volunteer Rifles will be drawn up opposite the grand entrance of Government House.

Lord Dufferin will be received as he alights from the carriage at the foot of the grand staircase by His Honour the Lieutenant-Governor of Bengal attended by his personal staff.

All the Civil and Military officers of Government at the Presidency will be in attendance upon the grand staircase of Government House, Consular Officers and other representatives of Foreign Governments at Calcutta, and all non-official gentlemen, are invited to be present upon the grand staircase.

His Excellency the Viceroy and Governor General, attended by his personal staff and the Members of the Governor General's Council, will receive Lord Dufferin at the top of the grand staircase, and will conduct His Lordship to the Throne-room.

Shortly afterwards, Lord Dufferin will proceed with the Members of the Governor General's Council to the Council Chamber, where His Lordship's Commission from Her Majesty the Queen-Empress will be read by the Home Secretary.

A Royal Salute will then be fired from the ramparts of Fort William in honour of Lord Dufferin upon his assumption of the Office of Viceroy and Governor General of India.

The troops may then be withdrawn.

Full dress will be worn by all officers, Civil and Military, on this occasion, and evening dress by all gentlemen not entitled to wear uniform.

The date and hour of Lord Dufferin's arrival at Howrah will be notified hereafter.

By Order of His Excellency the Viceroy and
Governor General of India in Council,

A. MACKENZIE,
Secretary to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

SUMMARY OF THE WEATHER REPORTS FOR THE MONTH OF OCTOBER 1884.

No. $\frac{143 \text{ Met.}}{27\text{-}12.}$

Extract from the Proceedings of the Government of India Revenue and Agricultural Department, (Meteo.) dated Calcutta, the 21st November 1884.

READ—

Summary of the Weather Reports for October 1884.

The unsettled weather, which characterised September over the greater part of the country, continued, though in a somewhat modified degree, during the early part of October.

The month opened with a heavy downpour of rain over the North-West Himalaya and adjoining parts of the Punjab and North-Western Provinces, due to the small cyclonic vortex which originated in Rohilkand at the close of the previous month. This downpour was apparently heaviest at Naini Tal, where

on the 1st 10·70 inches,
on the 2nd 5·30 do.,
and on the 3rd 3 50 do.

of rain was measured. At this time the seat of lowest pressure lay over Sind, the Punjab, and Rajputana, but subsequently on a rise of pressure in North-Western India it was transferred to Behar and Chutia Nagpur, and there resulted a decided indrought of southerly and easterly winds from the Bay towards Bengal, Behar, and the lower part of the North-Western Provinces. These winds brought rain as far west as Agra and continued until the 4th or 5th. After that date, dry north-westerly and westerly winds were established all over Northern India. About the 6th rain ceased generally for a time, but

from the 24th to the 27th it again fell rather heavily over Bengal and extended to many stations in Upper India. In Bengal and on the Central Indian Plateau, about the 15th, the wind shifted to north-east and continued to blow from between north and east till the end of the month.

In the Peninsula very unsettled weather prevailed. During the first week the winds were chiefly from the westward, and slight local showers fell; but about the 9th the wind shifted to the ordinary winter monsoon direction, and till the close of the month, north-east winds have held over the whole of the Peninsula with much more than the normal steadiness. The following figures show the exceptional character of the wind during this month:—

Wind resultants.

	Allahabad.	Calcutta.	Bombay.	Madras.	Negapatam.
October 1884 .	N 45° W 44%	N 16° E 47%	N 62° E 68%	N 19° E 37%	N 49° W 23%
October Average	N 50° W 16%	N 48° W 11%	N 25° W 33%	N 35° E 10%	S 47° W 86%

Two travelling cyclonic depressions have been recorded—the first in the neighbourhood of Negapatam on the 16th, whence it travelled to Madura on the 17th, and lay off Calicut on the 18th: the second appeared off the coast of the Northern Circars on the morning of the 24th, advanced to Gopalpur on the 25th, and broke up over Lower Bengal or the head of the Bay on the 26th.

The rainfall returns show that, with the exception of Cutch, the Indus Valley, and the stations of Jullunder, Jeypore, Mount Abu, Deesa, and Ahmedabad, rain fell in all parts of the country. In the east of the Punjab, the whole of the North-Western Provinces and Oudh, and in North Behar and Bengal, there was an excess. But on the Central Indian Plateau and eastward in Orissa, Lower Bengal, the Northern Circars, and also in Burma, there was less rain than usual. In Rajputana, the Saugor and Nerbudda Territories, Khandesh, Central India, and as far south as the Deccan, Hyderabad, and the Bellary District, the rainfall, though on the whole in excess, varied very considerably at different stations. On the Conkan and Malabar Coasts it was also irregular, but in the Carnatic there was a general and considerable excess.

The greatest excess was at Naini Tal, where the total rainfall was 18·6 inches more than usual; and the greatest defect at Vizagapatam, where it was 5 inches short of the average.

The mean pressure was above the normal at all stations; most so in North Western India (except at the hill stations where the excess was but slight), and least in the south of the Peninsula. During the first few days there was a general deficiency, but after the first week the barometer rose above the average over the greater part of India, and so continued till the close of the month. In the south of the Peninsula, however, there was a second period of depression between the 17th and 19th, coinciding with the disturbance noticed above.

With the local exceptions of Multan, Silchar, Ratnagiri, Goa, Karwar, Colombo, Rangoon, and Moulmein, the monthly temperature was everywhere below the normal average. In the North-Western Provinces, the western parts of the Central Provinces, Central India, Rajputana, Khandesh, and Hyderabad, the depression continued throughout the month.

Humidity was generally above the average, but in Lower Bengal, Orissa, the eastern parts of the Central Provinces, and on the South Konkan Coast, it was below it.

The following table shows the amount of rainfall according to the districts adopted in last month's report:—

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE FORTNIGHT ENDING THE 19th NOVEMBER 1884.

GENERAL REMARKS.—Heavy rain fell at Madras and Tanjore during the fortnight under report, and the standing crops have been injured to some extent in both districts. In other parts of the Presidency, the rainfall has been beneficial to the crops, and general prospects are now fair. More rain is still wanted in Bellary and Anantapur. In Mysore the crops are generally in good condition and prospects are favourable. In Coorg the prospects of the rice crop are good; coffee-picking has commenced, and the cardamom crop has yielded an outturn above the average. Little or no rain has fallen in the Bombay Presidency during the fortnight, but agricultural prospects are on the whole good everywhere. In Sholapur and Kaladgi more rain would be beneficial to the *rabi* crop. Prospects continue favorable in the Central India and Rajputana States, and in the Berars and the Nizam's territories. No rain has fallen in the North-Western Provinces and Oudh and in the Punjab since the publication of the last reports, but agricultural prospects continue satisfactory. In the Central Provinces prospects are favourable. In Assam the prospects of the crops are generally good. Except in two or three districts where very slight rain occurred, no rain fell in Bengal during the past fortnight. Prospects are generally good, except in a few places where the *amun* paddy is still backward. In Nalhati not more than a six-anna crop is expected.

There is no change to record in agricultural operations. Harvesting of the *kharif* and ploughing and sowing for the *rabi* continue in progress generally throughout the country.

The public health is generally good, and prices are stationary with local fluctuation.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Nov. 12th)		
Bellary	·04	Standing crops need rain; harvest wet and dry crops yield moderate; one death from cholera.
Kurnool	·56	Standing crops good; harvest early cereals yield below half; small-pox in two taluks.

FINANCIAL. INDIA OFFICE;
No. 347. *London, 30th October 1884*

To His Excellency the Most Honourable the Governor General of India in Council.

MY LORD MARQUIS,—

I forward herewith a copy of the report of the Deputy Master of the Royal Mint, dated the 1s

of October 1884, on the pyx coins of the Calcutta and Bombay Mints issued in 1883, from which you will observe that the "Standard weight and fineness of the Coins have been maintained with the usual approximation to accuracy."

I have, &c.,
(Sd.) KIMBERLEY.

Dated Royal Mint, 1st October 1884.
From—ROBERT F. SUFT, Esq.,
To—The Secretary, Treasury.

The examination of the pyx coins of the Indian Mints, transmitted to the Deputy Master of the Mint by direction of the Lords Commissioners of Her Majesty's Treasury on the 2nd August last being completed, I have the honor to forward herewith a report on the weight and fineness of the coins and to return the bullion remaining.

The coins were first weighed singly by the Mint balance and were then handed to the Assayer of the Mint by whom each coin has been separately assayed and reported upon.

The standard weight and fineness of the coins have been maintained with the usual approximation to accuracy.

In accordance with the directions of their Lordships, parting assays have been made of the silver coins of each Presidency in order to ascertain the average proportion of gold contained in them, and the result is shewn in the Report. These assays have been made in the manner detailed in the Report of the 25th October 1869.

Memorandum of the weight and fineness of coins issued from the Indian Mints in the year 1883.

HOME DEPARTMENT.

EXECUTIVE OFFICERS AND ENGINEERS OF HER MAJESTY'S MARINE IN THE JUNIOR GRADES ENTITLED TO THE PERSONAL ATTENDANCE OF A CIVIL SURGEON WHEN THEY REQUIRE TO BE TREATED ON SHORE.

No. $\frac{18}{514-26}$.

Extract from the Proceedings of the Government of India, in the Home Department (Medical),—under date Calcutta, the 26th November 1884.

Read—

Home Department Resolution No. 12—334-51, dated the 16th August 1884.

RESOLUTION.

The Resolution read directs that, with certain exceptions noted in paragraph 2 thereof, all officers of Government, whether gazetted or not, drawing less than R250 a month, will no longer be entitled to the gratuitous medical attendance at their own residences of a Civil Surgeon. The Governor General in Council is further pleased to extend the exception to the case of the Executive Officers and Engineers of Her Majesty's Marine in the junior grades who, though drawing a salary of less than R250 a month, will be entitled to the personal attendance of the Civil Surgeon when they require to be treated on shore.

ORDER.—Ordered, that a copy of this Resolution be forwarded to all Local Governments and Administrations for information;

that a copy be forwarded to the Military (Marine) Department for information; and

that a copy be forwarded to the Surgeon General with the Government of India for information.

Also, that the Resolution be published in the *Gazette of India* for general information.

DEPARTMENT OF FINANCE AND COMMERCE,
(Statistical Branch.)

D. M. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE FORTNIGHT ENDING THE 26th NOVEMBER 1884.

GENERAL REMARKS.—With the exception of British Burmah, Madras, Mysore and Coorg, and two districts in the Punjab, no rain is reported for the past week from any of the reporting stations.

The prospects of the *rabi* are good in Bombay, except in one or two districts where more rain is wanted; in the North-Western Provinces and Oudh, the Punjab, the Central Provinces, and in the Berars and Hyderabad. Sowings have been completed or are approaching completion in most Provinces. The *rabi* is also doing well in Bengal, except in two or three districts where the crops have been damaged by insects.

The *kharif* harvest continues in progress generally throughout the country. In Bengal the *amun* paddy is being cut in many districts, a fair outturn being expected in some. In Assam the condition of the standing crops is generally good. Agricultural prospects are favourable in British Burmah, and reaping has commenced in parts. In Madras general prospects are fair, but more rain is wanted in the districts of Bellary and Anantapore, which suffered most this year.

Harvesting is in progress in several districts, but the outturn is below the average. In Mysore the crops are generally in good condition, and prospects are favourable.

The public health is generally good, but slight cholera, smallpox and fever exist in some Provinces.

Prices remain unchanged, except in Bengal and the North-Western Provinces and Oudh, where they show a tendency to fall, and in the Punjab, where they are fluctuating.

RESOLUTION—*By the Government of India, Department of Finance and Commerce.*

Read—

Letter from the Government of Bombay, No. 2518 of 22nd March 1884, forwarding a letter from Mr. S. A. Kittredge regarding the stamp duties and registration fees payable on debentures issued by Joint Stock Companies, and making certain recommendations thereon.

OBSERVATIONS.—It appears that Joint Stock Companies are now, in some cases, deterred by the expense involved under the provisions of the Stamp and Registration Acts from raising money by the issue of debentures under a deed of mortgage giving to the holders of the debentures a lien on the property of the Company. For the purpose of raising money in this way the Company would ordinarily—

(1) execute a mortgage deed making over their property to trustees for the benefit of the debenture holders,

(2) issue debentures under the terms of the trust deed.

Under the Indian Stamp Act, 1879, the mortgage or trust deed and each of the debentures would be liable separately to stamp duty. The mortgage or trust deed would be an instrument of which registration would be compulsory, and on which a registration fee would be payable. The debentures, containing a reference to real property as security, might also be held to require registration, and they would, as a precautionary measure, ordinarily be registered. Considerable expense is therefore involved in the issue of debentures of the kind described.

RESOLUTION.—With a view to reduce this expense, and to encourage investment by way of loan on the security of the property of Joint Stock Companies, the Governor General in Council has determined to exempt debentures of the kind above described and interest coupons attached thereto from stamp duty, the mortgage or trust deed remaining liable to stamp duty, and has issued a separate Notification for this purpose.

In regard to registration, His Excellency the Governor General in Council is of opinion that it is expedient that the mortgage or trust deed should continue subject to compulsory registration and to the usual registration fee. Regarding the registration of the debentures separate orders will be issued hereafter.

ORDERED, that a copy of this Resolution be forwarded to the Government of Bombay with reference to the letter read in the preamble, and to all other Local Governments and Administrations for information and guidance.

ORDERED also, that this Resolution be published in the *Gazette of India* for general information.

No. 1946.—In exercise of the powers conferred on him by Section 8 of the Indian Stamp Act, 1879, His Excellency the Governor General in Council is pleased to remit the stamp duty payable under that Act on debenture bonds issued by a Joint Stock Company under the terms of a mortgage deed, making over in whole or in part the property of the company to trustees for the benefit of the debenture-holders, and on interest coupons attached to the said debentures.

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 5th December, 1884:—

No. 17 OF 1884.

A Bill to amend the law in force in the Pánch Maháls.

WHEREAS it is expedient that the law in force in the territory comprised in the Pánch Maháls should, on and from the first day of March, 1885, be the same as the law in force in the district of Kaira, in the Bombay Presidency, and that the said territory should, on and from that day, cease to be a scheduled district under the Scheduled Districts Act, 1874, and the Laws Local Extent Act, 1874; It is hereby enacted as follows:—

Short title.

1. This Act may be called the Pánch Maháls Laws Act, 1884.

Laws of Kaira to apply.

2. (*1*) Save and except the enactments specified in the schedule hereto annexed, all enactments which, on the first day of March, 1885, are in force in the district of Kaira and not in the Pánch Maháls shall be deemed to come into force in the Pánch Maháls on that day.

Other laws repealed.

(*2*) All enactments which on that day are in force in the Pánch Maháls and not in the district of Kaira shall be deemed to be repealed on and from that day in the Pánch Maháls.

Pending proceedings.

3. All proceedings commenced before any authority in the Pánch Maháls before the first day of March, 1885, and still pending on that day, shall be disposed of by such authority as the Local Government may direct, and, save as aforesaid, shall be carried on as if this Act had not been passed.

Territory to cease to be a scheduled district.

4. On and from the first day of March, 1885, the Pánch Maháls shall cease to be a scheduled district; and in Part II of the First Schedule to the Scheduled Districts Act, 1874, and in the same Part of the Sixth Schedule to the Laws Local Extent Act, 1874, the words "The Pánch Maháls" shall be repealed.

Partial repeal of Acts XIV and XV of 1874.

THE SCHEDULE.

ENACTMENTS EXCEPTED FROM THE OPERATION OF SECTION 2.

Acts of the Governor General in Council.

Number and year.	Title.	Extent of exception.
VIII of 1870 ...	For the prevention of the murder of female infants.	The whole.
XXI of 1881 ...	To amend the law providing for the relief of Thákurs in the districts of Broach and Kaira.	The whole.

Act of the Governor of Bombay in Council.

Number and year.	Title.	Extent of exception.
V of 1879 ...	To consolidate and amend the law relating to Revenue-officers and the land-revenue in the Presidency of Bombay.	Section 85 and last fifteen words of section 58.

STATEMENT OF OBJECTS AND REASONS.

THE territory called the Pánch Mahâls, lying in the extreme east of Gujarát, in the Bombay Presidency, is a scheduled district under the Scheduled Districts Act, 1874, and the Laws Local Extent Act, 1874, and, though for revenue-purposes part of the Kaira District, it has hitherto, from its backward state and the poverty and ignorance of the people, been treated as a non-regulation district.

The Government of Bombay are, however, of opinion that the Pánch Mahâls ought now to be placed upon a regulation footing, and at their suggestion the present Bill, which has been framed on the model of the Bánkí Laws Act, 1881, has been prepared. It assimilates the law in force in the Pánch Mahâls to that in the Kaira District from the 1st March, 1885, excluding the Female Infanticide Act, 1870, the Broach and Kaira Thákurs' Relief Act, 1881, and the Bombay Land-revenue Code, 1879, section 85 and the last fifteen words of section 58, which the Government of Bombay desire should not be extended to the Pánch Mahâls; it saves pending proceedings; and it declares that, from the above-mentioned date, the Pánch Mahâls shall cease to be a scheduled district, repealing at the same time the reference to those Mahâls which occurs in Part II of the first Schedule to the Scheduled Districts Act, 1874, and in the same Part of the Sixth Schedule to the Laws Local Extent Act, 1874.

The 23rd October, 1884. C. P. ILBERT.

D. FITZPATRICK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REPORT OF SPECIAL CHOLERA COMMISSION.

No. 810, dated Calcutta, the 28th November 1884.

From—Dr. J. M. CUNINGHAM, Sanitary Commissioner with the Government of India,

To—The Secretary to the Government of India, Home Department.

I have the honour to submit, for the information of the Government, a short preliminary report by the English Cholera Commission of the results of their inquiries during their visit to India.

2. Their complete report will be passed through the press when they arrive in England, and submitted to the Under Secretary of State for India.

3. It will be observed that Messrs. Klein and Gibbes' conclusions are altogether subversive of the statements advanced by Professor Koch as to the so-called 'comma bacillus' being the cause of cholera.

Dated Calcutta, the 27th November 1884.

From—DRS. E. KLEIN and HENEAGE GIBBES,

To—The Surgeon General and Sanitary Commissioner to the Government of India.

We have the honour to report that the investigations which we have hitherto carried on in Bombay and Calcutta have yielded the following results :—

1. The statement of Koch that 'comma bacilli' are present only in the intestines of persons suffering from, or dead of, cholera, is not in accordance with the facts, since 'comma bacilli' occur also in other diseases of the intestines, *e. g.*, epidemic diarrhœa, dysentery, and in intestinal catarrh associated with phthisis.

2. The 'comma bacilli' in acute typical cases of cholera are by no means present in such numbers and with such frequency as to justify Koch's statement, that 'the ileum contains almost a pure cultivation of comma bacilli.'

3. The 'comma bacilli' are not present in the tissue of the intestine or elsewhere.

4. The 'comma bacilli' in artificial cultivations, carried out by one of us (E. K.), do not behave in any way differently from other putrefactive organisms.

5. Mucus-flakes of the ileum, taken out soon after death from typical acute cholera, contain numerous mucus-corpuscles, many of them filled with peculiar minute straight bacilli. The same bacilli occur also outside the mucus-corpuscles. They are never missed even when the 'comma bacilli' are.

6. These small bacilli have been cultivated by one of us (E. K.), and they do not behave differently from putrefactive organisms.

These small bacilli are not present in the tissues of the intestine or any other tissue.

7. No bacteria of any kind, and no organisms of known form and character,

8. A good many experiments have been carried out by one of us (E. K.) with the following results :—

(*a*) Mice, rats, cats, and monkeys were fed with rice-water stools, with vomit, with mucus-flakes of the ileum, fresh and after having been kept for 24 to 48 hours. The animals remained normal.

(*b*) Inoculations with recent and old cultivations of 'comma bacilli,' and the small straight bacilli, as well as with mucus-flakes, were made into the sub-cutaneous tissue, into the peritoneal cavity, into the jugular vein, and into the cavity of the small and large intestine of rabbits, cats, and monkeys; but the animals remained perfectly well and normal.

9. The material which we have had hitherto at our disposal has been very good and abundant, and, as far as the microscopic work goes, we do not think we shall require any more material.

We therefore propose concluding our enquiry by the beginning of December, and hope soon after to return to England.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 3rd DECEMBER 1884.

GENERAL REMARKS.—During the past week a fair amount of rain has fallen in Madras, especially in the districts of Chingleput, Tanjore, and Travancore, but none elsewhere in the country.

In Madras harvesting is still in progress, and except in one or two places the standing crops are generally in good condition. In Mysore the crops are good and prospects fair, and in Coorg a good rice crop is expected.

In the Central India and Rajputana States general prospects continue good. In the Berars and Hyderabad cotton is being picked, and the prospects of the *kharif* and *rabi* are favourable.

In Bombay the *kharif* harvest is approaching completion and the *rabi* crops are doing well, except in parts of some districts where they are withering for want of moisture.

In the Punjab and North-Western Provinces and Oudh *rabi* sowings have been nearly finished and are germinating well. The *kharif* harvest continues in progress and agricultural prospects are very favourable.

Rabi sowings continue in the Central Provinces and, where completed, plants are coming up well.

In Bengal the *rabi* crops are generally doing very well; paddy is being harvested in many districts, and cotton is being gathered in the Chittagong Hill Tracts and Hill Tipperah.

In British Burmah the prospects of the rice crop are very favourable.

Cholera and fever prevail in many districts in Bengal; and there has been much mortality from the former disease in Chingleput, Tanjore, and Madura in the Madras Presidency; elsewhere in the country the public health is for the most part good.

Prices show a tendency to fall in Bengal, the North-Western Provinces and Oudh, and in the Punjab; elsewhere they are generally stationary.

PÁNCH MAHÁLS LAWS BILL, 1884.

The Hon'ble MR. ILBERT introduced the Bill to amend the law in force in the Pánch Maháls, and moved that it be sent to the Government of Bombay for opinion.

The Motion was put and agreed to.

A

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Bombay Government Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

TARIFF ACT, 1882, AMENDMENT BILL.

The Hon'ble SIR A. COLVIN moved for leave to introduce a Bill to repeal part of section 6 of the Indian Tariff Act, 1882. He said:—

"The Government of Madras recently submitted a draft Bill to consolidate and amend the ábkárí law of the Presidency of Madras for sanction to its introduction in the local Legislative Council, and, on examination of its provisions, it was found that two clauses of one of its sections, imposing a duty on liquor, were, as applied to spirit, *ultra vires* of the local legislature, as the mode of fixing the excise-duty on spirit is determined by section 6 of the Indian Tariff Act, 1882. It was also feared that the penultimate clause of the latter section, by keeping in force under the authority of the Governor General's Legislative Council an unexplored mass of law existing on the 10th March, 1882, might render other provisions of that Bill *ultra vires.*

"This in itself would make it necessary that legislation should be resorted to in the Council of the Governor General, in order to prevent the Madras Bill from being declared invalid; and as, moreover, section 6 of the Tariff Act must seriously hamper any local legislature contemplating legislation like that proposed by the Madras Government, it is proposed to repeal that section, leaving it to the Local Governments to deal with the mode of fixing the duties of excise on spirit, under the other enactments locally in force, subject, so far as any discretion is allowed to them by those enactments, to the general executive control of the Government of India.

"The present Bill has accordingly been prepared. It repeals section 6 of the Tariff Act, except the last clause amending section 1 of Act XVI of 1863, which Act is still in force."

The Motion was put and agreed to.

CARRIAGE OF PASSENGERS BY SEA BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend Act II of 1860, relating to the carriage of passengers by sea. He said:—

"Act II of 1860 contains provisions for the relief and maintenance of distressed and shipwrecked emigrant-passengers, and for forwarding them to their destination when left without their consent at places other than that to which they are bound. The Act was passed under the special authority of an Act of Parliament called 'The Passengers' Act, 1855,' and it required that authority, because it operates in parts of the world beyond the limits of British India. The Passengers' Act, 1855, empowered the Indian legislature to declare that Act or any part of it applicable to the carriage of passenger on any voyage from any ports or places within British India, to be specified in the Act, to any ports or places in any parts of the world whatsoever, to be also specified in the Act. The Council will observe that the terminal ports of the voyage must be specified in the Act, and that no addition can be made to their number without fresh legislation. The Act of 1860 applied the Passengers' Act, 1855, to certain voyages within specified ports, and it naturally named as ports of destination those places to which at that time emigration took place from British India. But since 1860 the number of places to which emigration takes place from British India has largely increased, and the consequence is that there are a number of emigrant-voyages to which the provisions of that Act are not applicable. That is one defect of the Act. Another defect is that the Act speaks of a passenger finding himself, without any neglect or fault of his own, within some colonial or foreign port or place other than that at which he may have contracted to land. But the Indian emigrant does not as a rule contract with the owner or charterer or master of a vessel to be carried to any particular place. In all cases falling

under the present emigration law, what happens is that the contract is made by the recruiter with the emigration agent for the colony importing labour. Therefore, strictly speaking, the Indian emigrant cannot be brought under the provisions of the Act. Both these defects were brought to light in a case which recently occurred, and the object of the Bill is to remove them. The Act which it is proposed to amend is a short one, and it will probably be found the most convenient course to repeal the Act and to re-enact it with the necessary modifications."

The Motion was put and agreed to.

TRANSFER OF PROPERTY ACT, 1882, AMENDMENT BILL.

The Hon'ble MR. ILBERT also moved that the Hon'ble Peári Mohan Mukerji be added to the Select Committee on the Bill to amend the Transfer of Property Act, 1882.

The Motion was put and agreed to.

KHOJÁ SUCCESSION BILL.

The Hon'ble MR. ILBERT also moved that the Hon'ble Rao Saheb Vishvanath Narayan Mandlik be added to the Select Committee on the Bill to amend and define the law of Testamentary and Intestate Succession to Khojás.

The Motion was put and agreed to.

At the conclusion of the business before the Legislative Council His Excellency THE PRESIDENT made the following remarks:—

"Before this Council adjourns to this day fortnight, this being the last meeting of the Council during my tenure of office as Viceroy and Governor General of India, I am anxious to avail myself of the opportunity to express my very sincere thanks to the members of this Legislative Council, both past and present, for the very valuable assistance which they have at all times given to the Government of India in connection with the Bills which have been brought before the Council. I very fully and deeply recognise the value of their services in that respect, and I also beg to tender to them my personal acknowledgments for the aid which I have ever received from them in the consideration and discussion of the questions which have engaged the attention of this Legislative Council.

"I may mention that, in accordance with the usual practice, members of the Legislative Council will be permitted to be present when the new Viceroy takes his seat. Lord Dufferin arrives here on Saturday afternoon, the 13th instant,—the arrangements for his reception will be duly notified in the Gazette,—and the members of this Council who may be present to receive him will follow him into this room, where he will take his seat."

The Council adjourned to Friday, the 19th December, 1884.

FORT WILLIAM;
The 9th December, 1884.

SUMMARY OF THE WEATHER REPORTS FOR THE SIX MONTHS—MAY TO OCTOBER 1884.

No. 155 Met., dated Calcutta, the 5th December 1884.

RESOLUTION—By the Government of India, Revenue and Agricultural Department.

Read the following:—

Summary of the Weather Reports for the six months—May to October 1884.

The chief meteorological feature of the six months under review has been the deficiency of the rainfall in parts of the Peninsula and parts of Northern Bengal.

The temperature conditions which existed during April, and which were noticed in the summary for that month, were prolonged into May. These were,

unusual heat over North-Western India, from Multan and Jacobabad eastward to Allahabad, and about the average or a somewhat deficient temperature elsewhere. Although the average temperature was high, the maxima were in no respect unusual, the highest readings recorded being 119° at Jacobabad, 118° at Allahabad, and 117° at Delhi.

With few exceptions, the rainfall of the month was deficient, and in most parts of Central, North-Western, and Western India the whole amount was insignificant. A cyclone, noticed in the May summary, had little more than a local influence on the weather and occasioned no excessive rain except on the Arakan coast.

In June, the south-west monsoon rains set in, but with less than their usual steadiness. The date of their arrival was considerably delayed, and during the remainder of the month they were sporadic and not general. During the first fifteen days the percentage of atmospheric humidity was much below the normal, and except in Eastern India the amount of rainfall was insignificant. Between the 12th and 16th a slight burst of rain occurred along the west coast, and on the 19th rain became fairly general throughout the country. But it was short-lived, and with the exception of Lower Bengal and the Central Provinces, the amount at the close of the month showed a decided deficiency—most marked in Assam and along the west coast. The temperature changes coincided with the variations in the amount and extent of rainfall. In the earlier portion of the month, the day temperatures were high, but fell with the setting in of the rains, and rose again as the weather again became finer and rain less general. The highest reading of the thermometer, 122° at Jacobabad, was 3° in excess of the maximum in May.

In July, the weather was of about the normal monsoon character, except as to the amount of rain, which was generally somewhat deficient. Two cyclonic storms of the type usually developed during the rains passed over the country. Both originated over the head of the Bay of Bengal, the first about the 8th or 9th, the second on the 15th. The former passed right across the country in a west or west-north-west direction, reaching Hyderabad (Sind) on the 14th; the latter only travelled as far as Seoni, where it broke up on the 18th. Up to the 18th or 20th of July the weather bore a close resemblance to that prevailing in the latter part of June, *i. e.*, the rainfall was intermittent, more particularly in Sind, Gujarat, and the central plateau of the Peninsula; but in the latter half of the month rain was general and abundant, and at some stations exceptionally heavy. At Umballa, 14 inches fell on the 30th. At Raipur 25, and at Jubbulpore 18 inches more than the average was measured during the month.

The weather in August was variable. No travelling storms, affecting simultaneously large tracts of country, appeared during the month, and the changes of weather depended more or less on slight local disturbances, the influence of which was restricted to the stations in their immediate neighbourhood. Roughly speaking, the Punjab, Rajputana, the Konkan coast, the whole of the Peninsula to the east of the Western Ghauts, Behar, Bengal, and Burma had less, and the North-Western Provinces and the Malabar Coast more, than the normal amount of rain; while Sind, Gujarat, and the central parts of the country showed large local irregularities. On the 28th and 29th in Western India, and on the 7th, 10th, and 12th in the North-West Himalaya, the amounts of rain were exceptionally large.

Unlike August, the weather of September during almost the whole of the month and over by far the greater part of Northern and Central India was continuously under the influence of cyclonic conditions, and over the whole of that region the rainfall was much above the average. The first important storm was formed over the head of the Bay on the 5th and disappeared over Cutch on the 9th. The second was formed over the head of the Bay on the 18th and broke up near Agra on the 27th. Besides these principal vortices, however, several smaller disturbances appear to have been formed, the chief being that over Northern Rajputana on the 1st and 2nd and that in Rohilkhand on the 29th and 30th. Assam, North Bengal, and Behar were quite beyond the sphere of their influence, and as a consequence, the rainfall of those provinces was very scanty. In the Peninsula, the west coast had an excess of rain, and the central plateau, the Carnatic and Mysore a deficiency. The temperature varied with the distribution of rainfall, being slightly above the average at several stations in

North Bengal, Behar, and the Peninsula, where the rainfall had been slight and the weather fine, and below it elsewhere.

October opened with very unsettled weather. The Rohilkhand disturbance, noticed above, was causing a heavy downpour of rain on the North-West Himalaya, and the adjoining parts of the Punjab and North-Western Provinces; south-easterly and easterly winds were bringing up rain from the Bay to Bengal, Behar, and the lower part of the North-Western Provinces, and local showers were falling over a large part of the Peninsula. However, about the 9th in the Peninsula and about the 15th in Bengal and the Central Indian plateau, the wind shifted to north-east, and on the whole this direction was maintained through the remainder of the month with exceptional steadiness. Except for a few days between the 24th and 27th this change of wind was accompanied by settled weather in Bengal and Central India, but in the Carnatic the weather became very unsettled, and the rain was constant and heavy. Two cyclonic storms were recorded, the first passing across the south of the Peninsula between the 16th and 18th, the second travelling from the coast of the Northern Circars to Western Bengal between the 24th and 26th. Over the greater part of Northern India with Khandish, Saugor and Nerbudda, and the whole of the Peninsula, the rainfall was in excess, but elsewhere it was generally deficient. The temperature with a few local exceptions was low.

On the average of the whole season, the monsoon rains were fairly good, except in parts of the Provinces of Bengal and Assam, and parts of the Peninsula, and in some regions most abundant. Even in Behar, North Bengal, and the Karnool and Bellary districts, where the seasonal total was much below the average, the scarcity which was at one time threatened has to a great extent been relieved by the rains which have subsequently fallen. As regards the two monsoon currents it will be noticed that while the south-west or summer monsoon was not only delayed at its commencement, but for a considerable period subsequent to its commencement was very feeble in character, the north-east or winter monsoon on the contrary broke very early on the Carnatic coast and brought more than the average amount of rain.

NOTE ON THE FORECAST OF THE MONSOON RAINS, DATED 7th JUNE 1884, AND THE RESULTS.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department, No. (Meteorology), dated Calcutta, the December 1884.

RESOLUTION.—Read a Note on the Forecast of the monsoon rains, dated 7th June 1884, and the results, by the Meteorological Reporter to the Government of India.

Note on the forecast of the monsoon rains, dated 7th June 1884, and the results.

In the supplementary report on the Himalayan Snowfall, dated 7th June 1884, I attempted to forecast the prospects of the past rainy season in the following terms: "I look for a somewhat retarded or a weak and interrupted monsoon in the earlier months, in part or parts of North-Western India, extending possibly but by no means necessarily to the northern portion of the Bombay Presidency and Rajputana. This is the area that experience has shown to be most subject to the anomalous prevalence of dry westerly winds in the monsoon, as it is that of their normal prevalence in the spring. But it is not likely that the whole of this area will be simultaneously affected, and it is equally unlikely, that the conditions now existing will operate through the whole of the monsoon. In many respects the present season resembles the first part of 1876."

It now becomes my duty to compare this forecast with the actual facts.

In the summary of the weather reports for June it is stated: "On the 19th (June) rain became pretty general throughout the country, the only exceptions being portions of Bundelkhand and the North-Western Provinces, Sind, and Central India * * *. On the 22nd, however, the rainfall on the west coast was checked and the break spread gradually from the west coast to a very large part of India. Towards the close of the month precipitation was slight in most places, and had entirely ceased in Gujarat, Central India, Rajputana, and on the plains of the Punjab and North-Western Provinces. Rain continued, however, in the Central Provinces and Lower Bengal, and whereas a decided deficiency was shown by most places, the rainfall of these two provinces was slightly in excess of the average."

The interruption (or retardation) of the rains indicated in this paragraph lasted in the Punjab till the 18th July. Its further history is thus noticed in the summary for that month: "The rainfall reports shew that in the earlier portion of the month, the area over which the rains were fully established was somewhat restricted. Over the greater part of the plains of the Punjab, as well as in Rajputana, Sind, and Gujarat, rain of any consequence was almost entirely wanting during the first fortnight; as was also the case in some parts of the Carnatic, in Madura, Mysore, the Ceded districts of the Madras Presidency, and the Deccan. By the 16th, however, a change set in. Rain bearing winds spread suddenly over Gujarat and subsequently extended to Rajputana and the Punjab. From the 20th to the end of the month, the rains were general and abundant, with the exception of the Madras Presidency."

In the summary for August it is stated: "The rainfall returns display considerable variations in the amount of precipitation. In the Punjab, with the exception of Murree, Rawalpindi, Simla, and Delhi, there has been more or less deficiency on the average, while over nearly the whole of the North-Western Provinces, on the contrary, there has been excessive rain. At Allahabad, how-

ever, a region of deficient rainfall commences, and from that station eastwards in Behar, Bengal, and as far as Burma, the present month has been one of general deficiency * * *. Rajputana, like the Punjab, has had a somewhat scanty rainfall, while Sind and Gujarat, though deficient on the mean of all stations, shew irregularities similar in character to those of the more central parts of the country. On the west coast from Ratnagiri southwards, as well as at the inland stations of Belgaum, Mercara, Madura, Salem, and Wellington, the rainfall has been above the average; but both on the coast north of Ratnagiri, and at almost every peninsular station to the east of the ghâts, the amount of rain has been below the average of the month."

In September, the rainfall was abundant in Northern India, except in Behar, Northern Bengal, and Assam, but in the peninsular it was still deficient in the Deccan, Mysore, and the Carnatic.

Hence the predicted retardation or interruption of the rains of the early part of the monsoon in North-Western India was fully justified by the event. After a general burst in the latter part of June the rains of all Western and North-Western India were entirely suspended for three weeks or more, and even up to August they were somewhat defective in the Punjab. But the conditions then existing did not operate through the whole of the monsoon, and the latter months brought abundant rain.

It was observed in the forecast, that the early part of 1884 in many respects resembled the first part of 1876. The circumstances here referred to were that the heavy winter snowfall and the late spring rain and snow were restricted to Kashmir, Chamba, and the Hill States north of the Sutlej, and not as in the previous year to the outer ranges. In 1876, although the rainfall was deficient in the North-Western Provinces, it was in the Deccan, Mysore, the Ceded districts and the Carnatic that the drought was most severe and lasting; and this year also, it is these same parts of the peninsula in which the rainfall has been most deficient up to nearly the end of the monsoon. This is probably more than a mere coincidence; and it is quite possible to suggest reasons why the peninsula should be more affected when there is an unusual amount of snow in Kashmir and the ranges around the Upper Indus, than when it is restricted to the outer Himalaya. But one condition was present in 1876 which was absent in the present year. This is an atmospheric pressure considerably in excess of the average over the whole of the Indian region and a large part of Asia, which has been shown to be due to the condition of the higher strata of the atmosphere. The importance and significance of this feature of the famine years has been pointed out in a paper recently published in the Proceedings of the Royal Society. In its absence, the effect of the Himalayan snows, though marked enough, for a time, would appear to be not lasting.

Nothing was said in the forecast respecting the deficiency of the Bengal rainfall, nor, at present, are the conditions that brought about that deficiency at all well understood.

DEPARTMENT OF FINANCE AND COMMERCE,
(*Statistical Branch.*)

D. M. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 10th DECEMBER 1884.

GENERAL REMARKS.—No rain has fallen in the country during the week under report except in a few districts of the Madras Presidency.

In the Madras Presidency the condition of the standing crops is generally good except in Bellary, where more rain is wanted. Harvesting continues in several districts, but the outturn is generally below the average. In Mysore and Coorg agricultural prospects are fairly good. Coffee picking has commenced in Coorg, but the berries are ripening slowly.

In the Central India and Rajputana States, the *rabi* crops are in good condition, and agricultural prospects are on the whole very promising. In the Berars and Hyderabad the *rabi* is thriving. The *kharif* is being reaped and cotton picking continues in the Berars.

In the Bombay Presidency the *kharif* harvest is nearly over; the *rabi* sowings are still in progress in many districts; the condition of the standing crops is generally good, but in parts they are suffering from drought.

Rabi sowings have been completed in the Punjab and in the North-Western Provinces and Oudh, and prospects are very favourable. In the districts of Jullundur and Peshawar more rain is wanted for the crops. In the Central Provinces the *rabi* sowings are approaching completion, and the *kharif* is being harvested. Prospects are favourable.

In Bengal *rabi* prospects are good everywhere except in Backergunge, and in parts of the Moorshedabad district where some damage is being caused by insects. The *amun* harvest is in progress, and in some districts a fair outturn is expected.

In Assam the reaping of the *sali* crop has begun and prospects are generally good. In British Burmah the rice crop is being reaped in some districts and prospects are very good.

The public health is generally good; the mortality from cholera in Coimbatore, Tanjore and Madura continues high.

Prices are on the whole stationary except in Bengal and the North-Western Provinces and Oudh, where they show a tendency to fall.

SCHEDULE.

47 VICT. CHAPTER 8.

An Act to provide, during twelve months, for the Discipline and Regulation of the Army. [28th April, 1884.]

WHEREAS the raising or keeping a standing army within the United Kingdom of Great Britain and Ireland in time of peace, unless it be with the consent of Parliament, is against law :

And whereas it is adjudged necessary by Her Majesty and this present Parliament, that a body of forces should be continued for the safety of the United Kingdom and the defence of the possessions of Her Majesty's Crown, and that the whole number of such forces should consist of one hundred and forty thousand three hundred and fourteen men, including those to be employed at the depôts in the United Kingdom of Great Britain and Ireland for the training of recruits for service at home and abroad, but exclusive of the numbers actually serving within Her Majesty's Indian possessions :

And whereas it is also judged necessary for the safety of the United Kingdom, and the defence of the possessions of this realm, that a body of Royal Marine forces should be employed in Her Majesty's fleet and naval service, under the direction of the Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral aforesaid :

And whereas the said marine forces may frequently be quartered or be on shore, or sent to do duty or be on board transport ships or vessels, merchant ships or vessels, or other ships or vessels, or they may be under other circumstances in which they will not be subject to the laws relating to the government of Her Majesty's forces by sea :

And whereas no man can be forejudged of life or limb, or subjected in time of peace to any kind of punishment within this realm by martial law, or in any other manner than by the judgment of his peers and according to the known and established laws of this realm ; yet nevertheless it being requisite, for the retaining all the before-mentioned forces, and other persons subject to military law, in their duty, that an exact discipline be observed, and that persons belonging to the said forces who mutiny or stir up sedition, or desert Her Majesty's service, or are guilty of crimes and offences to the prejudice of good order and military discipline, be brought to a more exemplary and speedy punishment than the usual forms of the law will allow :

And whereas the Army Act, 1881, will expire— (44 & 45 Vict. c. 58.)

(*a*) In the United Kingdom, the Channel Islands and the Isle of Man, on the thirtieth day of April one thousand eight hundred and eighty-four; and

(*b*) Elsewhere in Europe, inclusive of Malta, also in the West Indies and America, on the thirty-first day of July one thousand eight hundred and eighty-four ; and

(*c*) Elsewhere, whether within or without Her Majesty's dominions, on the thirty-first day of December one thousand eight hundred and eighty-four :

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons in this present Parliament assembled, and by the authority of the same, as follows :

Short title.

1. This Act may be cited as the Army (Annual) Act, 1884.

Army Act (44 & 45 Vict. c. 58) to be in force for specified times.

2.—(1.) The Army Act, 1881, shall be and remain in force during the periods hereinafter mentioned, and no longer, unless otherwise provided by Parliament ; that is to say,

(*a*) Within the United Kingdom, the Channel Islands and the Isle of Man, from the thirtieth day of April one thousand eight hundred and eighty-four to the thirtieth day of April one thousand eight hundred and eighty-five, both inclusive ; and

(*b*) Elsewhere in Europe, inclusive of Malta, also in the West Indies and America, from the 31st day of July one thousand eight hundred and eighty-four to the thirty-first day of July one thousand eight hundred and eighty-five, both inclusive ; and

(*c*) Elsewhere, whether within or without Her Majesty's dominions, from the thirty-first day of December one thousand eight hundred and eighty-four to the thirty-first day of December one thousand eight hundred and eighty-five, both inclusive ;

and the day from which the Army Act, 1881, is continued in any place by this Act is in relation to that place referred to in this Act as the commencement of this Act.

(2.) The Army Act, 1881, while in force shall apply to persons subject to military law, whether within or without Her Majesty's dominions. (44 & 45 c. 58.)

(3.) A person subject to military law shall not be exempted from the provisions of the Army Act, 1881, by reason only that the number of the forces for the time being in the service of Her Majesty,

exclusive of the marine forces, is either greater or less than the number herein before mentioned.

Prices in respect of billeting.

3. There shall be paid to the keeper of a victualling house for the accommodation provided by him in pursuance of the Army Act, 1881, the prices specified in the Schedule to this Act.

Amendments of Army Act, 1881.

Amendment of s. 32 of 44 & 45 Vict. c. 58.

4. In section thirty-two, sub-section one, of the Army Act, 1881, the words "penal servitude" shall be omitted, and the word "imprisonment" shall be substituted.

Unauthorised punishments.

5. Whereas questions have arisen as to the punishments which may be inflicted on persons subject to military law under the Army Act, 1881, under or by virtue of powers derived from foreign potentates or rulers, and whereas it is expedient to determine such questions: Be it therefore enacted as follows:

There shall be added to section forty-four of the Army Act, 1881, at the end of the section, the following enactment:

No officer or non-commissioned officer shall, under or by virtue of any power or authority derived from any foreign potentate or ruler, inflict, or cause to be inflicted, on any person subject to military law under this Act, for or in respect of any offence against such law, any punishment not authorised by this Act.

The above enactment shall be numbered as sub-section (13).

Amendment of s. 154 of 44 & 45 Vict. c. 58 as to apprehension of deserters

6. Whereas by section one hundred and fifty-four of the Army Act, 1881, any constable is authorised to apprehend a person upon reasonable suspicion that he is a deserter, and it is expedient to authorise a justice to grant a warrant for such apprehension: Be it therefore enacted as follows:

There shall be added to section one hundred and fifty-four of the Army Act, 1881, after the first sub-section, the following enactment:

(2.) A justice of the peace, magistrate or other person having authority to issue a warrant for the apprehension of a person charged with crime, may, if satisfied by evidence on oath that a deserter is or is reasonably suspected to be within his jurisdiction, issue a warrant authorising such deserter to be apprehended and brought forthwith before a court of summary jurisdiction.

The above enactment shall be numbered as sub-section (2), and the numbers of the subsequent sub-sections in the said section one hundred and fifty-four shall be altered accordingly.

Amendment of s. 179 (12) of 44 & 45 Vict. c. 58 as to the Royal Marines.

7. Whereas the twelfth sub-section of section one hundred and seventy-nine of the Army Act, 1881, is as follows:

"Nothing in the provisions of this Act relating to the term of enlistment, to the conditions of service, to appointment or transfer, to transfer to the reserve, to the re-engagement or prolongation of service, or to forfeiture of service of a soldier of the regular forces, or to the rules for reckoning service for discharge or transfer to the reserve, shall apply to the Royal Marines:"

And whereas it is expedient to provide for the transfer of a man of the Royal Marines with his consent to another portion of Her Majesty's regular forces: Be it therefore enacted as follows:

There shall be added to section one hundred and seventy-nine of the Army Act, 1881, at the end of the twelfth sub-section, the following enactment:

Save that if regulations made by a Secretary of State and the Admiralty provide for the transfer of men of the Royal Marines to any other part of Her Majesty's regular forces, a man of the Royal Marines may, with his consent, be so transferred in accordance with the said regulations, and, subject to those regulations, shall become a soldier of the said part of Her Majesty's regular forces in like manner, so nearly as circumstances admit, as if he had been enlisted in pursuance of this Act.

Printing of amendments.

8. In all copies of the Army Act, 1881, which may be printed after the commencement of this Act, the words by this Act directed to be added shall be added thereto and printed therein.

Letter from the Chief Commissioner, British Burma, No. 222-7M.S., dated 9th June 1884, and enclosure.

Letter from the Chief Commissioner, British Burma, No. 604-7M.S., dated 21st July 1884, and enclosures.

Letter to the Chief Commissioner, British Burma, No. 3607, dated 22nd September 1884.

RESOLUTION.—By the Notification of 20th January 1882 read in the preamble, voyages made by steamers between ports on the Coromandel coast and those on the east coast of the Bay of Bengal were declared "short" voyages under the Native Passenger Ships Act, 1876. The order was issued on representations received from the parties interested that steamers never occupied more than 120 hours in the voyage across the Bay. The Notification of 26th May 1882, issued under the same Act, declared the period from 1st May to 31st August to be the season of "foul weather" on the coast of British Burma. During the foul seasons of 1882 and 1883 a considerable proportion of the steamers plying from ports in British Burma to those on the Coromandel coast failed to make the voyage across the Bay within 120 hours. In each case the delay was attributed to tempestuous weather, and as this is the normal weather of that time of the year, the concession of plying on short voyage certificates during the foul season was withdrawn from these steamers, and a Notification issued on the 9th May 1884 declaring voyages during that season from Moulmein or Rangoon, or ports north of Rangoon to Negapatam, or ports north of Negapatam on the Coromandel Coast, to be "long" voyages under the Act.

2. The Agents of the British India Steam Navigation Company have now represented that this ruling operates with undue severity upon those of their steamers sailing between the Burman and Coromandel coasts, which have vacant space between decks available for the reception of deck-passengers in bad weather, and they state that unless the steamers employed in the native passenger traffic from the Burman to the Madras coast are allowed to carry the number of passengers permissible under a "short voyage" certificate, they must either withdraw from this traffic or the rates of passage money must be raised to a level which native deck-passengers could never afford to pay. This representation has received some support from the local authorities in British Burma, the Chief Commissioner deprecating a change which might have the effect of materially raising the fares charged for the passage of coolies returning from Burma to Madras at the end of the rice season.

3. The Governor General in Council is not satisfied that there is any substantial prospect that the fares will in fact be raised by the owners of these steamers to a level which would be felt to be oppressive, and on the other hand there is abundant evidence of the hardship, discomfort, and danger to life and property which were involved in the carriage of deck-passengers in the large numbers permitted by a "short voyage" certificate across the Bay of Bengal during the monsoon months.

4. The hardship and danger may, however, be so materially reduced as practically to disappear if a steamer is permitted to carry a larger number of passengers than is permissible under the law when the steamer has a "long voyage" certificate, provided it is understood that no cargo is carried between decks, and that that portion of the vessel is kept entirely free and unencumbered and available for the shelter of passengers in bad weather.

5. With this condition it will be possible to modify the present orders in such a way as to give relief to the owners of the steamers carrying coolies without at the same time reverting to the state of things which followed on the working of the orders of 20th January 1882.

6. Accordingly, the Governor General in Council is pleased to notify, under the powers vested in him by Section 49 of the Native Passenger Ships Act, 1876, that in the case of steamers making the voyages specified in the Notification of this Department, No. 854, dated the 9th May 1884, the space prescribed by the second clause of Section 22 of the Act shall be reduced from nine to five superficial feet for every passenger, the cubic space being proportionately reduced. Provided that such steamers shall at the same time have their upper decks provided with bulwarks, awnings, and other protection against the weather as prescribed in the last clause of Section 19 of the Act, and that the upper deck and between decks shall be wholly available for the reception of passengers.

7. This order may be acted upon from the date of its publication in the *Gazette of India*. Its operation should be carefully watched by the authorities at the Ports of Burma and of Madras, and the Governor General in Council desires that a report of the results may, if possible, be furnished by the end of October 1885.

ORDERED, that a copy of the foregoing Resolution be forwarded to the Government of Madras and to the Chief Commissioner of British Burma for information and guidance.

Also, that the Resolution be published in the *Gazette of India*.

No. 2124.—The following Order in Council, exempting from re-measurement in Her Majesty's dominions, Belgian vessels the tonnage of which is denoted in the certificates of Belgian nationality or registry issued after the 1st January 1884, is published for general information:—

AT THE COURT OF BALMORAL.

The 17th day of October 1884.

PRESENT,

THE QUEEN'S MOST EXCELLENT MAJESTY IN COUNCIL.

Whereas by "The Merchant Shipping Act Amendment Act, 1862," it is enacted that, whenever it is made to appear to Her Majesty that the rules concerning the measurement of tonnage of Merchant Ships for the time being in force under the principal Act have been adopted by the Government of any Foreign Country, and are in force in that Country, it shall be lawful for Her Majesty, by Order in Council, to direct that the ships of such Foreign Country shall be deemed to be of the tonnage denoted in their certificates of registry, or other national papers; and thereupon it shall no longer be necessary for such ships to be re-measured in any port or place in Her Majesty's Dominions, but such ships shall be deemed to be of the tonnage denoted in their Certificates of Registry, or other papers, in the same manner, to the same extent, and for the same purpose, in, to and for which the tonnage denoted in the Certificates of Registry of British ships is to be deemed the tonnage of such ships:

And whereas it has been made to appear to Her Majesty that the rules concerning the measurement of tonnage of Merchant Ships now in force under "The Merchant Shipping Act, 1854," have been adopted by the Government of His Majesty the King of the Belgians, with the exception of a slight difference in the mode of estimating the allowance for engine-room, and such rules are now in force in that Country, having come into operation on the 1st day of January 1884:

HER MAJESTY is hereby pleased, by and with the advice of Her Privy Council, to direct as follows:—

1. As regards sailing ships, that merchant sailing ships belonging to Belgium, the measurement whereof on or after the said 1st day of January 1884, shall have been ascertained and denoted in the Certificates of Registry, or other national papers of such sailing ships, testified by the dates thereof, shall be deemed to be of the tonnage denoted in such Certificates of Registry, or other national papers, in the same manner, and to the same extent, and for the same purpose, in to and for which the tonnage denoted in the Certificates of Registry of British sailing ships is deemed to be the tonnage of such ships.
2. As regards steam ships, that merchant ships belonging to Belgium which are propelled by steam or any other power requiring engine-room, the measurement whereof on or after the said 1st day of January, 1884, shall have been ascertained and denoted in the Certificates of Registry, or other national papers of such steam ships, testified by the dates thereof, shall be deemed to be of the tonnage denoted in such Certificates of Registry, or other national papers, in the same manner, and to the same extent, and for the same purpose, in to and for which the tonnage denoted in the Certificates of Registry of British ships is deemed to be the tonnage of such ship, provided, nevertheless, that, if the owner or master of any such steam-ship desires the deduction for engine-room in such ship to be estimated under the rules for engine-room measurement and deduction applicable to British ships, instead of under the Belgian rules, the engine-room shall be measured, and the deductions calculated, according to the British Rules.

Read also—

Public Works Despatch from the Secretary of State, No. 61, dated 23rd October 1884.

RESOLUTION.—The Secretary of State has approved of a proposal, put forward by the Government of India, for improving the emoluments of Sub-Engineers, 1st grade, and Accountants, 1st grade, of long and meritorious service; and the Governor General in Council is pleased to issue the following rules :—

I.—An increment of Rs. 50 a month may be given by Local Governments and Administrations to—

(*a*) Sub-Engineers, 1st grade, who have been five years continuously in receipt of the pay of their grade.

(*b*) Accountants, 1st grade, who have been five years in receipt of the maximum pay of their grade.

II.—A second increment of Rs. 50 a month may be given to an officer of either of the above classes after 10 years' such service.

III.—These increments are not to be given merely on account of long service, but only on special recommendations to the Local Government or Administration, in each case, on account of exceptionally good service.

IV.—The increments may be given to those who are decided to be entitled to one or both, with effect from 13th November 1884.

The Secretary of State has requested the Government of India to draw special attention to the third of these rules.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second Publication]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 5th December, 1884:—

No. 17 of 1884.

A Bill to amend the law in force in the Pánch Maháls.

WHEREAS it is expedient that the law in force in the territory comprised in the Pánch Maháls should, on and from the first day of March, 1885, be the same as the law in force in the district of Kaira, in the Bombay Presidency, and that the said territory should, on and from that day, cease to be a scheduled district under the Scheduled Districts Act, 1874, and the Laws Local Extent Act, 1874; It is hereby enacted as follows:—

XIV of 1874.
XV of 1874.

Short title.

1. This Act may be called the Pánch Maháls Laws Act, 1884.

Laws of Kaira to apply.

2. (*1*) Save and except the enactments specified in the schedule hereto annexed, all enactments which, on the first day of March, 1885, are in force in the district of Kaira and not in the Pánch Maháls shall be deemed to come into force in the Pánch Maháls on that day.

Other laws repealed.

(*2*) All enactments which on that day are in force in the Pánch Maháls and not in the district of Kaira shall be deemed to be repealed on and from that day in the Pánch Maháls.

Pending proceedings.

3. All proceedings commenced before any authority in the Pánch Maháls before the first day of March, 1885, and still pending on that day, shall be disposed of by such authority as the Local Government may direct, and, save as aforesaid, shall be carried on as if this Act had not been passed.

Territory to cease to be a scheduled district.

Partial repeal of Acts XIV and XV of 1874.

4. On and from the first day of March, 1885, the Pánch Maháls shall cease to be a scheduled district; and in Part II of the First Schedule to the Scheduled Districts Act, 1874, and in the same Part of the Sixth Schedule to the Laws Local Extent Act, 1874, the words "The Pánch Maháls" shall be repealed.

XIV of 1874.
XV of 1874.

THE SCHEDULE.

ENACTMENTS EXCEPTED FROM THE OPERATION OF SECTION 2.

Acts of the Governor General in Council.

Number and year.	Title.	Extent of exception.
VIII of 1870 ...	For the prevention of the murder of female infants.	The whole.
XXI of 1881 ...	To amend the law providing for the relief of Thákurs in the districts of Broach and Kaira.	The whole.

Act of the Governor of Bombay in Council.

Number and year.	Title.	Extent of exception.
V of 1879 ...	To consolidate and amend the law relating to Revenue-officers and the land-revenue in the Presidency of Bombay.	Section 85 and last fifteen words of section 58.

STATEMENT OF OBJECTS AND REASONS.

THE territory called the Pánch Mahâls, lying in the extreme east of Gujarát, in the Bombay Presidency, is a scheduled district under the Scheduled Districts Act, 1874, and the Laws Local Extent Act, 1874, and, though for revenue-purposes part of the Kaira District, it has hitherto, from its backward state and the poverty and ignorance of the people, been treated as a non-regulation district.

The Government of Bombay are, however, of opinion that the Pánch Mahâls ought now to be placed upon a regulation footing, and at their suggestion the present Bill, which has been framed on the model of the Bánkí Laws Act, 1881, has been prepared. It assimilates the law in force in the Pánch Mahâls to that in the Kaira District from the 1st March, 1885, excluding the Female Infanticide Act, 1870, the Broach and Kaira Thákurs' Relief Act, 1881, and the Bombay Land-revenue Code, 1879, section 85 and the last fifteen words of section 58, which the Government of Bombay desire should not be extended to the Pánch Mahâls; it saves pending proceedings; and it declares that, from the above-mentioned date, the Pánch Mahâls shall cease to be a scheduled district, repealing at the same time the reference to those Mahâls which occurs in Part II of the first Schedule to the Scheduled Districts Act, 1874, and in the same Part of the Sixth Schedule to the Laws Local Extent Act, 1874.

The 18th December 1884.

No. 2181.—The following Order in Council providing for the recognition in the United Kingdom of the certificates of survey to be issued by the Government of Bengal to passenger steamers at Calcutta, is published for general information:—

AT THE COURT AT BALMORAL,

The 17th day of October 1884.

PRESENT,

THE QUEEN'S MOST EXCELLENT MAJESTY IN COUNCIL.

Whereas by the Merchant Shipping Act, 1876, it is enacted that, when the Legislature of any British Possession provides for the survey of and grant of Certificates for passenger steamers, and the Board of Trade report to Her Majesty that they are satisfied that the Certificates are to the like effect, and are granted after a like survey, and in such manner as to be equally efficient with the Certificates granted for the same purpose in the United Kingdom under the Acts relating to Merchant Shipping, it shall be lawful for Her Majesty by Order in Council;

1. To declare that the said Certificates shall be of the same force as if they had been granted under the said Acts; and

2. To declare that all or any of the provisions of the said Acts which relate to Certificates

granted for passenger steamers under those Acts shall, either without modification or with such modifications as to Her Majesty may seem necessary, apply to the Certificates referred to in the order; and

3. To impose such conditions and to make such regulations with respect to the said Certificates, and to the use, delivery, and cancellation thereof, as to Her Majesty may seem fit, and to impose penalties not exceeding fifty pounds for the breach of such conditions and regulations.

And whereas the Legislature of the British Possession of Bengal has provided for the survey of and grant of Certificates for passenger steamers.

And whereas the Board of Trade have reported to Her Majesty that they were satisfied that such Certificates are to the like effect, and are granted after a like survey, and in such manner as to be equally efficient with the Certificates granted for the same purpose in the United Kingdom under the Acts relating to Merchant Shipping.

Now, therefore, Her Majesty, in virtue of the powers vested in Her by the said recited Act, by and with the advice of Her Privy Council, is pleased to direct—

1. That the Certificates granted under the said provision by the Legislature of the British Possession of Bengal for passenger steamers shall be of the same force as if they had been granted for the same purpose in the United Kingdom under the said Acts relating to Merchant Shipping.
2. That all the provisions of the said Acts which relate to certificates granted for passenger steamers under those Acts shall, without modification, except as herein-after mentioned, apply to the Certificates referred to in this Order.
3. That it shall not be lawful for a passenger steamer to which this Order relates to proceed to sea with passengers on board from any port or place in the United Kingdom on any voyage to any port in Canada or the United States of America.
4. That if any such passenger steamer goes to sea from any place in the United Kingdom with any passengers on board upon any voyage to any port in Canada or the United States of America, the owner thereof shall for every such offence incur a penalty not exceeding fifty pounds, and such penalty is hereby imposed accordingly.

The 18th December 1884.

No. 302.—The following is published for general information :—

No. 1442 G., dated 13th December 1884.

RESOLUTION—By the Government of India, Public Works Department.

Reorganisation of the Engineer Establishment of the Public Works Department.

Read again—

Despatch to the Secretary of State, No. 15, dated 21st April 1884.

Read also—

Despatch from the Secretary of State, No. 71, dated 13th November 1884.

RESOLUTION.—In accordance with the decision of the Secretary of State, the Governor General in Council directs the publication of the following orders regarding the Engineer Establishment of the Public Works Department :—

I. (*a*) The number of Executive and Assistant Engineers on any list, taken together, will be divided equally between the two classes, an addition of one to the number of Executive Engineers being made for a fraction.

(*b*) The number of Executive Engineers in the 1st, 2nd, 3rd, and 4th grades will be in the proportion of 8, 9, 10, and 12 respectively.

(*c*) Half the number of Assistant Engineers will be in the 1st grade, an addition of one being made for a fraction.

(*d*) The numbers in the three higher grades of Executive Engineers, and in the 1st grade of Assistant Engineers, as determined by (*b*) and (*c*), will be increased so as to allow of the permanent promotion of a number of officers from the junior grades of those classes, corresponding to the normal number of officers on furlough, as ordered in Public Works Department Resolution No. 1174G., dated 4th June 1880.

II. (*a*) The pay of the following grades will in future be—

Executive Engineer, 3rd grade, R700 a month.
" " 4th " " 600 "
Assistant Engineer, 1st " " 500 "

(*b*) Assistant Engineers, 2nd grade, will receive R400 a month instead of R350, after 3 years' service in the grade.

(*c*) In the cases of officers of Royal Engineers, who draw staff salary in addition to military pay and allowances, the increases under (*a*) and (*b*) will take the form of an addition of R50 a month to staff salary, and to the maximum pay of their grade.

(*d*) The increase of R50 a month to the salaries of Assistant Engineers, 2nd grade, after 3 years' service in their grade, will be given on specific recommendations on account of satisfactory service, and cannot be claimed as a right. The increase may be sanctioned by Local Governments and Administrations.

III. Certain Civil Engineers with English training, appointed in India, will be allowed the same privileges under the pension rules, in all respects, as officers included in Schedule B, I, II and III (1) of the Civil Pension Code. A nominal roll of these officers will be added to the Civil Pension Code hereafter.

IV. In regard to Civil Engineers, appointed in India from the Civil Engineering Colleges or otherwise, and not included under III, who may rise to the rank of Superintending Engineer, the Government of India will be prepared to consider favorably their admission to the pension rules applicable to those included in Schedule B, I, II and

III (1). This rule is subject to any general restriction that may hereafter be prescribed as to the amount of pension payable to public servants who are natives of India.

V. Civil Engineers who were appointed to the Department as Assistant Engineers, 1st grade after they had left other employment in India, will be allowed, on account of previous experience, to add to their pensionable service a period not exceeding 3 years, provided such previous experience was not acquired before the age of 25.

VI. These rules will come into force on 1st January 1885.

RESOLUTION.—The rules regulating the admission of students to the Indian Engineering Colleges, and the manner in which appointments in the Engineering Branch of the Public Works Department may be obtained by students of these Colleges, are contained in the Resolutions of the Government of India in the Public Works Department of 11th November 1882 and 14th February 1883. These Resolutions modified the previously existing rules in several respects, and notably in giving to students of pure Indian descent a preference over all other students for guaranteed appointments in the Public Works Department. As long ago as 1876 it had been remarked by the Secretary of State that very few persons of pure Indian origin succeeded in obtaining appointments in the public service through the Engineering Class of the Thomason College, and between that time and the year 1882 he had repeatedly urged on the Government of India the advisability of giving to pure natives a preferential claim to such appointments. The Government of India, while recognising the desirableness of attracting natives of India to the Engineer Department, hesitated to give an exclusive preference to one

class of natives of India as defined by Statute, and the discussions on this point ranged over a considerable period. Ultimately the Governor General in Council acquiesced in the proposals of the Secretary of State, being influenced mainly by the consideration that, owing to reductions in the Public Works Department, the number of appointments available for pupils of the Indian Colleges had become so small that in no other way could the object in view be attained. The number of appointments guaranteed to the four Indian Colleges was no more than six for the year 1885 and seven for 1886, and under these circumstances almost the only way of facilitating the candidature of pure natives seemed to be to give them a preference over other students. Shortly after the issue of the Resolutions in question, memorials were received from various Associations of domiciled Europeans and Eurasians in India, remonstrating against the disadvantage at which persons of their class were placed by the new rules. These memorials were forwarded to the Secretary of State with the Despatch from the Government of India of 28th July 1883, in which the Governor General in Council remarked that although, looking to the small number of appointments involved, the memorialists appeared to exaggerate somewhat the practical effect of the rules upon their interests, he could not but think that "they had a certain solid foundation for their dissatisfaction, and that their representations deserved attention." The Governor General in Council accordingly recommended that arrangements should be made in regard to the recruiting of the Public Works Department which would have the effect of increasing the number of appointments available for the Indian Colleges to eleven, and that with this extension of the field of employment the area of competition might again be widened so as to include all persons coming under the statutory definition of natives of India. Considerable correspondence has since taken place upon various points of detail in this scheme, and the Secretary of State has now decided that the annual recruitment from the Indian Colleges shall be fixed at nine. Although somewhat smaller than what they had recommended, the Government of India believe that this increase in the number of appointments, taken in connection with the changes made in other respects in the rules of admission to the College, renders it unnecessary to maintain a preference in favour of students of pure Indian descent, and that the object with which that preference was given may now be sufficiently attained without it. In future, therefore, all students coming under the statutory definition of natives of India will be eligible to compete for the guaranteed appointments in the Public Works Department.

The appointments will, for the present, be alloted as follows:—

To Thomason College, Rurki	4 and 5 alternately.
Seebpore ,,	2 and 1 ,,
Madras Civil Engineering College	1
Poona College of Science	2

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third Publication.

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 5th December, 1884:—

No. 17 OF 1884.

*A Bill to amend the law in force in the Pánch Mahál*s.

WHEREAS it is expedient that the law in force in the territory comprised in the Pánch Mahàls should, on and from the first day of March, 1885, be the same as the law in force in the district of Kaira, in the Bombay Presidency, and that the said territory should, on and from that day, cease to be a scheduled district under the Scheduled Districts Act, 1874, and the Laws Local Extent Act, 1874; It is hereby enacted as follows:— [XIV of 1874. XV of 1874.]

Short title.

1. This Act may be called the Pánch Mahàls Laws Act, 1884.

Laws of Kaira to apply.

2. (1) Save and except the enactments specified in the schedule hereto annexed, all enactments which, on the first day of March, 1885, are in force in the district of Kaira and not in the Pánch Mahàls shall be deemed to come into force in the Pánch Mahàls on that day.

Other laws repealed.

(2) All enactments which on that day are in force in the Pánch Mahàls and not in the district of Kaira shall be deemed to be repealed on and from that day in the Pánch Mahàls.

Pending proceedings.

3. All proceedings commenced before any authority in the Pánch Mahàls before the first day of March, 1885, and still pending on that day, shall be disposed of by such authority as the Local Government may direct, and, save as aforesaid, shall be carried on as if this Act had not been passed.

Territory to cease to be a scheduled district.

Partial repeal of Acts XIV and XV of 1874.

4. On and from the first day of March, 1885, the Pánch Mahàls shall cease to be a scheduled district; and in Part II of the First Schedule to the Scheduled Districts Act, 1874, and in the same Part of the Sixth Schedule to the Laws Local Extent Act, 1874, the words "The Pánch Mahàls" shall be repealed. [XIV of 1874. XV of 1874.]

THE SCHEDULE.

ENACTMENTS EXCEPTED FROM THE OPERATION OF SECTION 2.

Acts of the Governor General in Council.

Number and year.	Title.	Extent of exception.
VIII of 1870 ...	For the prevention of the murder of female infants.	The whole.
XXI of 1881 ...	To amend the law providing for the relief of Thákurs in the districts of Broach and Kaira.	The whole.

Act of the Governor of Bombay in Council.

Number and year.	Title.	Extent of exception.
V of 1879 ...	To consolidate and amend the law relating to Revenue-officers and the land-revenue in the Presidency of Bombay.	Section 85 and last fifteen words of section 58.

STATEMENT OF OBJECTS AND REASONS.

THE territory called the Pánch Maháls, lying in the extreme east of Gujarát, in the Bombay Presidency, is a scheduled district under the Scheduled Districts Act, 1874, and the Laws Local Extent Act, 1874, and, though for revenue-purposes part of the Kaira District, it has hitherto, from its backward state and the poverty and ignorance of the people, been treated as a non-regulation district.

The Government of Bombay are, however, of opinion that the Pánch Maháls ought now to be placed upon a regulation footing, and at their suggestion the present Bill, which has been framed on the model of the Bánkí Laws Act, 1881, has been prepared. It assimilates the law in force in the Pánch Maháls to that in the Kaira District from the 1st March, 1885, excluding the Female Infanticide Act, 1870, the Broach and Kaira Thákurs' Relief Act, 1881, and the Bombay Land-revenue Code, 1879, section 85 and the last fifteen words of section 58, which the Government of Bombay desire should not be extended to the Pánch Maháls; it saves pending proceedings; and it declares that, from the above-mentioned date, the Pánch Maháls shall cease to be a scheduled district, repealing at the same time the reference to those Maháls which occurs in Part II of the first Schedule to the Scheduled Districts Act, 1874, and in the same Part of the Sixth Schedule to the Laws Local Extent Act, 1874.

GOVERNMENT OF INDIA.

[First Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 19th December, 1884, and was referred to a Select Committee :—

No. 18 OF 1884.

A Bill to repeal part of section 6 of the Indian Tariff Act, 1882, and to amend the Excise Act, 1881, and the Bengal Excise Act, 1878.

WHEREAS it is expedient to repeal part of section 6 of the Indian Tariff Act, 1882, and to amend section 7 of the Excise Act, 1881, and section 18 of the Bengal Excise Act, 1878; It is hereby enacted as follows :—

Repeal of part of section 6 of Act XI of 1882.

1. The part of section 6 of the Indian Tariff Act, 1882, beginning with the words "And whereas," down to and including the words "been paid," is repealed.

Amendment of section 7 of Act XXII of 1881.

2. For clause (*a*) of section 7 of the Excise Act, 1881, the following clause shall be substituted :— XXII of 1881.

"(*a*) such duty as the Local Government may from time to time fix in respect of such spirit has been paid."

Amendment of section 18 of Bengal Act VII of 1878.

3. In section 18 of the Bengal Excise Act, 1878, for the words "at the rate leviable under any Tariff Act for the time being in force" the words "at such rate as the Local Government may from time to time fix in respect of such spirituous liquor" shall be substituted; but nothing in this section shall affect any Act passed after this Act comes into force by the Lieutenant-Governor of Bengal in Council. Beng. Act VII of 1878.

Saving of duties already fixed under section 6 of Act XI of 1882.

4. The duty now fixed by the Local Government under section 6 of the Indian Tariff Act, 1882, as leviable on spirit manufactured in all or any of the distilleries situate in the territories under its administration, or in any part of such territories, shall, in places in which the Excise Act, 1881, or the Bengal Excise Act, 1878, is in force, be deemed to be the duty fixed by the Local Government under sections 7 and 18 of those Acts, as amended by this Act, respectively. XI of 1882. XXII of 1881. Beng. Act VII of 1878.

STATEMENT OF OBJECTS AND REASONS.

THE Government of Madras recently submitted a draft Bill to consolidate and amend the Abkari law of the Presidency of Madras, for sanction to its introduction in the local Legislative Council, and, on examination of its provisions, it was found that two clauses of one of its sections, imposing a duty on liquor, were, as applied to spirit, *ultra vires* of the local legislature, as the mode of fixing the excise duty on spirit is determined by section 6 of the Indian Tariff Act, 1882. It was also feared that the penultimate clause of the latter section, by keeping in force, under the authority of the Governor General's Legislative Council, an unexplored mass of law existing on the 10th March, 1882, might render other provisions of that Bill *ultra vires*.

This in itself would make it necessary that legislation should be resorted to in the Council of the Governor General in order to prevent the Madras Bill from being declared invalid; and as, moreover, section 6 of the Tariff Act must seriously hamper any local legislature contemplating legislation like that proposed by the Madras Government, it is proposed to repeal that section, leaving it to the Local Governments to deal with the mode of fixing the duties of excise on spirit, under the other enactments locally in force, subject, so far as any discretion is allowed to them by those enactments, to the general executive control of the Government of India.

The present Bill has accordingly been prepared. It first repeals section 6 of the Tariff Act except the last clause amending section 1 of Act XVI of 1863, which Act is still in force. It then amends section 7 of the Excise Act, 1881, and section 18 of the Bengal Excise Act, 1878, which at present contain references to the provisions of section 6 of the Tariff Act, by omitting these references and conferring on the Local Governments concerned power to fix the duty payable in respect of country spirit. Lastly, in order to prevent any question being raised as to the effect of the repeal of section 6 of the Tariff Act, the Bill declares that duties already fixed by the Local Government under section 6 of the Tariff Act shall be deemed to be duties fixed by the Local Government under sections 7 and 18 of the Excise Act, 1881, and the Bengal Excise Act, 1878, as amended by this Act, respectively.

The 13th December 1884.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 19th December, 1884, and was referred to a Select Committee:—

No. 19 OF 1884.

A Bill to amend the law relating to the carriage of passengers by sea.

WHEREAS by section 99 of an Act of the Imperial Parliament called "the Passengers Act, 1855," it is enacted that "it shall be lawful for the Governor General of India in Council, from time to time, by any Act or Acts to be passed for that purpose, to declare that this Act or any part thereof shall apply to the carriage of passengers upon any voyage, from any ports or places within the territories of British India, to be specified in such Act or Acts, to any other places whatsoever, to be also specified in such Act or Acts;" and it is thereby also enacted that "on the passing of such Indian Act or Acts, and whilst the same shall remain in force, all such parts of this Act as shall be adopted therein shall apply to and extend to the carriage of passengers upon such voyages as in the said Indian Act or Acts shall be specified. The provisions of such Indian Act shall be enforced in all Her Majesty's possessions in like manner as the provisions of this Act may be enforced;"

And whereas certain parts of the said Act of Parliament were by Act II of 1860 (*to amend the law relating to the carriage of passengers by sea*) made applicable to the carriage of passengers upon certain specified voyages;

And whereas by an Act of the Imperial Parliament called "the Passengers Act Amendment Act, 1863," certain parts of the Passengers Act, 1855, which were so made applicable have been amended, and it is provided that the said Acts of the Imperial Parliament shall be construed together as one Act;

And whereas it is expedient that the amendments so made in the Passengers Act, 1855, should also be made in the parts of that Act so made applicable, and it is also expedient to apply those parts so amended to the carriage of passengers upon certain voyages not specified in Act II of 1860;

It is hereby enacted as follows:—

Short title and commencement.

1. (*1*) This Act may be called the Indian Sea Passengers Act, 1885: and [New.]

(*2*) It shall come into force on the first day of March, 1885. [New.]

Repeal of Act II of 1860.

2. On and from the day on which this Act comes into force, Act II of 1860 (*to amend the law relating to the carriage of passengers by sea*) shall be repealed. [New.]

Certain provisions of the Statutes made applicable to specified voyages from India.

3. The provisions contained in sections 4, 5 and 6 of this Act, and the schedule hereto annexed (being parts of the Passengers Act, 1855, as amended by the Passengers Act Amendment Act, 1863), are declared applicable to the carriage of passengers upon the following voyages, namely:— [Act II of 1860, s. 1, Act VII of 1871, ss. 23 and 24.] [New.] 18 & 19 Vic., c. 119. 26 & 27 Vic., c. 51.

(*a*) Voyages from the ports of Calcutta, Madras and Bombay to the British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis and Fiji; [New.]

(*b*) Voyages from the ports of Calcutta, Madras and Bombay to the French Colonies of Réunion, Martinique, Guadeloupe and its dependencies, and Guiana; [New.]

(*c*) Voyages from the ports of Calcutta, Madras and Bombay to the Netherlands colony of Dutch Guiana; [New.]

(*d*) Voyages from the ports of Calcutta, Madras and Bombay to the Danish colony of St. Croix; [New.]

(*e*) Voyages under the Native Passenger Ships Act, 1876, from Calcutta Madras, Bombay, Karáchí, Rangoon and other ports in British India to the Straits Settlements, to the protected Native States adjoining the Straits Settlements, to Australia, and to ports in the Red Sea or Persian Gulf. VIII of 1876.

[Act II of 1860, s. 2.]

Governors or Consuls may pay expenses of passengers taken off passenger-ship.

4. If the passengers upon any such voyage as is specified in the last preceding section are taken off from the ship carrying such passengers, or are picked up at sea from any boat, raft or otherwise, it shall be lawful, if the port or place to which they shall be conveyed is in any of Her Majesty's colonial possessions, for the Governor of such colony, or for any person authorized by him for the purpose, or, if in any foreign country, for Her Majesty's Consular officer, at such port or place therein, to defray all or any part of the expenses thereby incurred.

[Act II of 1860, s. 3, 26 & 27 Vic., c. 51, [New.]

Governors or Consuls may send on passengers, if the master of the ship fail to do so.

5. If any passenger of any such passenger-ship as aforesaid, without any neglect or default of his own, finds himself within any colonial or foreign port, or place other than that for which the ship was originally bound, or at which he, or the Emigration Agent, or any public officer or other person on his behalf, has contracted that he should land, it shall be lawful for the Governor of the colony, or for any person authorized by him for the purpose or for Her Majesty's Consular officer at the foreign port or place, as the case may be, to forward the passenger to his intended destination, unless the master of the ship, within forty-eight hours of the arrival of such passenger, gives to the Governor or Consular officer, as the case may be, a written undertaking to forward or carry on within six weeks thereafter the passenger to his original destination, and unless the master accordingly forwards or carries him on within that period.

Act II of 1860, s. 4, 26 & 27 Vic., c. 51, s. 16.]

Expenses incurred under sections 4 and 5 to be a Crown debt.

6. (1) All expenses incurred under the last two preceding sections, or either of them, by or by the authority of a Governor or Consular officer, or other person as therein respectively mentioned, including the cost of maintaining the passengers until forwarded to their destination, and of all necessary bedding, provisions and stores, shall become a debt to Her Majesty and Her successors from the owner, charterer and master of the ship, and shall be recoverable from them, or from any one or more of them, at the suit and for the use of Her Majesty, in like manner as in the case of other Crown debts.

[New.]

(2) A certificate in the form given in the Schedule hereto annexed, or as near thereto as the circumstances of the case will admit, purporting to be under the hand of any such Governor or Consular officer (as the case may be), stating the total amount of the expenses, shall, in any suit or other proceeding for the recovery of the debt, be received in evidence without proof of the handwriting or of the official character of the Governor or Consular officer, and shall be deemed sufficient evidence of the amount of the expenses, and that the same were duly incurred;

[New.]

nor shall it be necessary to adduce on behalf of Her Majesty any other evidence in support of the claim, but judgment shall pass for the Crown, with costs of suit, unless the defendant specially pleads and duly proves that the certificate is false or fraudulent, or specially pleads and duly proves any facts showing that the expenses were not duly incurred:

Provided, nevertheless, that in no case shall any larger sum be recovered on account of the expenses than a sum equal to twice the total amount of passage-money received or due to and recoverable by or on account of the owner, charterer or master of the passenger-ship or any of them from or on account of the whole number of passengers who may have embarked in the ship; which total amount of passage-money shall be proved by the defendant if he will have the advantage of this limitation of the debt: but if any such passengers are forwarded or conveyed to their intended destination under the provisions of the last preceding section, they shall not be entitled to the return of their passage-money, or to any compensation for loss of passage.

THE SCHEDULE.

[26 & 27 Vic., cap. 51, Sched.] [New.]

Form of Governor's or Consul's Certificate of expenditure in the case of Passengers shipwrecked &c.

(*See section 6.*)

(*a*). *N. B.*—1. If more passengers were rescued than forwarded, or if bedding, &c., was not supplied, alter the certificate to suit the facts of the case.

(*b*). *N. B.*—2. State generally the nature of the disaster and where it occurred. But if the passengers were only left behind without any default of their own, state the fact accordingly.

I hereby certify that acting under, and in conformity with, the provisions of the Indian Sea Passengers Act, 1885, I have defrayed the expenses incurred in rescuing, maintaining, supplying with necessary bedding, provisions and stores (*a*), and in forwarding to their destination passengers who were proceeding from to in the passenger-ship which was wrecked at sea, &c. (*b*).

And I further certify, for the purposes of the sixth section of the said Indian Sea Passengers Act, 1885, that the total amount of such expenses is , and that such expenses were duly incurred by me under the said Act.

Given under my hand this day of , 18 .

Governor of &c., (or, as the case may be), *Her Britannic Majesty's Consul at* .

STATEMENT OF OBJECTS AND REASONS.

ACT II of 1860 declares certain parts (namely, sections 52, 53 and 54) of the English Passengers Act, 1855 (18 & 19 Vic., cap. 119) to be applicable to the carriage of passengers upon voyages from the ports of Calcutta, Madras and Bombay to the colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia and Grenada, and from ports in British India to ports in the Red Sea or Persian Gulf. The colonies mentioned were the places to which emigration was then lawful. Since 1860, emigration to the colonies of Fiji, Natal, Réunion, St. Croix, Guadeloupe, Martinique, Dutch Guiana, St. Vincent, Nevis and St. Kitts has been sanctioned. With respect, however, to voyages to places not specified in Act II of 1860, that

Act gives no power to any authority to recover expenses incurred in forwarding shipwrecked passengers to their destination and in maintaining them until they are so forwarded. At present, therefore, the voyages to which the Act does not apply are more numerous than those to which it does.

2. Again, the Act, as it stands at present, is, if strictly construed, inapplicable to the conditions under which emigration from India is usually conducted. Section 3 of the Act, following section 53 of the English Passengers Act, 1855, runs as follows:—" If any passenger * * * find himself within any colonial or foreign port or place other than that at which *he may have contracted to land," &c.* But as a rule, emigrants from India do not themselves contract with the owners or charterers of the vessels in which they emigrate. In all cases falling under the Indian Emigration Act VII of 1871 (or which may fall under the Indian Emigration Act XXI of 1883, when that Act is brought into force) the contract is made by a recruiter for the colony importing labour, under the supervision of the Protector of Emigrants. Emigrants despatched in this way are therefore technically excluded from the provisions of Act II of 1860. A similar difficulty appears to have arisen in England, and to have been met by an amendment of the law. Section 12 of the English Passengers Act Amendment Act, 1863 (26 & 27 Vic., cap. 51), repeals section 53 of the English Passengers Act, 1855, and section 15 of the former Act substitutes for the words " other than that at which he may have contracted to land " the words " other than that for which the ship was originally bound, or at which he or the Emigration Commissioners, or any public officer, or other person on his behalf, may have contracted that he should land".

3. These two defects in the Act came to notice in connection with the following occurrence. In the end of April last, the steamer *Laleham*, carrying emigrants from Calcutta to Dutch Guiana, grounded off Ceylon, and was compelled to land her passengers at Trincomalee. The *Laleham* returned to Calcutta, where she was examined by the Engineer-Surveyor to the port, and reported " unseaworthy and unfit to proceed to sea without serious danger to human life". The Agents of the *Laleham* at first proposed to substitute another vessel, but subsequently declined to do so, offering merely to have the *Laleham* repaired at Calcutta, and to fulfil her charter-party by re-embarking the coolies at Trincomalee and taking them on to Surinam.

The Advocate General of Bengal, on being consulted, was of opinion that no action could be taken under Act II of 1860, and that the matter would be governed by the charter-party. Surinam, he said, being in Dutch Guiana, is not a place to which Act II of 1860 applies. He thought further that the English Passengers Act Amendment Act, 1863, would be construed strictly, and according to such construction he did not think that the words of section 3 of Act II of 1860 would cover the break-down in a voyage to which that Act applied, in any case other than that in which the passenger had himself contracted.

Under these circumstances legislation seems necessary in order to bring Act II of 1860 into conformity with the present system of emigration and the English Passengers Act Amendment Act, 1863.

The present Bill has accordingly been prepared. It repeals and re-enacts Act II of 1860 with the necessary amendments. Section 3 of the present Bill declares the subsequent provisions of the Bill (being parts of the English Passenger Act, 1855, as amended by the Passengers Act Amendment Act, 1863) to be applicable to all voyages to certain specified colonies and places, which are, in fact, the colonies and places to which under the existing law emigration is now lawful or is likely to be legalized; and in sections 5 and 6 the amendments made by the English Passengers Act Amendment Act, 1863, in sections 53 and 54 of the English Passengers Act, 1855 (which formed sections 3 and 4 of Act II of 1860) are incorporated with some slight modifications so as to adapt them to this country.

HOME DEPARTMENT.

REPORT OF SPECIAL CHOLERA COMMISSION.

No. 830, dated Calcutta, the 9th December 1884.

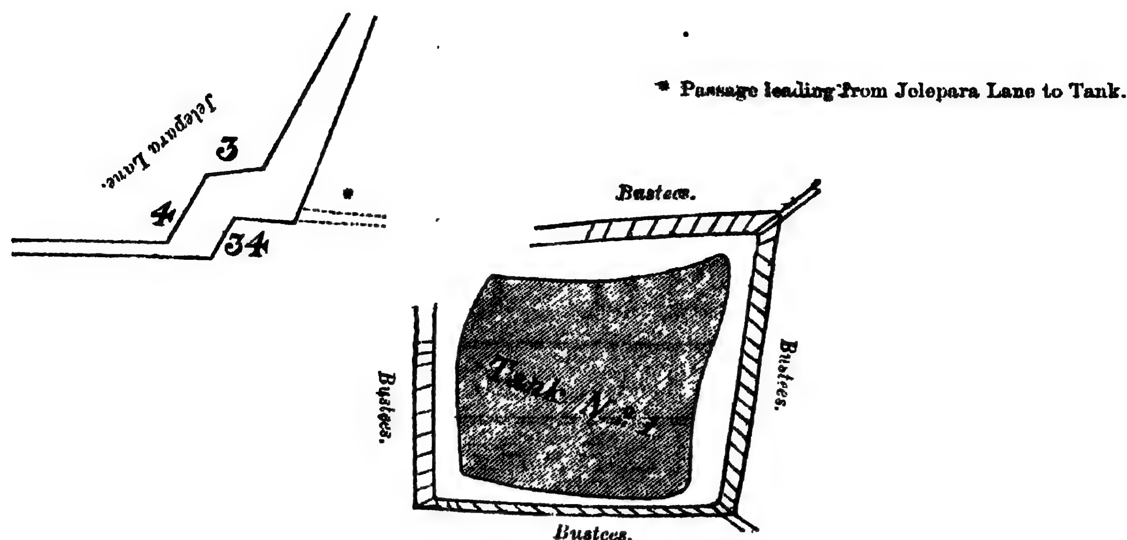
From—Surgeon-General J. M. CUNINGHAM, M.D., Sanitary Commissioner with the Government of India,

To—The Secretary to the Government of India, Home Department.

In continuation of my letter No. 810 of the 27th ultimo, I have the honor to submit, for the information of the Government, the accompanying communication from Dr. Klein, and to suggest that it also may be published in the Supplement to the *Gazette of India* for general information.

2. The fact that comma-bacilli have been found in tanks without any case of cholera having occurred among the large number of people using them is an observation of much interest and importance in regard to the relation of comma-bacilli to cholera. The observation has a special interest and importance moreover from the circumstance that one of the tanks in question is the *same tank* as that in which Dr. Koch found comma-bacilli and so hastily concluded that the outbreak of cholera which took place about that time among persons using this tank had been caused by the comma-bacilli it contained.

Dated Calcutta, the 3rd December 1884.



From—Dr. E. KLEIN,

To—The Sanitary Commissioner with the Government of India.

In addition to the short memorandum signed by myself and Dr. Gibbs, which we had the honor to submit to you some days ago, I append here some interesting notes with regard to the relation of comma-bacilli in tank-water to cholera in Calcutta, which were collected in conjunction with Dr. D. D. Cunningham.

A

An outbreak of cholera occurred between 14th and 16th November in three houses in Jelepara lane, in Calcutta. The houses are marked in the subjoined plan as No. 34, No. 3, and No. 4.

In No. 34 occurred three; in No. 3, two; and in No. 4, three cases. Those of No. 34 were the first.

The only condition common to all these houses is this, that in front of them is an opening of the sewer passing under the street.

A passage marked * on the plan leads at some distance to a large tank, No. 1, around which is a number of bustees. The people of those bustees use, as is generally the case, this tank for all kinds of purposes, cess-pools, washing of clothes, utensils, and drinking.

The above three houses Nos. 3, 4, and 34, of Jelepara lane, are inhabited by well-to-do people and they have in their houses a good and pure water-supply of their own, and their inhabitants never come near the tank at all. The water of this tank is very dirty and contains undoubted comma-bacilli, exactly alike those found in choleraic evacuations. Although a large number of the natives living in the bustees surrounding this tank constantly use and drink of this water, no case of cholera has occurred amongst them.

As you are aware from Dr. Koch's official reports to his government, this gentleman visited during his stay in Calcutta (February 13th and 20th, 1884) bustees in Sahib Bagan, amongst the inhabitants of which there occurred, between January 21st and April 27th of this year, a severe outbreak of cholera. These bustees are located around a tank, which for convenience sake may be here called No. 2. There are about two hundred families living around this tank and, as is usually the case, they utilise this water for washing, bathing, cleaning, and drinking purposes. In this water Dr. Koch found the comma-bacilli and he quite arbitrarily concluded that they caused that outbreak of cholera.

I visited this tank lately and found in its water undoubted comma-bacilli; there has occurred, during the whole of November 1884, one single case of cholera, although about two hundred families use the water.

Close to this tank there is another tank, No. 3, and around this live also about two hundred families. As in the former case, the people here around tank No. 3 use the water for all purposes including drinking purposes. The water of this tank is dirty and a sample taken close to the shore revealed undoubted comma-bacilli. There has not occurred a single case of cholera in these bustees during the whole of this year.

It is worth stating that there is a communication between tank No. 3 and tank No. 2, there being a slight flow from the former into the latter. Tank No. 2 receives water from the ice-factory close by.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Museums and Exhibitions),—under date Simla, the 5th November 1884.

READ—

List of raw products collected for the Calcutta International Exhibition of 1883-84, compiled by Babu T. N. Mukharji, Officer in charge of the Exhibition Branch, Revenue and Agricultural Department.

RESOLUTION.

AT the request of the Government of Bengal, the Government of India in the Revenue and Agricultural Department undertook to form a collection of the economic products of India for the Calcutta International Exhibition of 1883-84, and the list read in the preamble shows the character and scope of the collection, and the extent to which it may be held to represent the raw resources of the country. The Government of India desires to record its appreciation of the help afforded to it by the officers and private gentlemen named in the appended list, without whose cordial co-operation it would have been impossible in the very limited time allowed to have accomplished the work with any measure of success. More particularly the Government of India would desire to acknowledge the services of the following gentlemen :—

(1) Forest officers of Madras, Bengal, Burma, Assam, and the Central Provinces.

(2) F. Duthie, Esq., Superintendent, Botanical Gardens, Saharanpur.

(3) J. B. Fuller, Esq., Director of the Agricultural Department, Central Provinces.

(4) Babu Lachman Prosad Barman, Superintendent, Government Farm, Cawnpore.

(5) Babu Amba Datt Joshi, of Almora.

(6) Babu Mahendra Nath Battacharjya, M.A., B.L., Deputy Magistrate and Deputy Collector of Bogra.

(7) Dr. Mudin Sharif of Madras.

(8) J. Murray, Esq., Curator, Municipal Museum, Karachi.

(9) Dr. MacDonald, Curator, Victoria and Albert Museum, Bombay.

(10) Babu Ajodhya Prosad, Deputy Magistrate and Deputy Collector, Shahjehanpur.

(11) Major D. G. Pitcher, Assistant Director of the Department of Agriculture, N.-W. Provinces and Oudh.

ORDER.—Ordered that a copy of this Resolution be printed and distributed to the Local Governments and Administrations noted in the margin, and be published in the *Gazette of India* for general information.

Madras.	Punjab.
Bombay.	Central Provinces.
Bengal.	British Burmah.
North-Western Provinces and Oudh.	Assam.

Ordered also, that a copy of this Resolution be forwarded to the Foreign Department for communication to the Agent, Governor General, Rajputana.

Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports—No irrigation has been effected owing to late and abundant rain.

Executive Engineer, Eastern Jumna Canal, reports—Canal closed the whole month and no demand. The quantities shown irrigated "during month" are really corrections of the previous month's estimates, which were thrown out by the sudden rainfall at the end of the month. The decrease of 24,000 acres as compared with last year is due to the heavy rainfall, 18,000 of it is in "other food grains" and the remainder in rice. Indigo has again increased.

Executive Engineer, Rohilkhand Canals, reports—The rain ended on 4th October with very heavy floods which damaged the rice slightly, cotton, bajra and early-sown gram and linseed. An unusually large area of land is being sown with rice, which is coming on well. No demand for canal water. Most of the canals are closed and only percolation water running. Most of the water shown as entering the division is due to Dhora river.

Northern, Anúpshahr, Meerut, Bulandshahr, Aligarh, Bhognipur, Bijnor, Jhánsi, and Hamírpur returns reported blank.

No remarks from the other divisions.

The following areas were also irrigated for *kharif* in addition to the above during this month:—

Lower Ganges Canal, Narora Division	19,819
Eastern Jumna Canal	93,680
Rohilkhand Canals	31,085
Total	144,584

In addition to the above the following kharif irrigation was also effected:—

FORT WILLIAM,
The 18th December 1884.

FRED. FIREBRACE, *Major, R.E.,*
Under Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 17th DECEMBER 1884.

GENERAL REMARKS.—Rain has fallen only in a few districts in the Madras Presidency.

Harvesting continues in Madras and the standing crops promise well, except in Bellary where the want of rain is still much felt.

In Mysore the crops are in good condition and the prospects of the season are fair. In Coorg paddy is ready for harvest; coffee is being picked but the yield is short.

In Bombay the *kharif* harvest is well in hand; the prospects of the *rabi* are generally good throughout the Presidency, though in parts of some districts more rain would benefit the crop.

In the Berars, Hyderabad, Central India, and Rajputana prospects are favourable. *Rabi* sowings have been nearly completed in the Punjab, and the crops are doing well, though more rain is wanted in one or two districts.

In the North-Western Provinces and Oudh the crops are flourishing and the weather is favourable.

In the Central Provinces prospects are favourable, but more rain would do good to the *rabi*.

Rabi sowings have been almost completed in Bengal, and the crops are generally promising. Harvesting of *amun* paddy and cutting of sugarcane continue.

In Burma the rice crop is being reaped and a good outturn is expected in all districts. In Assam prospects are generally good.

The public health is generally good, but cholera is reported from parts of Madras and Bengal.

Prices are generally stationary.

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 19th December, 1884, and was referred to a Select Committee:—

No. 18 OF 1884.

A Bill to repeal part of section 6 of the Indian Tariff Act, 1882, and to amend the Excise Act, 1881, and the Bengal Excise Act, 1878.

WHEREAS it is expedient to repeal part of section 6 of the Indian Tariff Act, 1882, and to amend section 7 of the Excise Act, 1881, and section 18 of the Bengal Excise Act, 1878; It is hereby enacted as follows:—

1882. [XI] of 1881. [Beng.] Act [VII of] 1878.

Repeal of part of section 6 of Act XI of 1882.

1882.

1. The part of section 6 of the Indian Tariff Act, 1882, beginning with the words "And whereas," down to and including the words "been paid," is repealed.

Amendment of section 7 of Act XXII of 1881.

XXII of 188[1]

2. For clause (*a*) of section 7 of the Excise Act, 1881, the following clause shall be substituted:—

"(*a*) such duty as the Local Government may from time to time fix in respect of such spirit has been paid."

Amendment of section 18 of Bengal Act VII of 1878.

Beng. Act VII of 1878

3. In section 18 of the Bengal Excise Act, 1878, for the words "at the rate leviable under any Tariff Act for the time being in force" the words "at such rate as the Local Government may from time to time fix in respect of such spirituous liquor" shall be substituted; but nothing in this section shall affect any Act passed after this Act comes into force by the Lieutenant-Governor of Bengal in Council.

Saving of duties already fixed under section 6 of Act XI of 1882.

XI of 1882.

XXII of 1881 Beng. Act VII of 1878.

4. The duty now fixed by the Local Government under section 6 of the Indian Tariff Act, 1882, as leviable on spirit manufactured in all or any of the distilleries situate in the territories under its administration, or in any part of such territories, shall, in places in which the Excise Act, 1881, or the Bengal Excise Act, 1878, is in force, be deemed to be the duty fixed by the Local Government under sections 7 and 18 of those Acts, as amended by this Act, respectively.

STATEMENT OF OBJECTS AND REASONS.

THE Government of Madras recently submitted a draft Bill to consolidate and amend the Abkari law of the Presidency of Madras, for sanction to its introduction in the local Legislative Council, and, on examination of its provisions, it was found that two clauses of one of its sections, imposing a duty on liquor, were, as applied to spirit, *ultra vires* of the local legislature, as the mode of fixing the excise duty on spirit is determined by section 6 of the Indian Tariff Act, 1882. It was also feared that the penultimate clause of the latter section, by keeping in force, under the authority of the Governor General's Legislative Council, an unexplored mass of law existing on the 10th March, 1882, might render other provisions of that Bill *ultra vires*.

This in itself would make it necessary that legislation should be resorted to in the Council, of the Governor General in order to prevent the Madras Bill from being declared invalid; and as

moreover, section 6 of the Tariff Act must seriously hamper any local legislature contemplating legislation like that proposed by the Madras Government, it is proposed to repeal that section, leaving it to the Local Governments to deal with the mode of fixing the duties of excise on spirit, under the other enactments locally in force, subject, so far as any discretion is allowed to them by those enactments, to the general executive control of the Government of India.

The present Bill has accordingly been prepared. It first repeals section 6 of the Tariff Act except the last clause amending section 1 of Act XVI of 1863, which Act is still in force. It then amends section 7 of the Excise Act, 1881, and section 18 of the Bengal Excise Act, 1878, which at present contain references to the provisions of section 6 of the Tariff Act, by omitting these references and conferring on the Local Governments concerned power to fix the duty payable in respect of country spirit. Lastly, in order to prevent any question being raised as to the effect of the repeal of section 6 of the Tariff Act, the Bill declares that duties already fixed by the Local Government under section 6 of the Tariff Act shall be deemed to be duties fixed by the Local Government under sections 7 and 18 of the Excise Act, 1881, and the Bengal Excise Act, 1878, as amended by this Act, respectively.

The 13th December 1884. A. COLVIN.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 19th December, 1884, and was referred to a Select Committee :—

No. 19 OF 1884.

A Bill to amend the law relating to the carriage of passengers by sea.

WHEREAS by section 99 of an Act of the Imperial Parliament called "the Passengers Act, 1855," it is enacted that "it shall be lawful for the Governor General of India in Council, from time to time, by any Act or Acts to be passed for that purpose, to declare that this Act or any part thereof shall apply to the carriage of passengers upon any voyage, from any ports or places within the territories of British India, to be specified in such Act or Acts, to any other places whatsoever, to be also specified in such Act or Acts;" and it is thereby also enacted that "on the passing of such Indian Act or Acts, and whilst the same shall remain in force, all such parts of this Act as shall be adopted therein shall apply to and extend to the carriage of passengers upon such voyages as in the said Indian Act or Acts shall be specified. The provisions of such Indian Act shall be enforced in all Her Majesty's possessions in like manner as the provisions of this Act may be enforced;"

And whereas certain parts of the said Act of Parliament were by Act II of 1860 (*to amend the law relating to the carriage of passengers by sea*) made applicable to the carriage of passengers upon certain specified voyages;

And whereas by an Act of the Imperial Parliament called "the Passengers Act Amendment Act, 1863," certain parts of the Passengers Act, 1855, which were so made applicable have been amended, and it is provided that the said Acts of the Imperial Parliament shall be construed together as one Act;

And whereas it is expedient that the amendments so made in the Passengers Act, 1855, should also be made in the parts of that Act so made applicable, and it is also expedient to apply those parts so amended to the carriage of passengers upon certain voyages not specified in Act II of 1860;

It is hereby enacted as follows :—

Short title and commencement.

1. (*1*) This Act may be called the Indian Sea Passengers Act, 1885 : and [New.]

(*2*) It shall come into force on the first day of March, 1885. [New.]

Repeal of Act II of 1860.

2. On and from the day on which this Act comes into force, Act II of 1860 (*to amend the law relating to the carriage of passengers by sea*) shall be repealed. [New.]

Certain provisions of the Statutes made applicable to specified voyages from India.

3. The provisions contained in sections 4, 5 and 6 of this Act, and the schedule hereto annexed (being parts of the Passengers Act, 1855, as amended by the Passengers Act Amendment Act, 1863), are declared applicable to the carriage of passengers upon the following voyages, namely :— [Act II of 1860 s. 1, Act VII of 1871, ss. 23 and 24.] [New.] 18 & 19 Vic., c. 119. 26 & 27 Vic., c. 51.

(*a*) Voyages from the ports of Calcutta, Madras and Bombay to the British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis and Fiji; [New.]

(*b*) Voyages from the ports of Calcutta, Madras and Bombay to the French Colonies of Réunion, Martinique, Guadeloupe and its dependencies, and Guiana; [New.]

(*c*) Voyages from the ports of Calcutta, Madras and Bombay to the Netherlands colony of Dutch Guiana; [New.]

(*d*) Voyages from the ports of Calcutta, Madras and Bombay to the Danish colony of St. Croix; [New.]

(*e*) Voyages under the Native Passenger Ships Act, 1876, from Calcutta Madras, Bombay, Karáchí, Rangoon and other ports in British India to the Straits Settlements, to the protected Native States adjoining the Straits Settlements, to Australia, and to ports in the Red Sea or Persian Gulf. VIII of 1876

[Act II of 1860, s. 2.]

Governors or Consuls may pay expenses of passengers taken off passenger-ship.

4. If the passengers upon any such voyage as is specified in the last preceding section are taken off from the ship carrying such passengers, or are picked up at sea from any boat, raft or otherwise, it shall be lawful, if the port or place to which they shall be conveyed is in any of Her Majesty's colonial possessions, for the Governor of such colony, or for any person authorized by him for the purpose, or, if in any foreign country, for Her Majesty's Consular officer, at such port or place therein, to defray all or any part of the expenses thereby incurred.

[Act II of 1860, s. 3, 26 & 27 Vic., c. 51, New.]

Governors or Consuls may send on passengers, if the master of the ship fail to do so.

5. If any passenger of any such passenger-ship as aforesaid, without any neglect or default of his own, finds himself within any colonial or foreign port, or place other than that for which the ship was originally bound, or at which he, or the Emigration Agent, or any public officer or other person on his behalf, has contracted that he should land, it shall be lawful for the Governor of the colony, or for any person authorized by him for the purpose or for Her Majesty's Consular officer at the foreign port or place, as the case may be, to forward the passenger to his intended destination, unless the master of the ship, within forty-eight hours of the arrival of such passenger, gives to the Governor or Consular officer, as the case may be, a written undertaking to forward or carry on within six weeks thereafter the passenger to his original destination, and unless the master accordingly forwards or carries him on within that period.

[Act II of 1860, s. 4, 26 & 27 Vic., c. 51, s. 16.]

Expenses incurred under sections 4 and 5 to be a Crown debt.

6. (*1*) All expenses incurred under the last two preceding sections, or either of them, by or by the authority of a Governor or Consular officer, or other person as therein respectively mentioned, including the cost of maintaining the passengers until forwarded to their destination, and of all necessary bedding, provisions and stores, shall become a debt to Her Majesty and Her successors from the owner, charterer and master of the ship, and shall be recoverable from them, or from any one or more of them, at the suit and for the use of Her Majesty, in like manner as in the case of other Crown debts.

[New.]

(*2*) A certificate in the form given in the Schedule hereto annexed, or as near thereto as the circumstances of the case will admit, purporting to be under the hand of any such Governor or Consular officer (as the case may be), stating the total amount of the expenses, shall, in any suit or other proceeding for the recovery of the debt, be received in evidence without proof of the handwriting or of the official character of the Governor or Consular officer, and shall be deemed sufficient evidence of the amount of the expenses, and that the same were duly incurred;

[New.]

nor shall it be necessary to adduce on behalf of Her Majesty any other evidence in support of the claim, but judgment shall pass for the Crown, with costs of suit, unless the defendant specially pleads and duly proves that the certificate is false or fraudulent, or specially pleads and duly proves any facts showing that the expenses were not duly incurred:

Provided, nevertheless, that in no case shall any larger sum be recovered on account of the expenses than a sum equal to twice the total amount of passage-money received or due to and recoverable by or on account of the owner, charterer or master of the passenger-ship or any of them from or on account of the whole number of passengers who may have embarked in the ship; which total amount of passage-money shall be proved by the defendant if he will have the advantage of this limitation of the debt: but if any such passengers are forwarded or conveyed to their intended destination under the provisions of the last preceding section, they shall not be entitled to the return of their passage-money, or to any compensation for loss of passage.

THE SCHEDULE.

[26 & 27 Vic., cap. 51, Sched.] [New.]

Form of Governor's or Consul's Certificate of expenditure in the case of Passengers shipwrecked &c.

(*See section 6.*)

(*a*). *N. B.*—1. If more passengers were rescued than forwarded, or if bedding, &c., was not supplied, alter the certificate to suit the facts of the case.

(*b*). *N. B.*—2. State generally the nature of the disaster and where it occurred. But if the passengers were only left behind without any default of their own, state the fact accordingly.

I hereby certify that acting under, and in conformity with, the provisions of the Indian Sea Passengers Act, 1885, I have defrayed the expenses incurred in rescuing, maintaining, supplying with necessary bedding, provisions and stores (*a*), and in forwarding to their destination • passengers who were proceeding from to in the passenger-ship which was wrecked at sea, &c. (*b*).

And I further certify, for the purposes of the sixth section of the said Indian Sea Passengers Act, 1885, that the total amount of such expenses is , and that such expenses were duly incurred by me under the said Act.

Given under my hand this day of , 18 .

Governor of &c., (or, as the case may be), *Her Britannic Majesty's Consul at* .

STATEMENT OF OBJECTS AND REASONS.

ACT II of 1860 declares certain parts (namely, sections 52, 53 and 54) of the English Passengers Act, 1855 (18 & 19 Vic., cap. 119) to be applicable to the carriage of passengers upon voyages from the ports of Calcutta, Madras and Bombay to the colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia and Grenada, and from ports in British India to ports in the Red Sea or Persian Gulf. The colonies mentioned were the places to which emigration was then lawful. Since 1860, emigration to the colonies of Fiji, Natal, Réunion, St. Croix, Guadeloupe, Martinique, Dutch Guiana, St. Vincent, Nevis and St. Kitts has been sanctioned. With respect, however, to voyages to places not specified in Act II of 1860, that

Act gives no power to any authority to recover expenses incurred in forwarding shipwrecked passengers to their destination and in maintaining them until they are so forwarded. At present, therefore, the voyages to which the Act does not apply are more numerous than those to which it does.

2. Again, the Act, as it stands at present, is, if strictly construed, inapplicable to the conditions under which emigration from India is usually conducted. Section 3 of the Act, following section 53 of the English Passengers Act, 1855, runs as follows:—"If any passenger * * * find himself within any colonial or foreign port or place other than that at which *he may have contracted to land," &c.* But as a rule, emigrants from India do not themselves contract with the owners or charterers of the vessels in which they emigrate. In all cases falling under the Indian Emigration Act VII of 1871 (or which may fall under the Indian Emigration Act XXI of 1883, when that Act is brought into force) the contract is made by a recruiter for the colony importing labour, under the supervision of the Protector of Emigrants. Emigrants despatched in this way are therefore technically excluded from the provisions of Act II of 1860. A similar difficulty appears to have arisen in England, and to have been met by an amendment of the law. Section 12 of the English Passengers Act Amendment Act, 1863 (26 & 27 Vic., cap. 51), repeals section 53 of the English Passengers Act, 1855, and section 15 of the former Act substitutes for the words "other than that at which he may have contracted to land" the words "other than that for which the ship was originally bound, or at which he or the Emigration Commissioners, or any public officer, or other person on his behalf, may have contracted that he should land".

3. These two defects in the Act came to notice in connection with the following occurrence. In the end of April last, the steamer *Laleham*, carrying emigrants from Calcutta to Dutch Guiana, grounded off Ceylon, and was compelled to land her passengers at Trincomalee. The *Laleham* returned to Calcutta, where she was examined by the Engineer-Surveyor to the port, and reported "unseaworthy and unfit to proceed to sea without serious danger to human life". The Agents of the *Laleham* at first proposed to substitute another vessel, but subsequently declined to do so, offering merely to have the *Laleham* repaired at Calcutta, and to fulfil her charter-party by re-embarking the coolies at Trincomalee and taking them on to Surinam.

The Advocate General of Bengal, on being consulted, was of opinion that no action could be taken under Act II of 1860, and that the matter would be governed by the charter-party. Surinam, he said, being in Dutch Guiana, is not a place to which Act II of 1860 applies. He thought further that the English Passengers Act Amendment Act, 1863, would be construed strictly, and according to such construction he did not think that the words of section 3 of Act II of 1860 would cover the break-down in a voyage to which that Act applied, in any case other than that in which the passenger had himself contracted.

Under these circumstances legislation seems necessary in order to bring Act II of 1860 into conformity with the present system of emigration and the English Passengers Act Amendment Act, 1863.

The present Bill has accordingly been prepared. It repeals and re-enacts Act II of 1860 with the necessary amendments. Section 3 of the present Bill declares the subsequent provisions of the Bill (being parts of the English Passenger Act, 1855, as amended by the Passengers Act Amendment Act, 1863) to be applicable to all voyages to certain specified colonies and places, which are, in fact, the colonies and places to which under the existing law emigration is now lawful or is likely to be legalized; and in sections 5 and 6 the amendments made by the English Passengers Act Amendment Act, 1863, in sections 53 and 54 of the English Passengers Act, 1855 (which formed sections 3 and 4 of Act II of 1860) are incorporated with some slight modifications so as to adapt them to this country.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 24th DECEMBER 1884.

GENERAL REMARKS.—Rain has fallen in places in the Bombay Presidency, in Mysore, and Coorg, in the Berars, and in the Central Provinces and in the Central India and Rajputana States. In Madras there has been heavy rain in the southern districts, especially in Chingleput, and considerable damage has been caused to crops and houses.

Harvesting continues in Madras. More rain is wanted in Bellary and Kurnool, where the crops are withering. In Mysore prospects are fair; a good rice crop is being cut in Coorg; coffee-picking is progressing, but the crop is deficient; a heavy fall in the price of cardamoms has been disastrous to the ryots.

Agricultural prospects continue favourable throughout the Central India and Rajputana States. In Hyderabad the rice harvest and ploughing for the *rabi* are still in progress; cotton is being picked in the Berars, and the standing crops are in good condition. More rain is wanted in parts of some districts in the Bombay and Madras Presidencies, where the crops are withering, elsewhere the condition of the crops is generally good.

In the Punjab the *rabi* sowings have been completed and prospects are good. In the North-Western Provinces and Oudh the *rabi* crops are flourishing and prospects are very favourable.

In the Central Provinces the rain of the past week has been beneficial to the crops and prospects have improved. In Bengal the *amun* paddy harvest will be below the average; the prospects of the *rabi* are promising. The reaping of the *sali* crop continues in Assam and prospects are good. The rice harvest continues in Burma and a good outturn is expected throughout the Province.

The public health is generally good, though in Coimbatore the mortality from cholera continues high.

Prices are almost stationary with local fluctuations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, on Friday, the 19th December, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., P.C., F.R.S., D.C.L., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of Bengal, C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G.
The Hon'ble J. W. Quinton.
The Hon'ble T. M. Gibbon, C.I.E.
The Hon'ble R. Miller.
The Hon'ble Amír Alí.
The Hon'ble W. W. Hunter, LL.D., C.S.I., C.I.E.
The Hon'ble H. J. Reynolds.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St. A. Goodrich.

In opening the Proceedings at the Council, His Excellency the PRESIDENT made the following remarks:—

"YOUR HONOUR AND GENTLEMEN:—I cannot take my seat for the first time at this Council Board without desiring to express to you the extreme satisfaction which I feel in being associated with so many distinguished persons in the government of this great dependency. I feel that for a very long time I must be little more than a learner in regard to the details of many of those important questions which will come up before us from time to time. But it makes me happy to think that I shall have for my colleagues and advisers men so thoroughly acquainted as yourselves with everything that is connected with the administration of India, and in whom both Her Majesty's Government and the general public possess such confidence. I only hope that I, on my side, will be able to do what is incumbent upon me for expediting the public business to your satisfaction."

CARRIAGE OF PASSENGERS BY SEA BILL.

The Hon'ble MR. ILBERT introduced the Bill to amend the law relating to the carriage of passengers by sea, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Reynolds, Miller and Goodrich and the Mover.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Fort St. George Gazette*, the *Bombay Government Gazette*, the *Calcutta Gazette* and the *British Burma Gazette* in English and in such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

TARIFF ACT, 1882, EXCISE ACT, 1881, AND BENGAL EXCISE ACT, 1878, AMENDMENT BILL.

The Hon'ble SIR A. COLVIN introduced the Bill to repeal part of section 6 of the Indian Tariff Act, 1882, and to amend the Excise Act, 1881, and the Bengal Excise Act, 1878, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Gibbs and Ilbert, Rao Saheb Vishvanath Narayan Mandlik, the Hon'ble Mr. Goodrich and the Mover.

The Motion was put and agreed to.

The Hon'ble SIR A. COLVIN also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

STRAITS SETTLEMENTS EMIGRATION ACT, 1877, REPEAL BILL.

The Hon'ble SIR STEUART BAYLEY moved that the Bill to repeal the Straits Settlements Emigration Act, 1877, and to amend the Indian Emigration Act, 1883, be taken into consideration.

The Motion was put and agreed to.

The Hon'ble SIR STEUART BAYLEY also moved that the Bill be passed. He said:—

"When I obtained leave in October last to introduce the Bill that is now before the Council, I explained at some length the historical aspect of the case, and the reasons which led the Government of India to think that the time had come for repealing Act V of 1877, and leaving emigration from Madras to the Straits Settlements perfectly uncontrolled on the Madras side, while relying on the protection to be afforded by the Straits Government to the emigrant after his arrival. I need not go over this ground again; it will be sufficient to repeat that the Act refers solely to Madras; that emigration has been free over the rest of India since 1872, but practically, except from Madras, there has been little or no emigration to the Straits; that the Act itself was a compromise between the free emigration which the Straits authorities desired and the general system of State emigration which obtains with other colonies; that there was a conflict of law between this Act and the Straits legislation, the latter providing for the recovery of advances made to the emigrant before leaving India, while the former declared all contracts for the recovery of such advances to be null and void; and that as a matter of fact the Act had been a failure, for it appeared that of the total number of Natives of India emigrating to the Straits less than a quarter were registered and protected under this Act, while the other three-quarters went over nominally as free passengers, though to a great extent assisted by advances from the labour-contractors.

"I explained that when Act V is repealed the only restriction on emigration on this side of the water will be that emigrants will be registered by the Emigration Officer, and a complete nominal roll prepared by him will be conveyed by the commanders to the Straits authorities, and that the emigrant will make his contract after arrival at the Straits before the Emigration authorities of that Government: I added that the protection provided for in the Ordinance framed by the Straits Government appeared to us and to the Madras Government to afford sufficient protection and was framed to a great extent on the lines of our own protective legislation.

"That Ordinance has now been passed into law by the Straits legislature, and the Government of the settlement are urgent in asking us to lose no time in repealing the Act of 1877.

"I may mention that the Ordinance did not pass into law unopposed in the local legislature. There are certain provisions in the Ordinance which were considered to interfere unduly with the liberty of the subject, and which were not only opposed in the legislature but have been made the subject of remonstrance to the Government of Madras. The object of these provisions is to pre-

vent the free emigration to the Straits being made a cloak for the purpose of evading our law by means of transhipping emigrants from the Straits to other places, such as the Dutch Settlements, with which we have no convention, and to which emigration from India would be illegal, and where the Indian coolie would be unprotected.

"It was clearly incumbent on the Straits Government to prevent this, and they have loyally carried out the obligation, though at the cost of some difficulty in passing their Ordinance, and the Government of India are bound to express their gratitude for the consideration herein shown to their wishes.

"The Bill now before the Council is, as I said before, exceedingly simple in its provisions. It has been circulated to all the Local Governments and Administrations. The Madras Government have expressed themselves fully satisfied with it, and the other Governments, with one exception, have also approved it, Sir Charles Aitchison from the Punjab expressing an emphatic approval of the principle of freeing emigration from all restrictions before departure, and trusting to protection after arrival. There is, however, one exception. From the Government of Bengal have come certain objections, but the letter explaining those objections (Paper No. 10 to the Bill) is, as will presently be seen, written under a misapprehension. The misapprehension, I ought to explain, is probably due to some correspondence with the Revenue Department, which took place in April last, before the action to be taken was finally settled with the Madras Government, and in which His Honour the Lieutenant-Governor was consulted as to the expediency of extending to Bengal certain regulations which the Straits Government proposed as sufficient, in conjunction with their own Ordinance, for regulating emigration from Madras. None the less the letter is written under a misapprehension. The Government of India do not, as supposed by the Government of Bengal, propose substituting any legislation for Act V of 1877, much less do they propose to apply such legislation to Bengal, and the only executive control which they propose to exercise is to cause the nominal roll, which is already required by the Native Passenger Ships Act, to be prepared by the Emigration Officer and to be delivered by the commander of the vessel to the authorities of the Straits.

"This of course touches only the form of the objection. The substance of the objection is to the fact of our recognising in any way the system of recovering advances which is provided for in the Straits Ordinance. Now, this system is one which we do not recognise, as the Government of Bengal rightly observe, in our dealings with emigration to other colonies. It is undesirable that in colonies where at the best the Indian emigrant is not only a stranger in a strange land, but very helpless in the hands of the employer-class, that he should start under the burthen of a load of debt; and in these colonies the supply of Indian emigrants has been such an urgent necessity for the welfare of the colony that we have been able to insist on a different system being adopted. That system is that the coolie before leaving India enters into a contract not with a particular employer but with the Colonial Government through their agent here. The Colonial Government pay all his expenses from the moment of his recruitment up to the time of his arrival at the colony from the general revenues, and we look to them to carry out the terms of the agreement as against any subsequent employer. In other words, these advances are made in those cases not by the individual employer but by the Colonial Government. Of course, in the long run these advances have to come out of the coolies' wages in some shape or another. It may take the shape of a lower rate of pay, or, as in Assam, of a longer indenture, than would otherwise be insisted on; but we may be assured that in some shape or another the colony recoups its expenditure from the labour fund ultimately, though by the method adopted the first payment comes out of the pocket either of the tax-payers in general or of a special class. The case of the Straits, however, is different, and it is different in two ways. In the first place, owing to other sources of labour-supply being open to them, the Indian element is not of such urgent importance to the colony as to justify their maintaining a system of State immigration out of the general revenues, and they have always steadily refused to do so; on the other hand, a system of free emigration has been going on between the Madras Coast and the Straits ever since the beginning of the century, and the settlers from Madras

form a strong and important element in the community, quite capable of looking after themselves and protecting their countrymen. In other words, we have neither the only lever wherewith we could move the Straits Government to adopt the colonial system, nor is there the same necessity for it there as elsewhere. As I have already observed, Act V of 1877 was intended to stop the system of emigration under advances by rendering the recovery of such advances illegal. The result has been that four-fifths of the emigration to the Straits have evaded the restrictions of the law, and have gone on unregistered and unprotected as well as unhampered by that Act. It is in consequence of the entire failure of the Act in this respect that we have now before us, with the full acceptance of the Madras Government, the proposal to repeal the Act and to rely on protection in the colony rather than on restriction at the place of departure.

"So much for Madras; now what is the position of Bengal in regard to this question? Since 1872 there has been no legal restriction whatever on emigration from Bengal to the Straits. Act XIV of 1872 empowered the Government to exempt by notification the Straits Settlements from all its provisions, and in June of that year a notification to this effect was accordingly issued. If any emigration has taken place between Bengal and the Straits during the past fourteen years, it has been perfectly free, and there has been no interference with the power of the Straits Courts to order the recovery of advances. There has been a legal power to rescind that notification, but no one has ever asked that it should be rescinded; and why? The real reason is to be found in the simple fact that there has practically been no emigration from Bengal to the Straits. Of course, such a system may hereafter grow up, but at present, so far as I can learn, there are no signs of it. Under the Act which was passed last year, but which has not yet come into force, for regulating emigration to the colonies, the Straits Settlements are expressly excluded in the definition; in other words, no restriction is placed on emigration to those Settlements, but the Act gives power to the Government to extend the provisions of Act V of 1877 to other parts of India. At that time it was uncertain whether the Madras Act would be amended or repealed, but, as was explained at the time, there was no intention whatever of extending the Act as it stood to other parts of India. In any case fresh legislation would have had to be resorted to if it were desired to control emigration from Bengal to the Straits. The repeal, then, of Act V of 1877 leaves the position *quoad* Bengal exactly where it was, and the objections of His Honour are really of a theoretical rather than of a practical nature. The question he asks is, in effect, 'If there were emigration from Bengal, would it be right to regulate it on the same lines as those on which emigration from Madras is regulated?' I think for our present purpose it is scarcely necessary that I should try and find an answer to this question. I may, however, venture to assure the Lieutenant-Governor on the part of the Government of India that we recognise a distinction between the circumstances which surround a Madras coolie at the Straits and those which would surround a Bengali coolie, and if emigration between Bengal and the Straits should receive an important development it will be open to him to propose a stricter method of regulating it, and that any measure which he proposes will receive the fullest consideration.

"Before leaving off I may explain exactly what the recognition of the system of advances amounts to. The immigrant comes under contract after arrival at the Straits before the Indian Immigration Agent. He is specially warned (section 27 of the Ordinance) that no contract unless so made is valid. Section 13 provides that this officer shall, before entering in the contract-deed the amount advanced, satisfy himself that it has really been paid in full to or on account of the emigrant. Then section 42 limits the entire amount which can be recovered to 12 dollars, and the instalments in which it can be recovered to one dollar a month. The minimum wages are 3·60 dollars a month, so that the deduction cannot be more than about 25 per cent. on a man's average earnings for a year. This completes all I need say on the subject; and apologising for the length at which I have occupied your attention,—a course which my respect for the objections offered by so high an authority as the Lieutenant-Governor of Bengal seemed to render incumbent on me,—I have only to express my hope

that the Bill may be passed, and that the system of free emigration, which has already been extended to Burma, may prove successful in the Straits."

His Honour THE LIEUTENANT-GOVERNOR said :—" My Lord, before your Excellency puts to the Council the question that this Bill be passed, I would ask to be allowed to make a few observations with reference to the remarks which have fallen from my hon'ble friend in charge of the Bill; and more especially from the fact that I find that I am referred to as the one solitary exception among many great authorities who have taken no objection to the proposals of the Government of India. I may say at once that I do not now intend to raise any question as to whether this Bill should or should not be passed, or to delay in any manner the carrying of the Motion which is to be put to the Council. The Act which it is proposed to repeal is an Act of this legislature passed in the year 1877, and, as Sir Steuart Bayley has said, applies exclusively to the Presidency of Madras. As that Act has now become obsolete from circumstances which have made its retention on the Statute-book clearly not necessary, it does not concern the Bengal Government whether it remains on the Statute-book or whether it be repealed. The fact is that emigration from the Madras Presidency to the Straits Settlements has been going on, I believe, from the commencement of the present century. A large Madras population is, therefore, collected in the Straits Settlements for the purpose of labour, and all attempts which have been made by the Government of India to restrict that emigration to the same system under which emigration generally is carried on to the colonies have been found abortive. I find from the papers that since 1877, while only 4,500 emigrants have passed out from Madras to the Straits Settlements under the operation of the Act, not less than 25,000 have gone outside of it. The reasons for this, amongst others, are, I believe, that there are two French ports within the limits of the Madras Presidency, and whatever attempts the Government might make to control and supervise emigration from Madras are frustrated, where objections are taken to those restrictions, by coolies being taken from our own districts to ports of embarkation in French territories; and then they are absolutely beyond the control of either the Government of Madras or the Government of India. The necessity, therefore, for a repeal of the law became obvious from the fact that free and unrestricted emigration was going on from Madras to the Straits Settlements, and as far as the mere repeal of the Act I have nothing to say. But it is in the circumstances which are connected with the repeal of the law and which have reference rather to the executive arrangements which the Government of India have made with the Straits Settlements that the matter deserves attention. When the question was referred to me as Lieutenant-Governor of Bengal, whether I had any objection on my part to the extension of similar arrangements as had been concluded between Madras and the Straits to this part of India, I thought it my duty to take exception to the Ordinance of the Straits Settlements which relates to the regulation of emigration to that colony. Under the operation of the general Emigration Act which was recently passed, it is known to the Council that the greatest strictness is enforced as regards all circumstances connected with the recruitment, registration and deportation of labourers going from any part of India to the colonies. We insist upon the certificate of the recruiter being produced in the recruitment district, and the registration of those who intend to emigrate before the local authorities of that district. We regulate their being brought down to Calcutta to emigration-depôts in this city; we insist as a primary condition that there shall be no kind of advances made to the coolie, that he fully understands his contract before he leaves the country, and that he leaves it unshackled by any debts. These general conditions under which emigration is directed are the outcome of a great many years of consideration, discussion and experience. Nothing has been so strongly insisted upon in my recollection of the subject when I was connected with the Government of India than that no system of advances should be tolerated. When, therefore, it was put before me that emigration from Bengal to the Straits might be allowed on the open system under which advances were permissible, I thought I was bound to take the exception which my former experience of the subject justified me in taking. The obvious reasons as regards these objections are, that, in

the first place, we have now some thirteen colonies competing in the labour-markets in Bengal for coolies to emigrate to their respective colonies, and they all work under a system which does not recognise the two provisions to which I have referred. Now, if the recruiter from the Straits Settlements is to arrive in Bengal authorised to recruit, and free from all those conditions as to registration and other restrictions which the general law imposes, and is to go into the interior of the country with money to induce labourers to accompany him, not only would he probably succeed from the fact that the people of Bengal are very credulous, and are ready to take money from everybody who offers it to them, completely indifferent as to the circumstances or conditions under which they take it, but he would be enabled to take away labourers, ignorant of the terms of their contracts and bound by a load of debt which may be increased by claims for clothing, food and other things after their arrival at their destination. The Bengali emigrant would thus be in a very unsatisfactory position. Then, again, if the Straits Settlements recruiter is empowered to advance money, he is very favourably circumstanced as compared with recruiters for other colonies; and it would come to pass, I have no doubt, in a very short time, that, if we allow this system to arise in Bengal with regard to the Straits Settlements, we shall find the Emigration Agents in Calcutta, for Mauritius, the West Indies and different places claiming to be placed in the same condition as the favourably constituted Straits Settlements recruiter; and I don't know how we should be able to resist their claim. Therefore, I am sure the practice would grow; and, as the system has been condemned as a bad and a mischievous one, I felt, when I was asked whether the proposal was applicable to Bengal, that I was bound to oppose it as one which it was not desirable to encourage in this Presidency. There are other objections, to one of which my hon'ble friend has already alluded, namely, that a coolie going from Bengal is going among a strange population; and if the Straits Settlements authorities understand that under the arrangements recently made with them, they are at liberty also to come to Bengal and carry out a procedure which may be quite right and reasonable with regard to the Madras Presidency, from the fact that emigration from Madras has been going on for half a century or more, we are absolutely without any kind of protection, and may ultimately see a system grow up which is altogether objectionable. Therefore, I am very glad to receive the assurance, which my hon'ble friend now gives me, that, if such a state of things should arise, I should have a right to appeal to the Government of India to afford me that legislative protection as regards emigration from Bengal to the Straits Settlements which is necessary to make it consistent with the general principles which govern emigration to the Colonies."

The Hon'ble MR. ILBERT said :—"I understand the law and facts of the matter to be shortly these. At present there is no law regulating emigration from Bengal to the Straits Settlements, and no emigration to which such a law, if it existed, would apply. There is a law regulating emigration from Madras to the Straits, and there is on our Statute-book a provision enabling the Government by executive order to apply that Act to other parts of India, including Bengal. As I was in charge of the measure which contained the provision giving that power, perhaps I might be allowed to remind the Council of the reasons I then gave for its insertion. I then said :—

'The Indian emigration to that colony takes place, I believe, exclusively from the Madras Presidency, and is at present regulated by a special Act (V of 1877) which applies only to that Presidency. We are now engaged in negotiations with the Government of the Straits Settlements, which will, I hope, before long enable us to repeal this Act and to make emigration to that colony entirely free. But in the meantime, and as a temporary measure, we have thought it expedient to take power to extend the Act to other parts of British India, in case it should be found necessary to regulate emigration from Calcutta to the Straits. I do not in the least anticipate that the Act will be found necessary, because I believe that no such emigration takes place, or is likely to take place.'

"We are now in a position, with the full approval of the Straits Settlements Government and the Government of Madras, to repeal the Madras Act, and as to Bengal I feel sure the Council will be of opinion that our proper

urse is to wait until the necessity for legislation has been shown to exist, nd then to adopt such measures for regulating emigration and protecting nigrants as the actual facts may show to be necessary."

The Motion was put and agreed to.

BURMA STEAM-BOILERS AND PRIME-MOVERS ACT, 1882, AMENDMENT BILL.

The Hon'ble MR. ILBERT presented the Report of the Select Committee n the Bill to amend the Burma Steam-boilers and Prime-movers Act, 1882.

The Council adjourned to Friday, the 2nd January, 1885.

FORT WILLIAM;
The 26th December, 1884.
